1 Welcome

Thank you for purchasing Akuvox VP-R48G Multimedia VoIP Phone. The VP-R48G is an innovative smart desk phone loaded with tremendous value for business communications as well as unprecedented power for advanced custom business applications development and personalization. Featuring Android 5.1 system, a 7 inch capacitive touch screen TFT LCD, a 1.3M CMOS sensor camera, Bluetooth, integrated PoE and Wireless, VP-R48G provides excellent user experiences such as high quality video phone, smooth internet surfing, various 3rd party applications and daily information. Built with advanced security protection for privacy, this Multimedia VoIP Phone also features broad interoperability with most 3rd party SIP based devices, IPPBX and major IMS platforms. The VP-R48G represents the future multimedia terminal in modern Internet age.

This user manual is designed to help you understand how to configure and manage the VP-R48G Multimedia VoIP Phone. Besides demonstrating how to install this unit with ease, this manual will explain how to fully utilize the phone's voice calling features as well as explore all the built-in feature-rich applications.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful

interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

2 Product Overview

2.1 Instruction

VP-R48G is an Android-based multimedia terminal with a 7 inch touch screen and a 1.3M CMOS sensor camera. It supports H.264/H.263 codecs with adaptive bandwidth adjustment. The 7 inch touch screen offers excellent user experiences such as high quality videophone, smooth internet surfing, various Android Apps and daily information.

VP-R48G provides 2 Ethernet ports, 1USB, 1HDMI, and one 3.5mm headset/audio port.

2.2 Technical Specification

2.3 Equipment Appearance And Interface Description

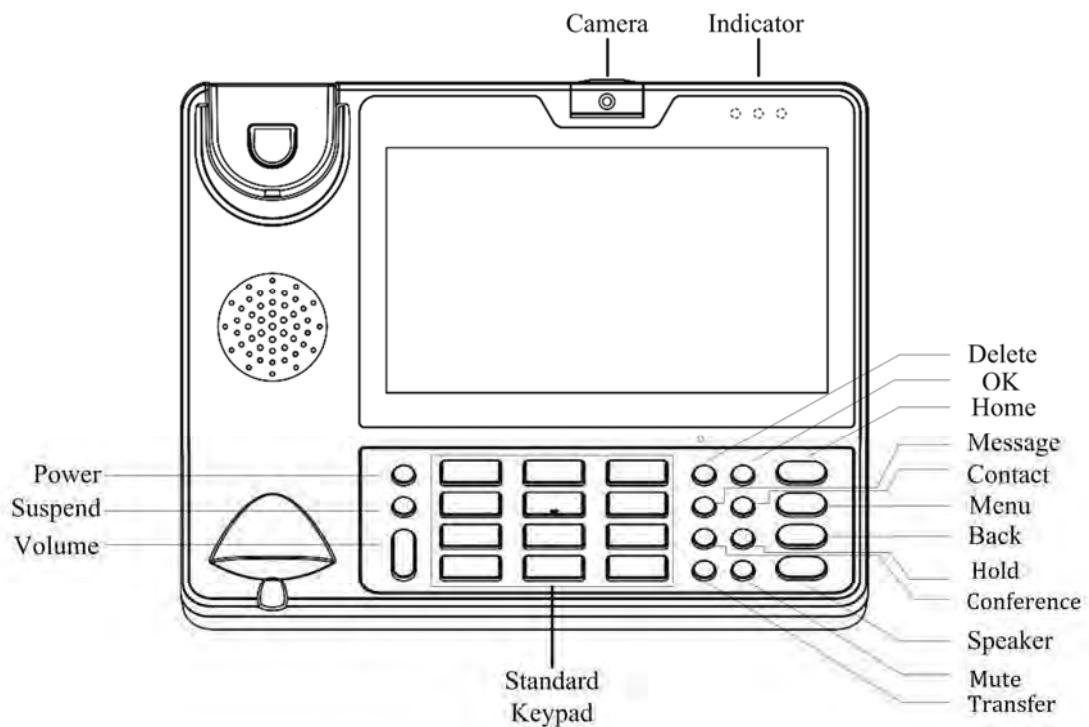

Figure 1-1 R48G Front View

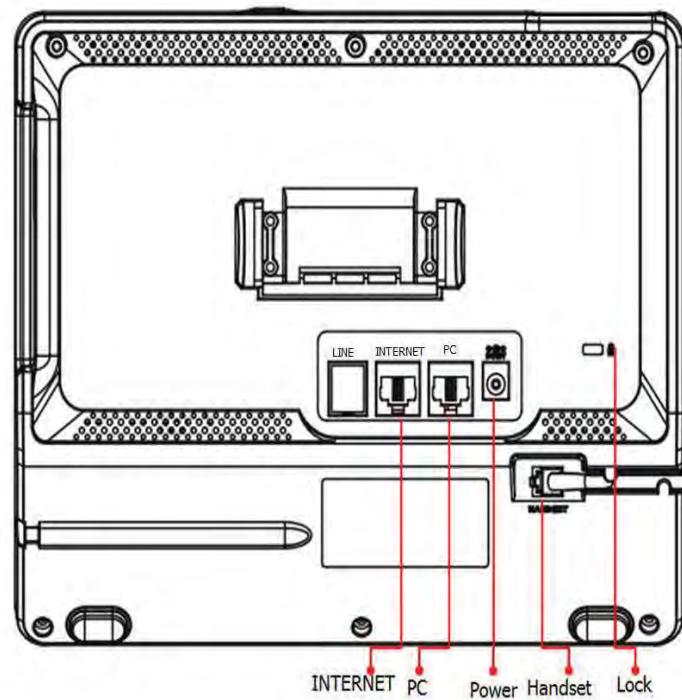

Figure 1-2 R48G Rear View

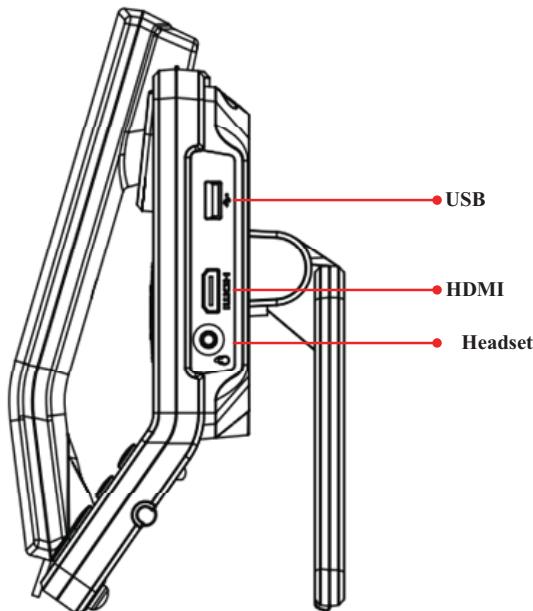

Figure 1-3 R48G Profile View

2.3.1 Interface Description

Interface	Description
Camera	Adjustable camera shooting angle, rotate down the camera to "off" angle.
USB interface	External USB storage device
Headset	Connect to 3.5mm stereo headphone, headset device
HDMI	Use HDMI cable to output the video to a TV screen
LAN	Network interface can be connected to a hub, switch or other network access devices. It also supports POE(Power over Ethernet) .
PC	Share the network access from LAN port, and for PC and other equipment connection
Power	Connect to 12V adapter, Power supply
Handset	Connect to handset
Lock	Lock the video phone with a Laptop lock

Note: If Power over Ethernet is being used, do not plug in the AC adapter.

2.3.2 Keypad Description

Interface	Description
Power	Turn on/off the LCD, Reboot, Silent mode
Suspend	Turn on/off the LCD, Reboot, Silent mode

Volume	Press + or – for the phone volume adjustment	
Standard Keypad	Input the number or symbol	
Function Key	Delete	Delete a character before the cursor
	OK	Same function with soft keyboard "Enter" key
	Message	Optional
	Contact	Enter Into the contacts list, you can view the local contact
	Conference	The first party is held in the case, according to a conference key, the first party can be combined to achieve a tripartite meeting
	Hold	To hold a call during the call
	Transfer	To transfer the current call to the third party
	Mute	The other party cannot heard the voice during the call
Home		Return to the main screen, and long press, it will display recently used applications
Menu		To call up the System or program setup menu
Back		Return to the previous menu
Speaker		Speaker

2.4 Indicators

Indicator Name	Icon	Status	Description
Power		ON	System is under working
		OFF	System is not working
Network Connection		ON	Network (LAN Port) is connected
		OFF	Network (LAN Port) is disconnected
Information		Flashing	Contains Miss Calls or Unread Message
		OFF	Normal status

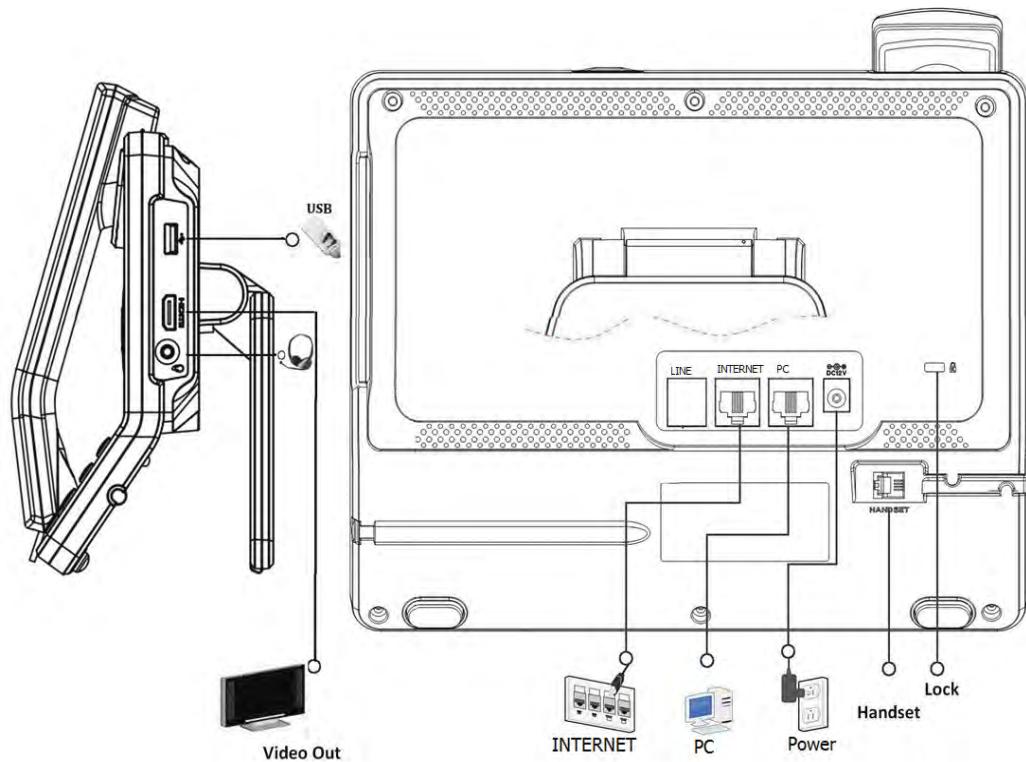

3 Installation

Ethernet Cable	1
Quick Start Guide	1

3.2 Connecting Video Phone

- Connection diagram

- **Connecting to Network**

Use the matched network cable to connect the LAN Port of the video phone to the Router or Switch. Viewing the top right corner of the screen, if the indicator light  is on, network cable is connected properly.

- **Connecting to PC**

Use the matched network cable to connect the PC Port of the video phone to the PC. The PC can access to the internet network via PC Port of the video phone.

3.3 Installation Considerations

This product is a desktop product, and here are some safety recommendations about the installation and the usage:

- Do not use this product near water, such as: bath, washbasin, kitchen sink and other damp places and so on;
- Place the device in a place away from heat;
- Place the device away from traffic areas to prevent collisions;
- Please use the equipment with the matching power adapter or POE;

4 Getting Started

4.1 Basic Operation

4.1.1 Main Screen Instruction

- Status bar, at the top of the screen, displaying the status of system information.
- Shortcuts, at the bottom of the screen, user can drag a shortcut to this region to achieve the replacement of the shortcut. Supports max four shortcuts.

4.1.2 Status And Notifications Instruction

The status bar in main screen is divided into two zones, notification area and status area, as shown below:

Status Area

Icon	Description
	Network is connected
	Slide mode (Sound is off)
	Alarm clock is set
	Bluetooth is opened

Notification Area

Icon	Description
	SIP account is unregistered
	SIP account is registered
	Missed call
	uploading

4.1.3 Using The Touchscreen

- **Tap**

To select items on the screen (e.g., setting options, apps); to press onscreen buttons; to type letters and symbols using the onscreen keyboard.

- **Touch and Hold**

Touch the item on the screen and hold it without lifting your finger from the screen till an action occurs.

For example, touch and hold on a picture to bring up operation options.

- **Drag**

Touch and hold an item for a few seconds first. Once the item has a red frame activated, or a move option shows up, keep your finger on the screen and move it until the target position is reached. Then lift your finger up to release.

- **Slide**

Move your finger fast across the screen to slide. To view different idle screens or menu pages, slide left or right; to view the status bar on top of the screen, place your finger on the bar and slide it down. If your finger stays on the screen for too long, the item may be selected and sliding won't occur.

- **Double-click**

Click on the screen twice in quick succession, for example, when user surfs in browser, you can quickly click twice on the page, the page can be enlarged.

- **Pinch**

Place two fingers on the screen, then pinch them together (zoom out) or spread them apart (zoom in). This could be used in a picture.

4.1.4 Startup And Shutdown

- **Startup**

Connect to the power supply, the system automatically starts up.

- **Shutdown**

If you do not use the device, directly remove the power supply, to save electricity.

- **Reboot**

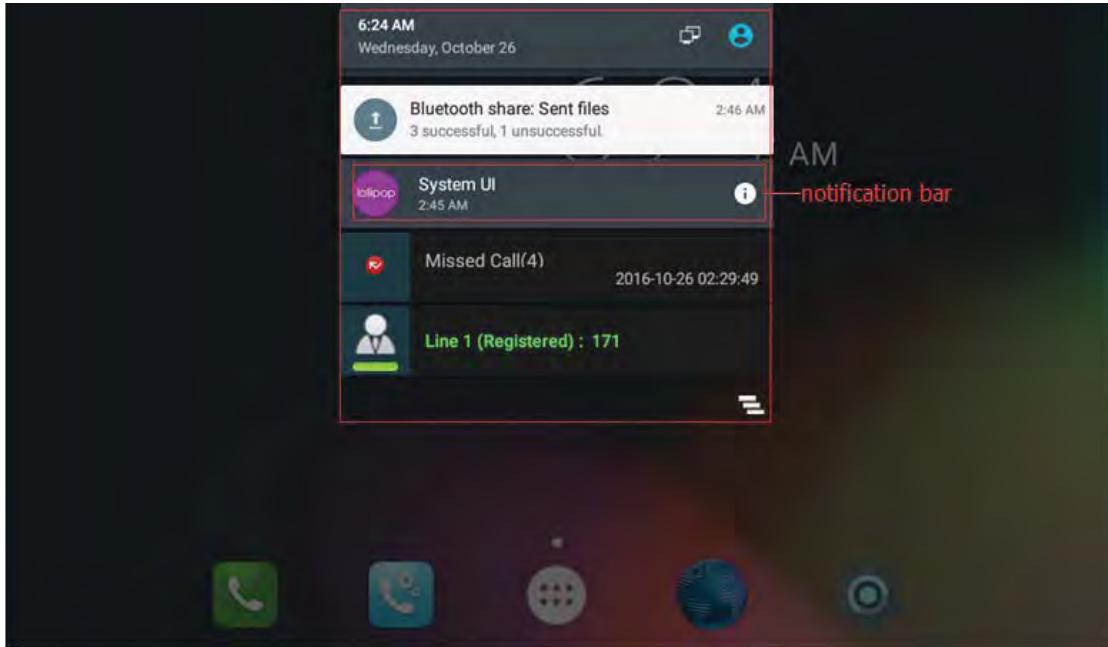

If you need to restart the device, according to the following steps:

- 1) Press and hold the "Power" button until the pop-up "Options" menu.
- 2) Click the "Reboot"

4.1.5 View / Turn Off Notifications

- To view notifications, drag down the status bar, then click the each notification bar to view the detail notification.
- Touch and hold one of notifications bar until the icon  appear, tap the icon  to enter the priority setting interface.

- To turn off notifications, simply drag down the middle of the idle screen to display notifications, click on the icon  to clear up the notice. As shown below.

4.2 Connecting To Network And Wi-Fi

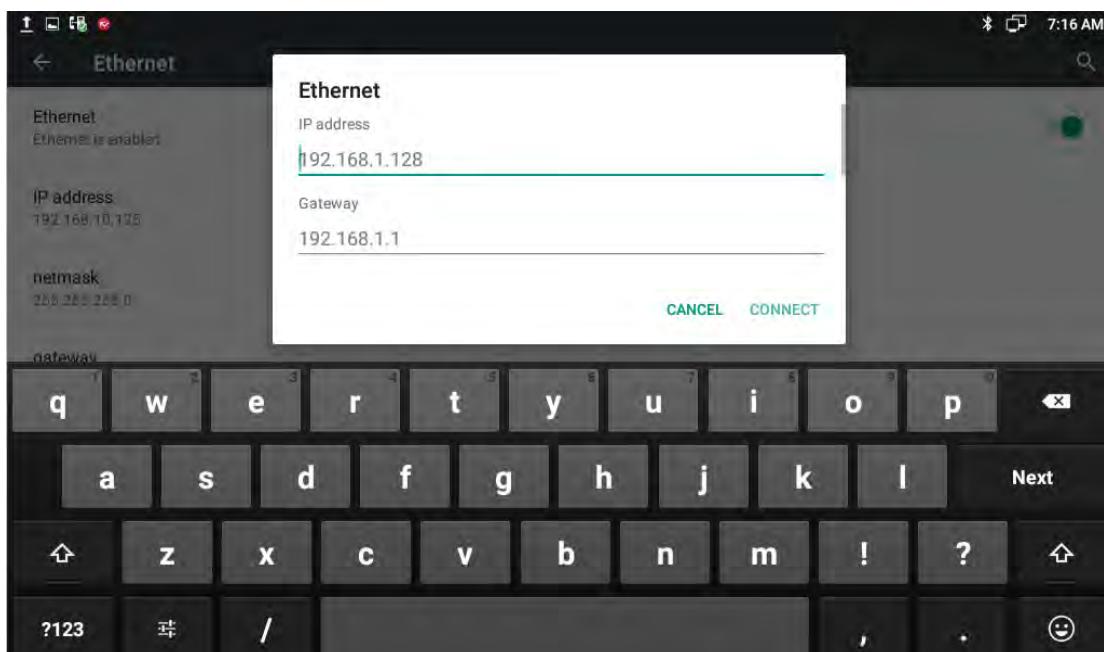

VP-R48G supports a variety of network connections (Ethernet, Wireless) and the device Network connections includes three modes, Static IP, DHCP, Wi-Fi access. DHCP is the default configuration. The device connections include EHS headset, USB and Bluetooth device.

4.2.1 Configuring Static IP

You can select one of the following methods to enter the static IP configuration interface:

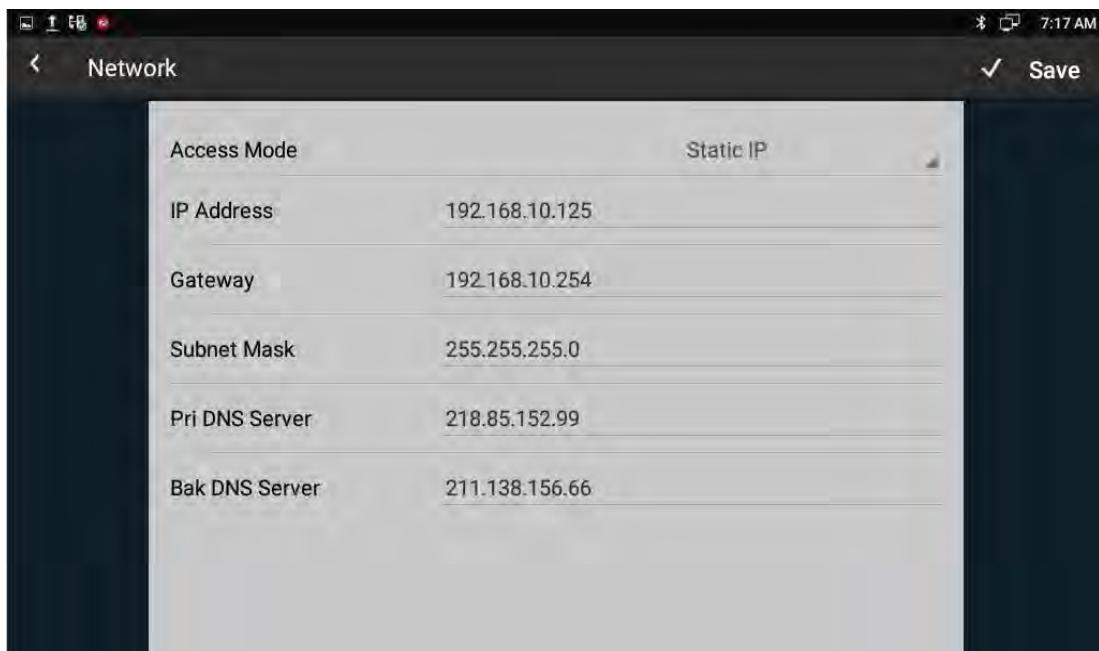

- Mode 1: In the main screen, tap icon  -> Settings  -> Wireless & Networks-> More-> Ethernet -> Ethernet Ip mode -> check static.

Configuration page is shown as below:

- Mode 2: In the main screen, tap icon -> Network Settings -> LAN Type->Access Mode->choose Static IP.

Configuration page is shown as below:

Configuration parameter specification:

Parameter	Specification
IP address	set the IP address of the device
Subnet Mask	set the subnet mask of the device
Default Gateway	set the default gateway

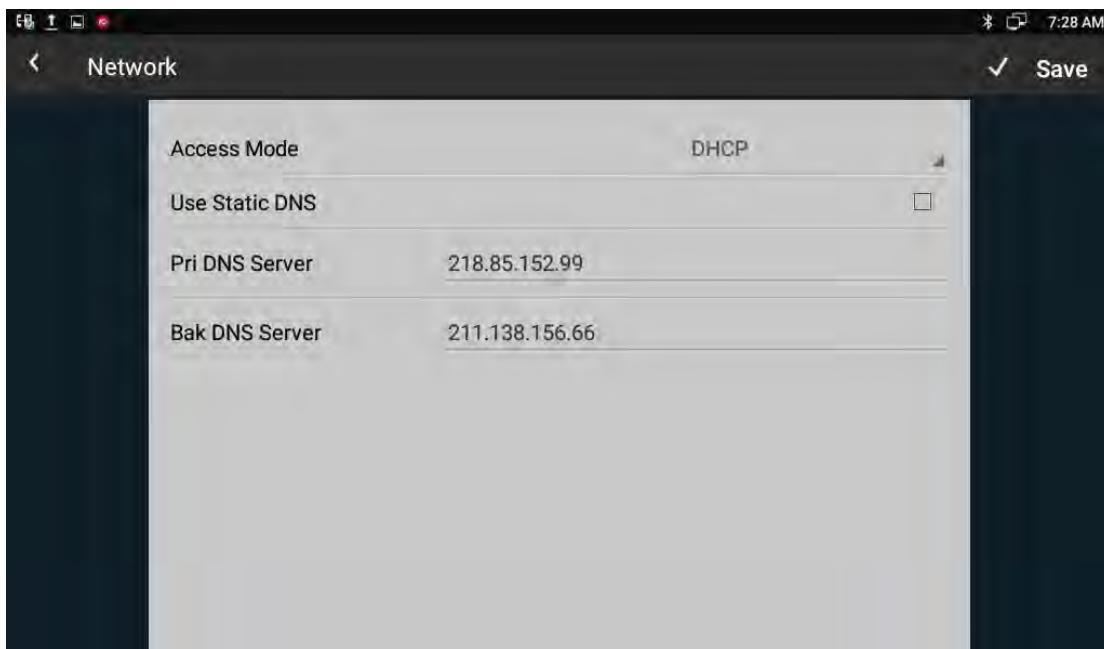

DNS Server	set the DNS address
Alternative DNS Server	set the backup DNS address

4.2.2 Configuring DHCP

You can select one of the following methods to enter the DHCP configuration interface:

- Mode 1: In the main screen, tap icon  -> Settings  -> Wireless & Networks->More->Ethernet -> Ethernet Ip mode->check dhcp.
- Mode 2: In the main screen, tap icon  ->Network Settings->Network Management->LAN Type->Access Mode-> chose DHCP.

Configuration page is shown as below:

Note:

- 1) There is a item of Use static DNS at the second bar, when checked, you can modify the primary DNS address and Secondary DNS address.
- 2) If DHCP is failed, the IP address will show as: 0.0.0.0.

4.2.3 Configuring Wi-Fi

You can select one of the following methods to enter the Wi-Fi configuration:

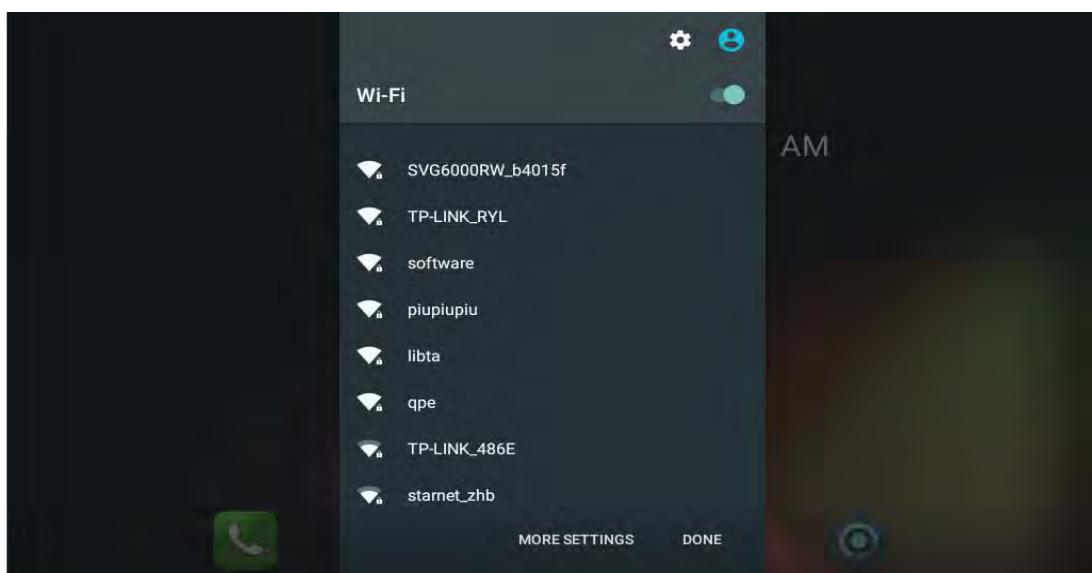

- Mode 1: In the main screen, tap icon  -> Settings  -> Wireless & Networks-> Wi-Fi.

Configuration page is shown as below:

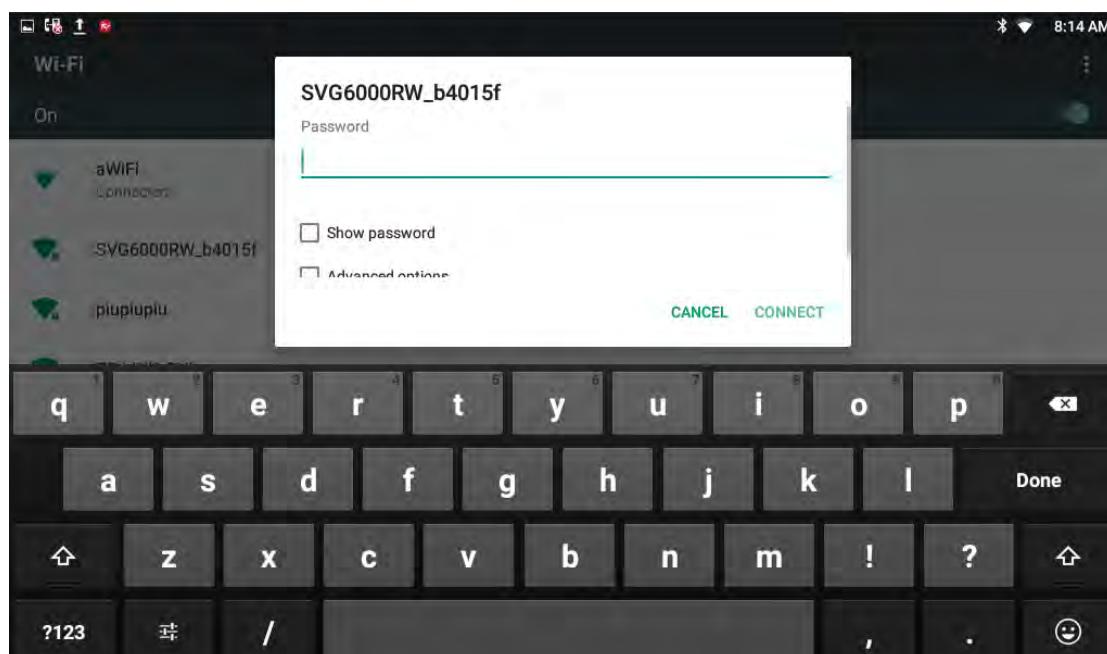

- Mode 2: In the main screen, drag down the middle of the idle screen to display notifications-> tap icon  -> tap Wi-Fi.

Configuration page is shown as below:

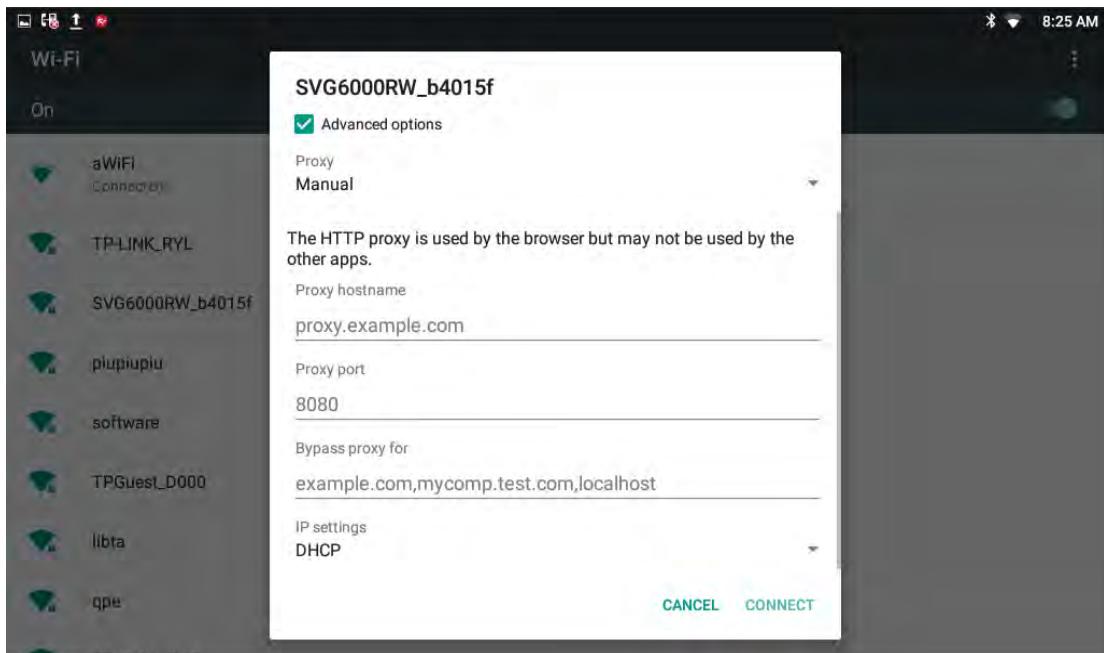

- 1) When the Wi-Fi switch is turned on, the video phone can list and display all Wi-Fi AP searched in the environment.
- 2) When connects to available AP in the environment, if a Wi-Fi AP is without password protection, there is no lock icon on Wi-Fi signal, it will automatically connect when clicked.
- 3) If a Wi-Fi AP is encryption, Wi-Fi signal will be added the lock icon, and when checked, it will pop up a dialog box to enter a password. If the password is incorrect, the connection will not be successful. As shown below:

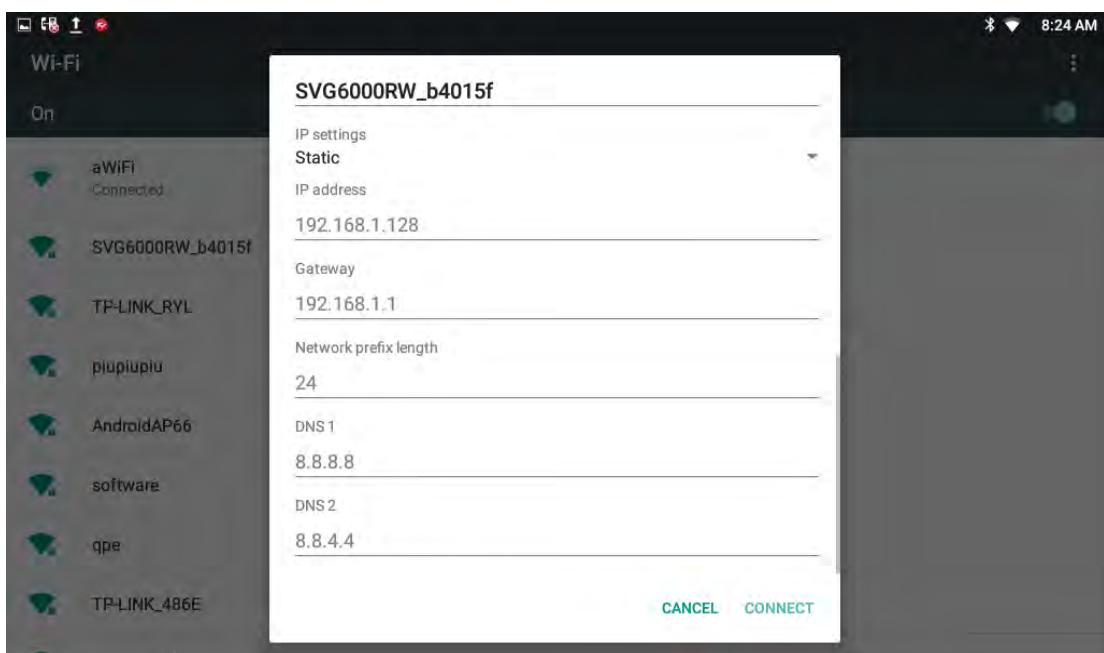

- 4) check Show advanced options, drag up to the modify Proxy server and IP mode.

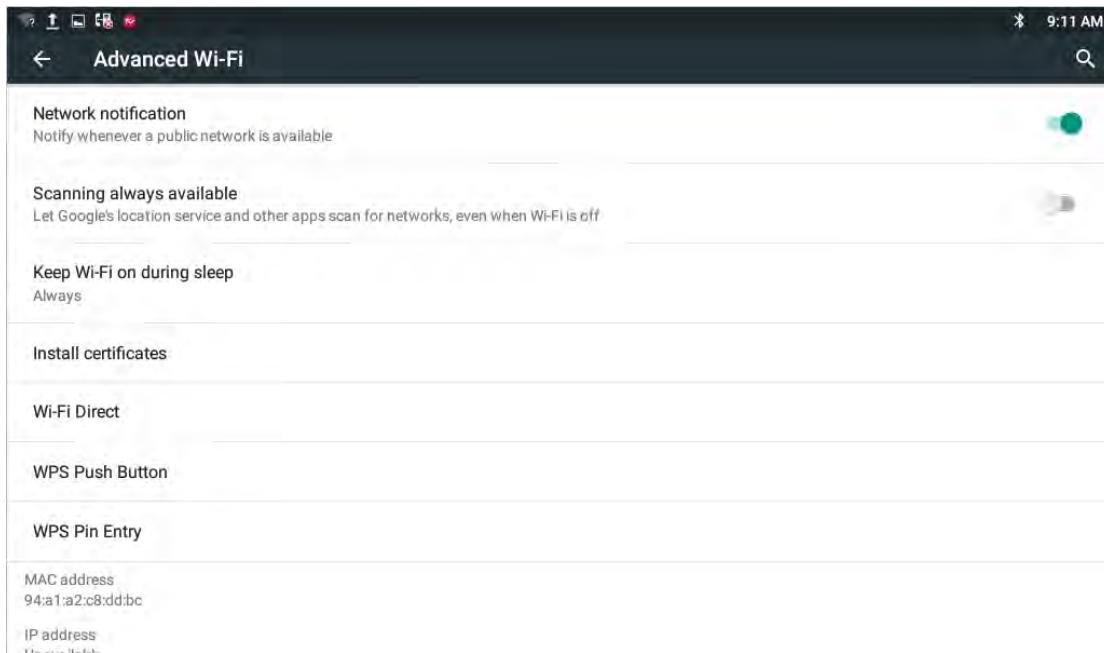

Proxy Settings

IP settings(Static IP):

- 5) Tap the connected Wi-Fi AP, it will pop-up a dialog box, you can forget the network or modify the network. Touch and hold on the non-connected Wi-Fi AP, it will pop up a dialog box, and you can click and connect to network.
- 6) Click Menu, you can do the operations such as: add network setting, refresh the Wi-Fi AP list and Advanced setting.
- 7) In Advanced Menu, shown as below:

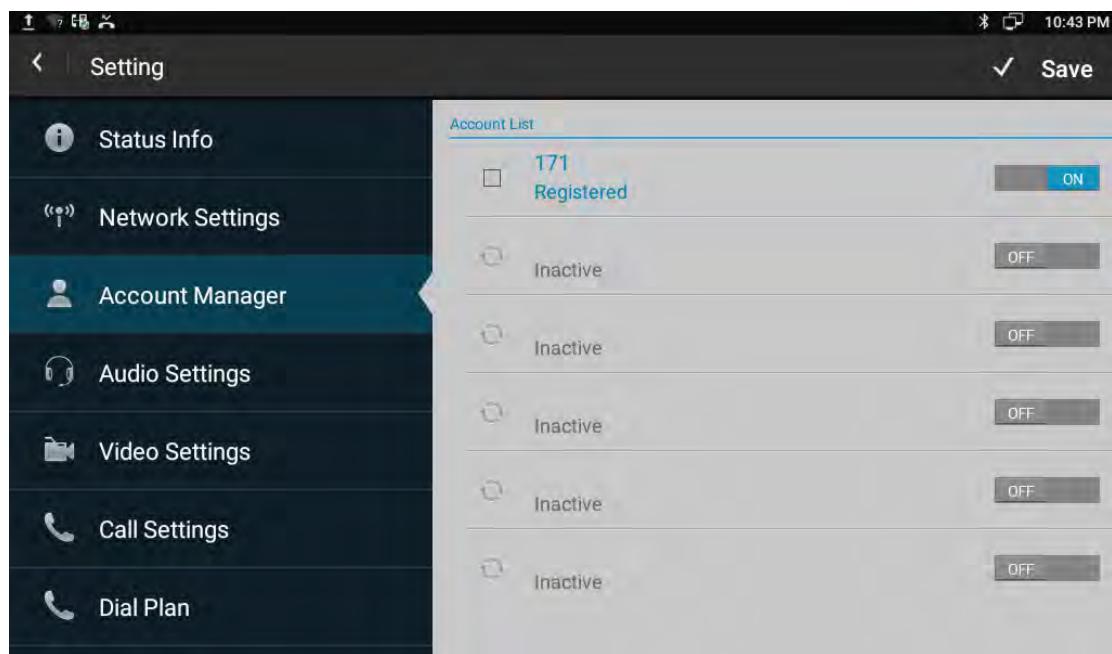

- a. Check Network notification, it will notify you when an open network is available;
- b. Check Scanning always available, let google's location service and other apps scan for networks, even when Wi-Fi is off.
- c. View the Wi-Fi Mac address and IP address;

4.3 SIP Account Configuration

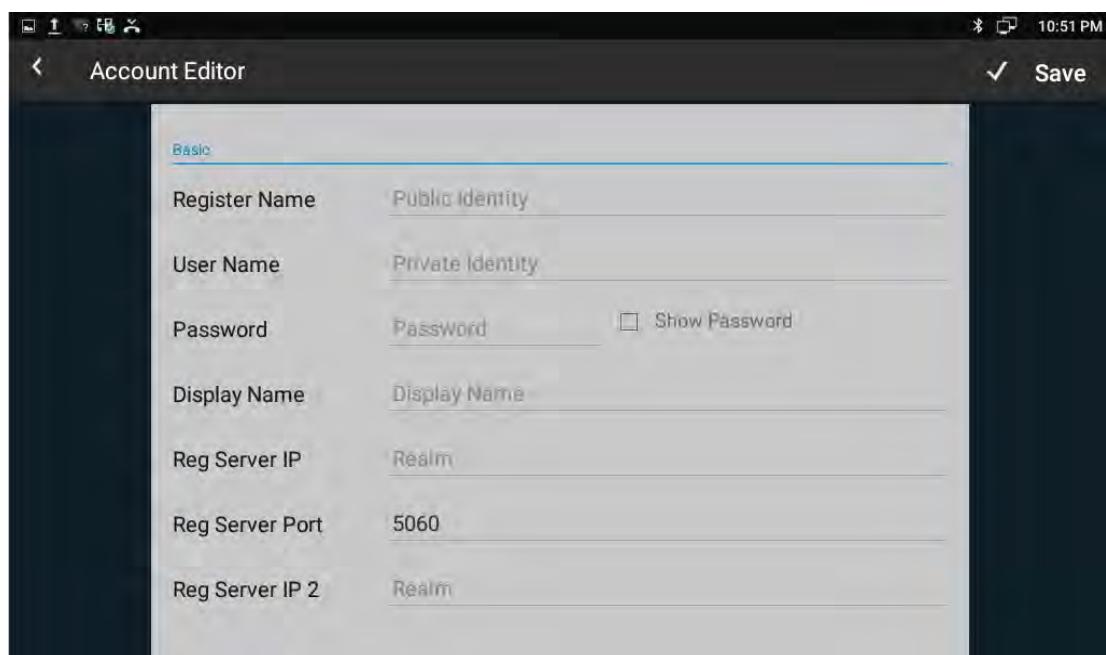

You can select one of the following methods to enter the SIP account configuration:

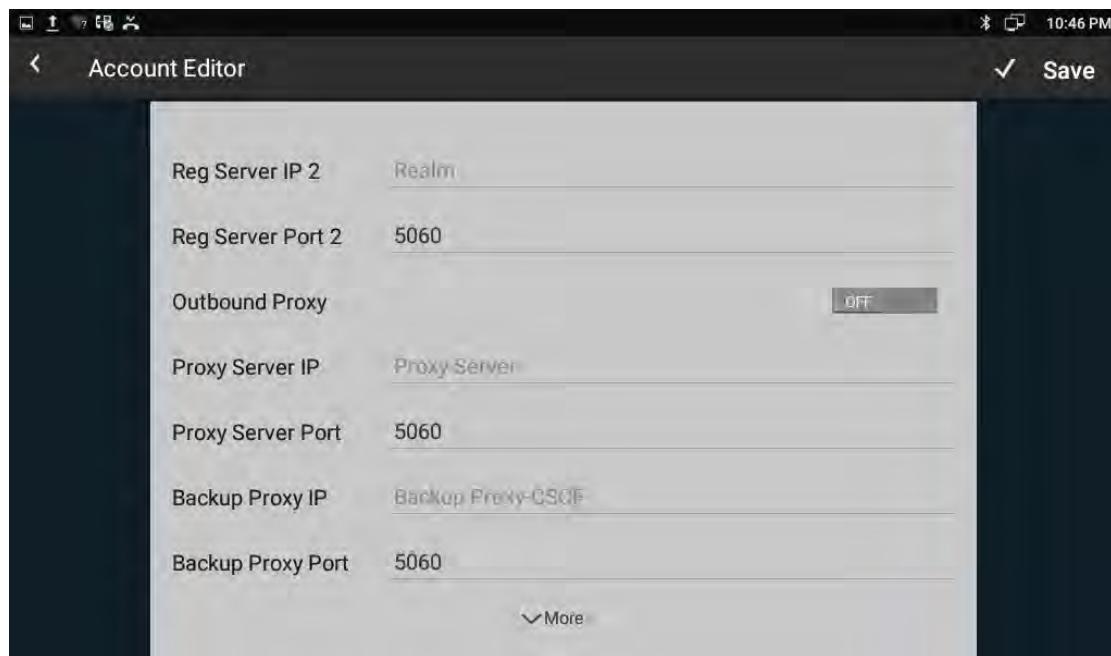

- Mode 1: In the main screen, tap icon -> click -> click Account Manager.
- Mode 2: In the main screen, tap -> click -> click ->click Account Manager.
- Mode 3: Directly pick up the handset or press Speaker button -> click ->click Account Manager.
- Mode 4: Click Browser icon , input IP address to enter login interface. Input username and password(default:admin;admin), click Login label. Go to the path: Account->Basic.

4.3.1 Add Account

Click an account to enter Account Editor interface.

Configuration parameters are described as follows:

Parameter	Specification
Register Name	SIP Account ID provided by ISP
User Name	SIP User Name provided by ISP
Password	SIP Password provided by ISP
Display Name	SIP Display name
Reg Server IP	SIP Register Server, format: domain/IP, for example: 194.168.1.2
Reg Server Port	The default port is 5060.
Proxy Server IP	SIP Proxy Server, format: domain/IP, for example: 194.168.1.2
Proxy Server Port	The default port is 5060.
Backup Proxy IP	SIP Backup Proxy Server, format: domain/IP, for example: 194.168.1.2
Backup Proxy Port	The default port is 5060.

After all the parameters are configured, Click "save" button to save the configurations, then the sip account is added successfully. Then active the account.

4.3.2 SIP Account ON/OFF

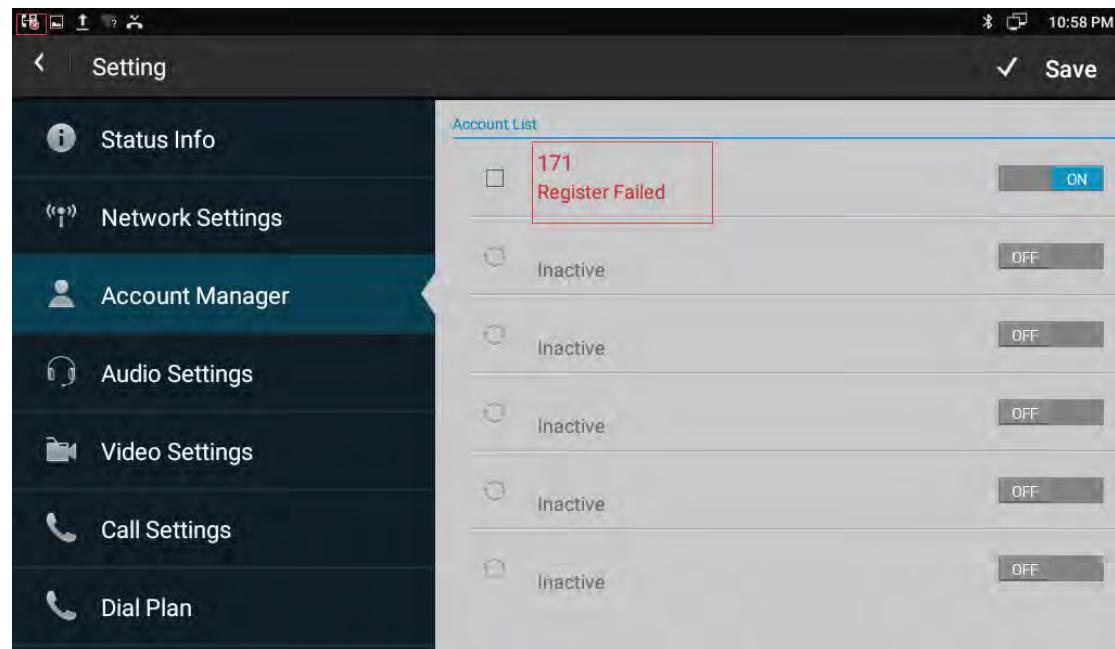

After SIP account is configured and registered successfully, it will display the prompt "Registered" in the Account Manager, and the icon  will be displayed on the status bar.

If you want to disable the registered account, tap the icon  to change the

account status, the icon  will be shown on the status bar.

If the sip account is failed to register, the failure code will be displayed under the account, and then you can check with the account configuration or network

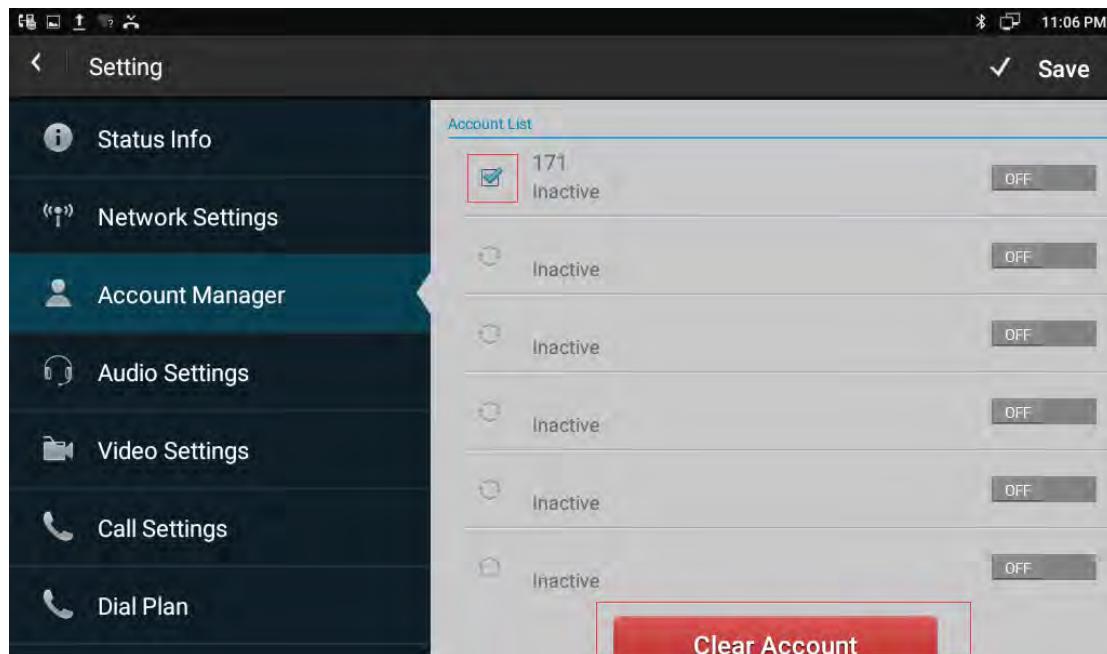

connection. The icon  will be shown on the status bar. As shown below:

4.3.3 Modify/Remove SIP Account

- 1) Modify the sip account: Directly click the account to modify.

2) Remove the sip account: Click the box of the account which you want to delete, then on the bottom of the account list will display the label “Clear Account”, tap this label to remove the selected account.

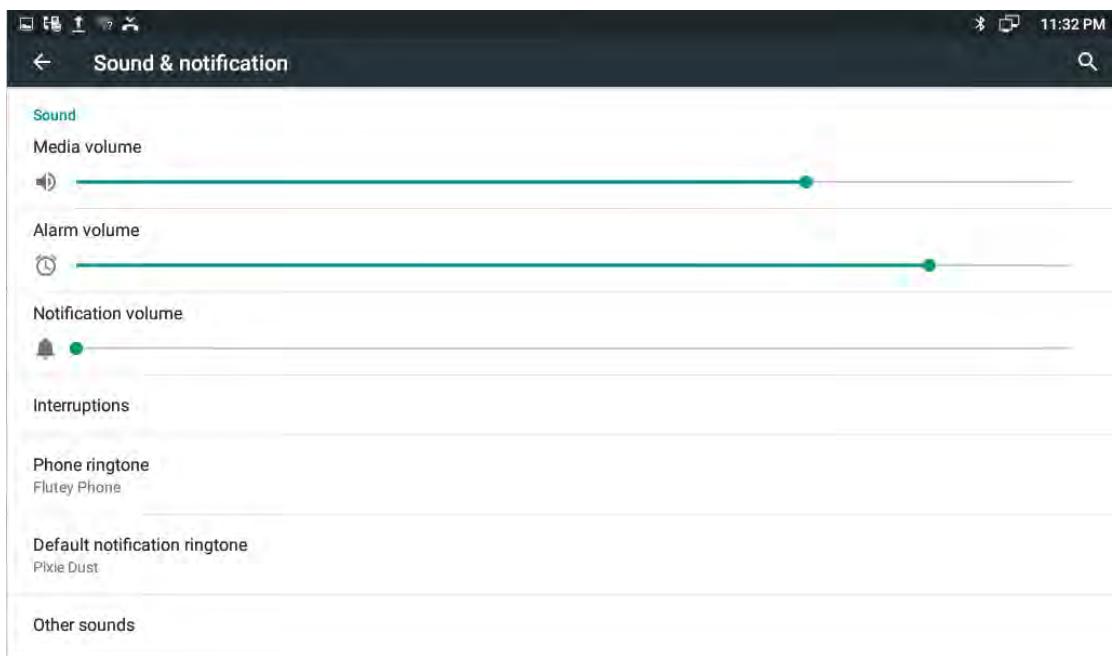

4.4 Sound & notification

You can select one of the following methods to enter the Sound configuration:

- Mode 1: In the main screen, tap shortcut icon -> Device-> Sound & notification.
- Mode 2: In the main screen, click -> Settings -> Device-> Sound & notification.
- Mode 3: Drag down the status bar, click the icon on the status bar -> tap icon ->Device-> Sound & notification.

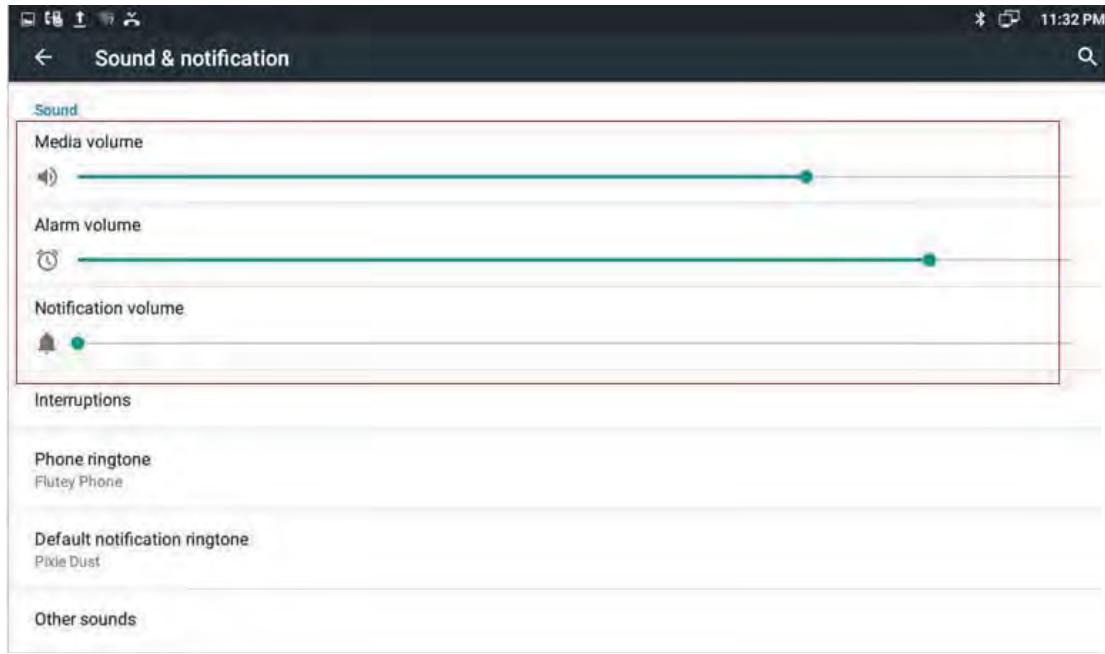

Configuration page is shown as below:

Including Volume, Ringtone and Notification.

4.4.1 Volumes

In Sound & notification page, the volume configure is shown as below:

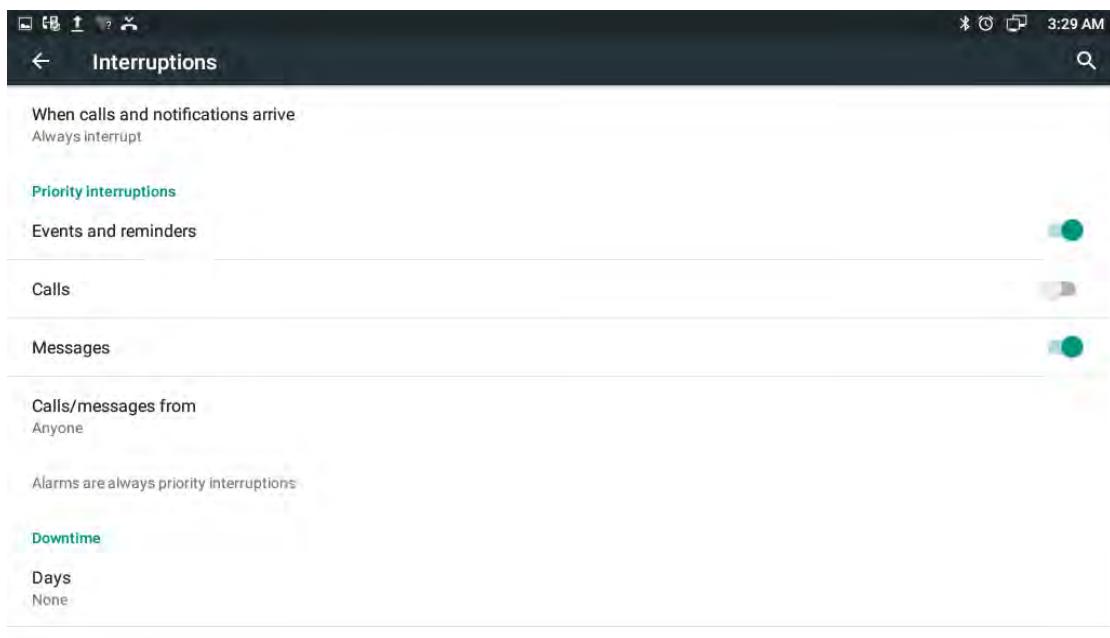

- Volume options include Media, Alarm clock, Notification.
- You can directly click a volume location to adjust the volume.
- The volume settings, you can also press the keyboard volume button "+" "-" to increase or decrease the volume. Usually, volume button is

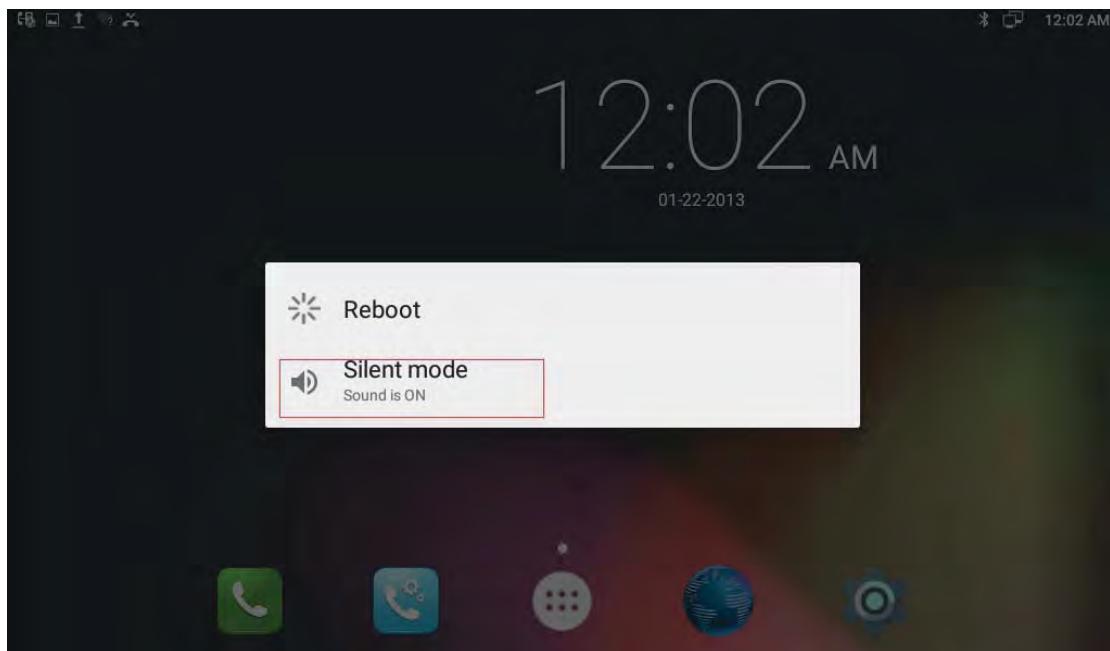

to adjust for ringtone or notification volume, but in the broadcast media, pressing volume button is to adjust for media volume.

4.4.2 Interruptions

In the Sound & notification interface, click the Interruptions bar, enter the interruptions setting interface. If the user open the Silent mode, can enter the interruption interface to set priority event or priority time allow interrupt.

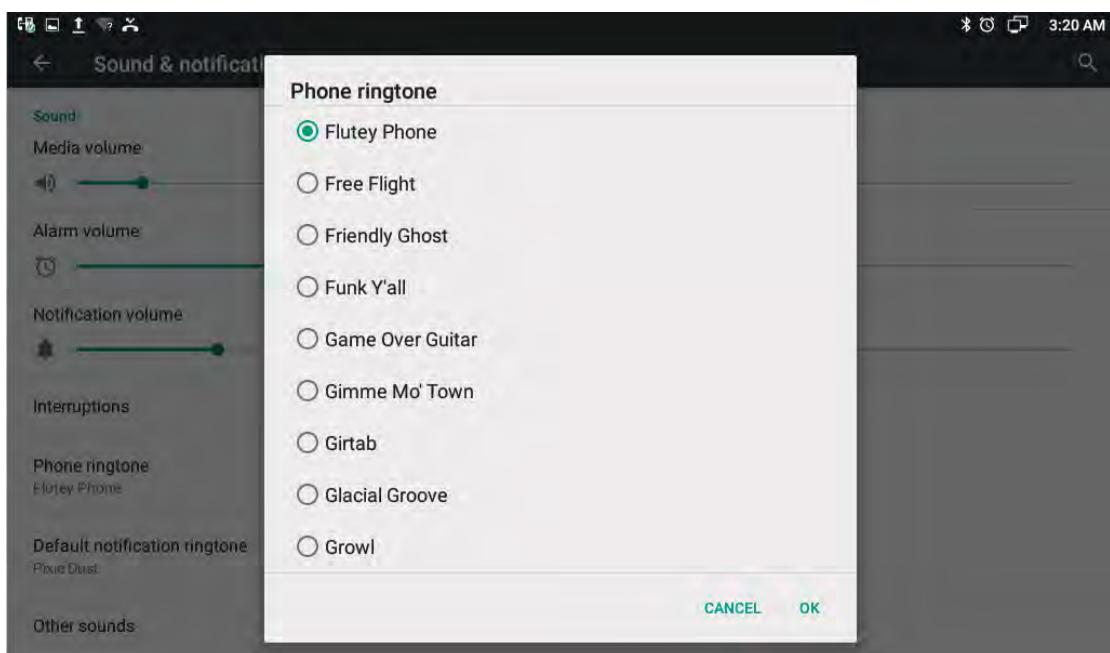

Touch and hold the Power button, tap the Silent mode bar in the pop-up menu to change the status. The silent mode icon will be displayed on the right side of the status bar. As shown in the picture below:

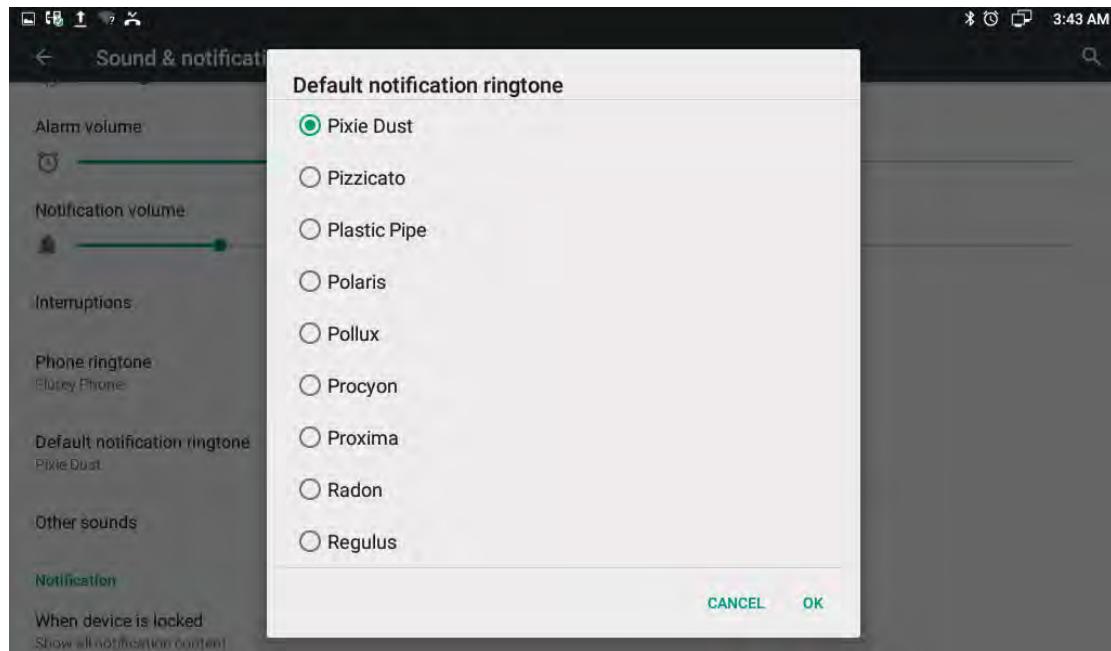

4.4.3 Phone ringtone

In the Sound & notification interface, click the Phone ringtone bar to pop up default ringtone setting interface. Click the ringtone you want to set, after the selection, it will ring a short time. Finally, click "OK". Setting interface shown as below:

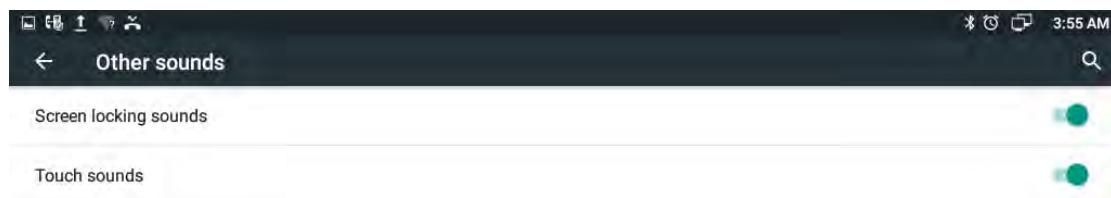

4.4.4 Default notification ringtone

In the Sound & notification interface, click the Default notification ringtone bar to pop up the phone default notification ringtone setting interface. Click the ringtone you want to set, after the selection, it will ring a short time. Finally, click "OK". Setting interface shown as below.

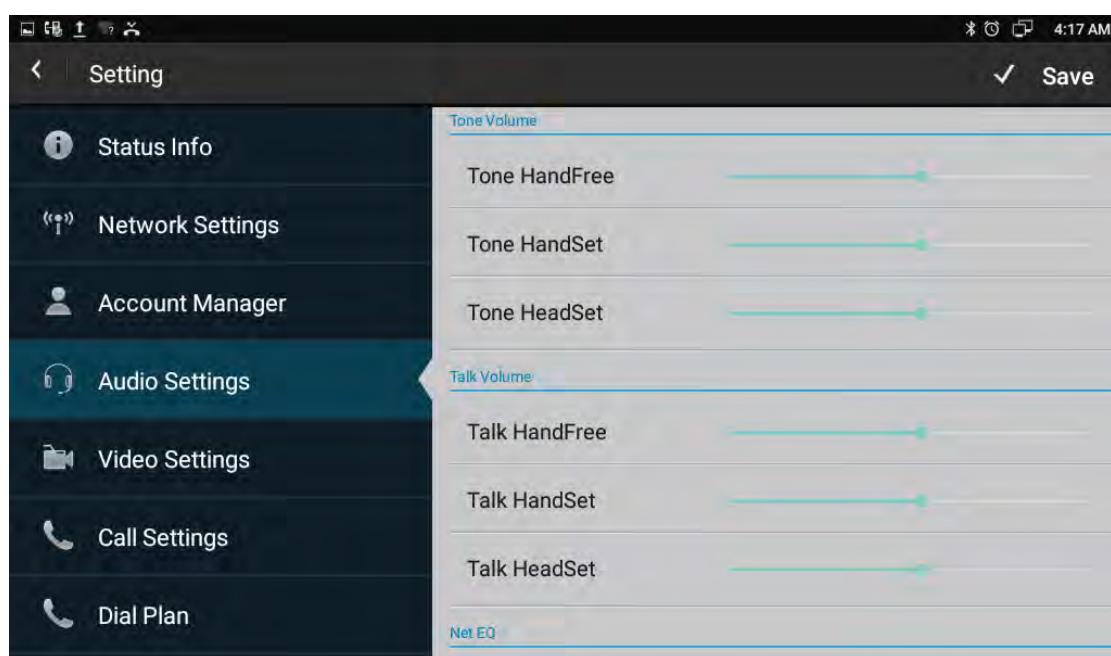

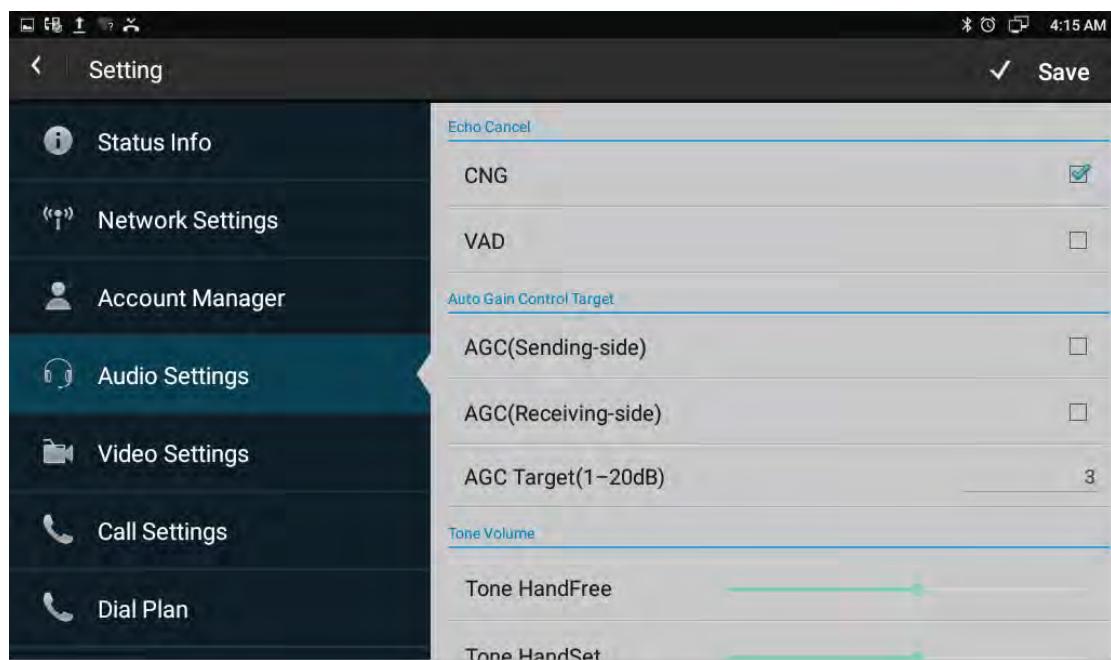

4.4.5 Other Sounds

If you want to enable Screen looking sounds and Touch sounds, please go to Other Sounds configuration page to click the correspond sound. Screen locking sounds and Touch sounds are enabled in default configuration. Shown as below.

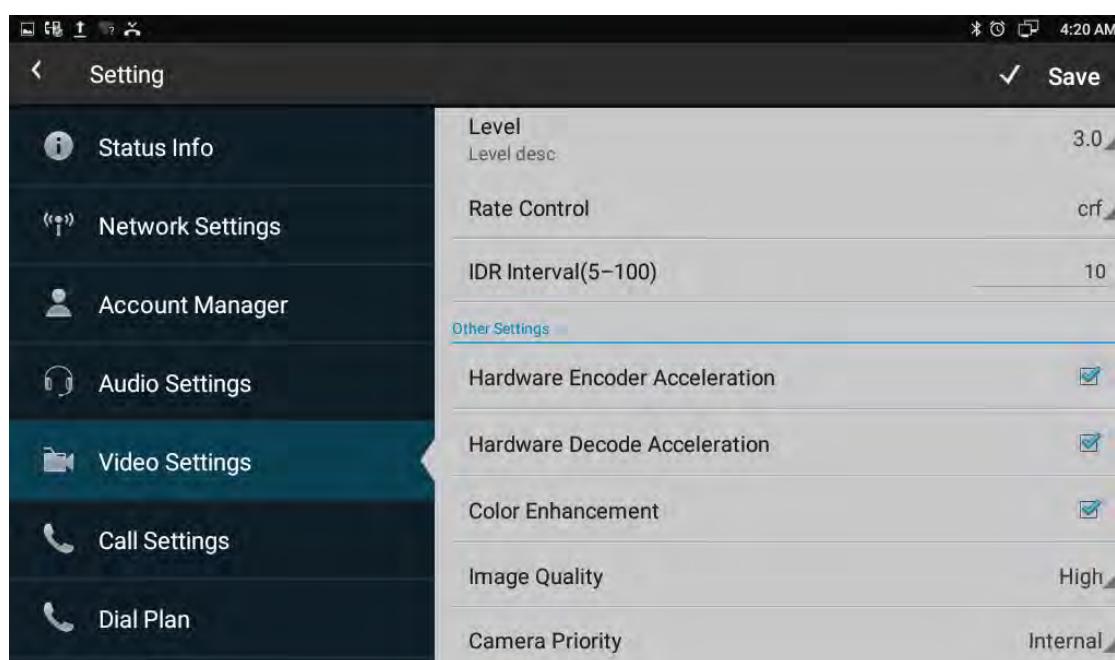

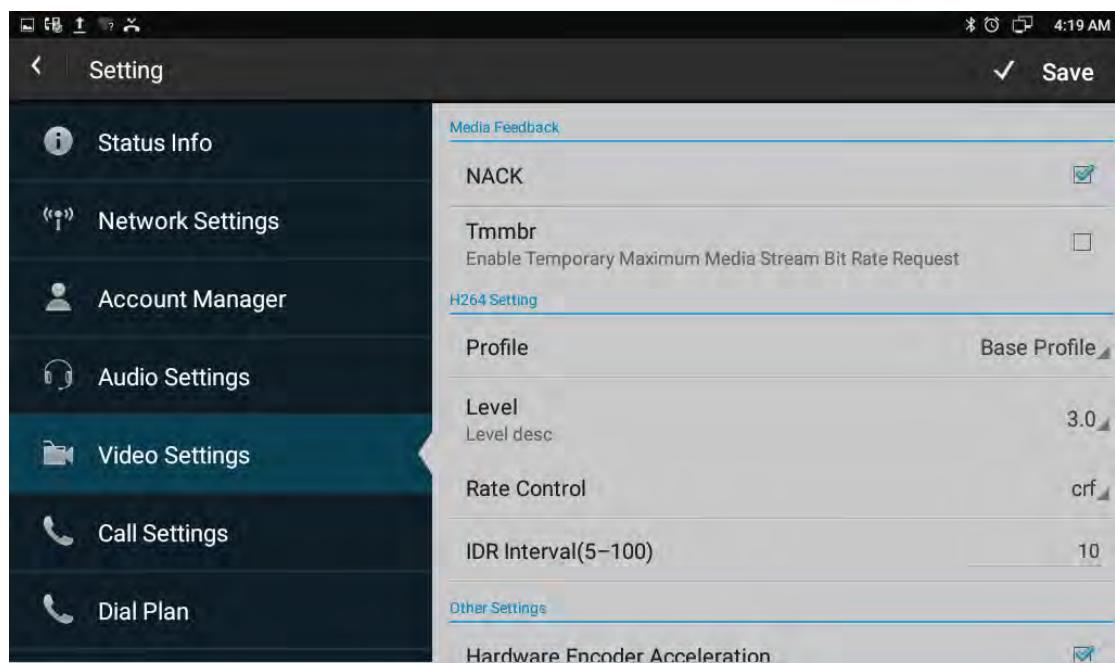

4.5 Audio Settings

To setup the corresponding audio parameters and Volume.

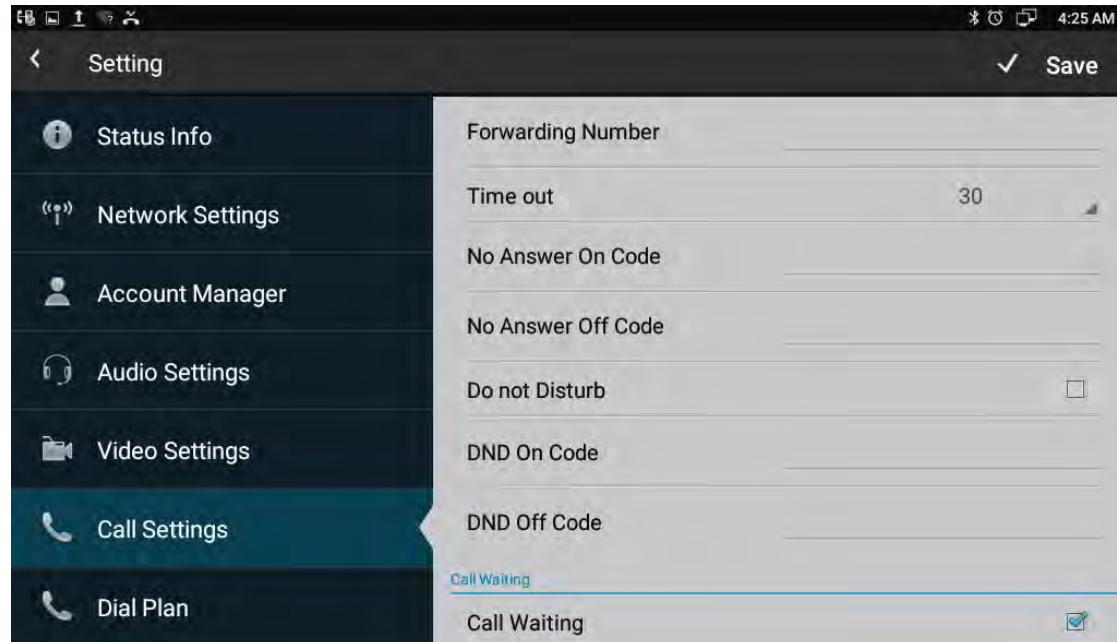

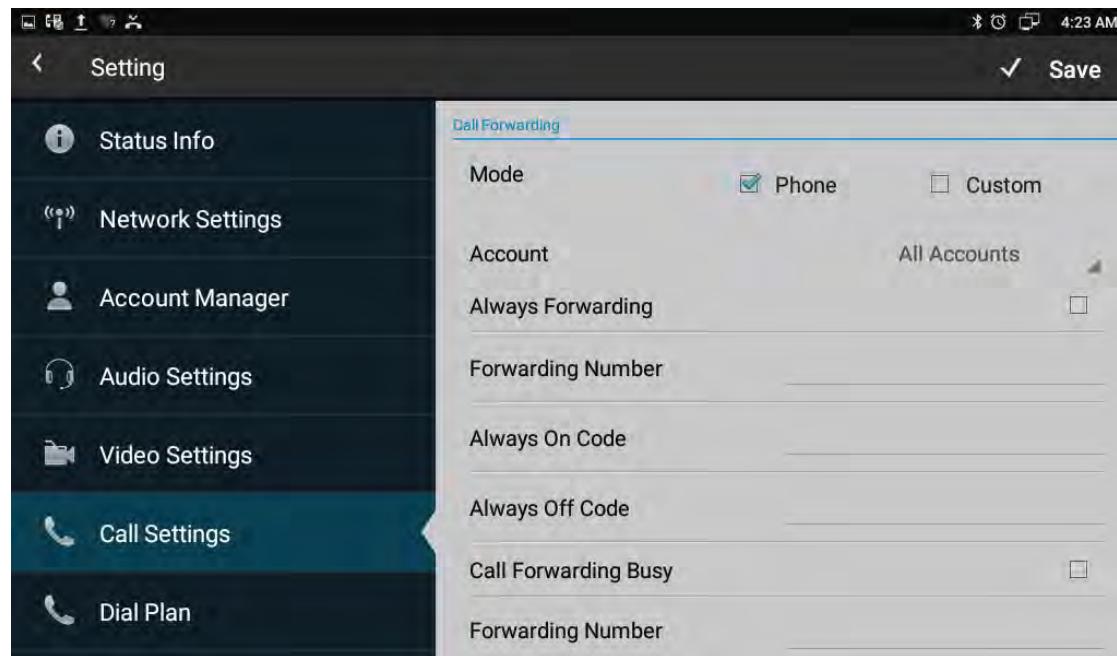

4.6 Video Settings

To configure the video corresponding parameters.

4.7 Call Settings

4.7.1 Always forwarding & Forwarding Number

All the incoming calls will be forwarded unconditionally to specified number.

Configuration on the phone:

1. Phone Settings -> Call Settings -> Call Forwarding -> Always Forwarding
2. Select the desired account on the Account bar.
3. Check to enable Always Forwarding feature.
4. Input the forward number into the Forwarding Number bar.

4.7.2 Call forwarding busy & Forwarding Number

The incoming calls will be forwarded to specified number when the phone is busy.

Configuration on the phone:

1. Phone Settings->Call Settings->Call Forwarding->Call Forwarding Busy
2. Select the desired account on the Account bar.
3. Check to enable Call Forwarding Busy feature.
4. Input the forward number into the Forwarding Number bar.

4.7.3 No Answer Forwarding & Forwarding Number

The incoming calls will be forward to the specified number when the ringtone is time out without answer.

Configuration on the phone:

1. Phone Settings->Call Settings->Call Forwarding->No Answer Forwarding
2. Select the desired account on the Account bar.
3. Check to enable No Answer Forwarding feature.
4. Input the forward number into the Forwarding Number bar.

4.7.4 Time out

Set up the no answer forwarding time. When the call is beyond the time (the default is 30 seconds) without answer ,it will forward to the target number. The range value is 0 to 120 second.

4.7.5 Do Not Disturb

DND function is to prevent foreign phone from disturbing, If open DND, external phone call is unable to call in, turned off by default.

Configuration on the phone:

1. Phone Settings-> Call Settings-> Do not Disturb
2. Select the desired account on the Account bar.
3. Check to enable Do not Disturb feature.

4.7.6 Call Waiting

If enable call waiting feature, after establishment of a conversation, there is a third party call in, then video phone will have a new call tips, the incoming call will be displayed on the conversation interface, user can choose to answer or reject the call.

If disable the call waiting feature, the third party will prompt a busy tone. Call waiting feature enable by default.

Configuration on the phone:

1. Phone Settings->Call Settings->Call Waiting
2. Enable Call Waiting feature.

4.7.7 Playtone

The caller will hear the tone when waiting. Different SIP server supports different playtone.

4.7.8 Intercom

It is used to answer the incoming call automatically after users set up the intercom function. In default situation, the phone will answer the intercom call automatically, the speaker's voice can be heard by intercom originator. User can set the phone to

enable silent mode when auto-answer the intercom call and the intercom originator will not hear speaker's voice.

4.7.9 Hotline

Enable the Hotline feature allows the phone to call out a defined number automatically, without input any number by manual in dial-up interface. Hotline Delay Time is to set the call out delay value. The range value is 0 to 5 second.

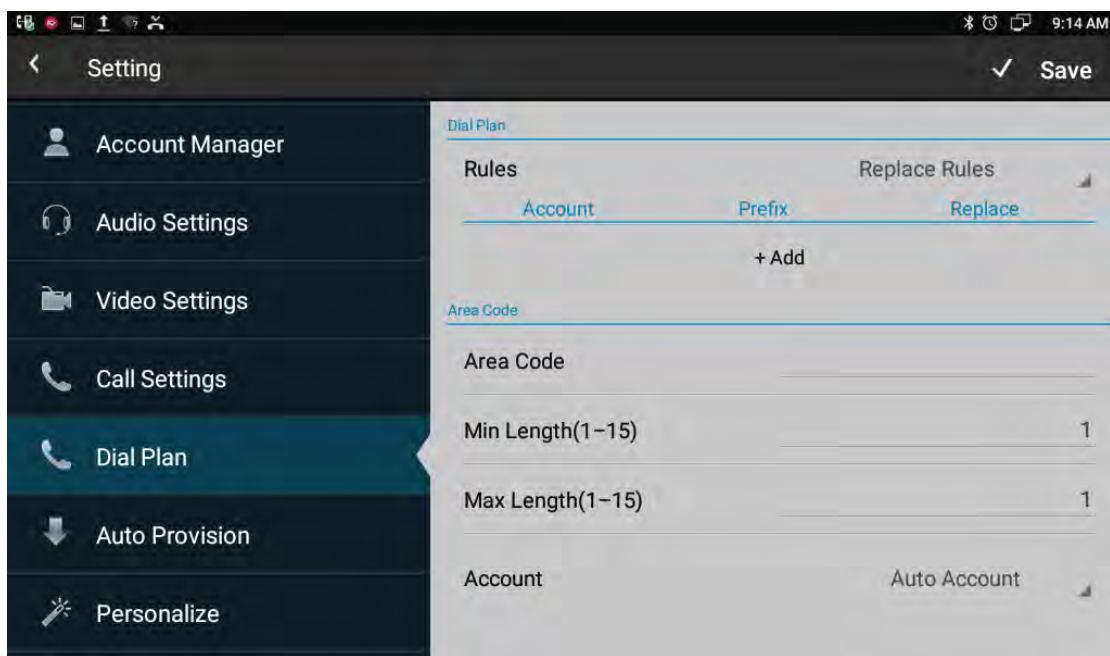

4.8 Dial Plan

Rules: Allow user to select Replace Rules or Dial Now to display or edit.

Rules Modify: Allow user to modify selected rules information, for replace rule, you can modify related accounts, prefix number and replace number.

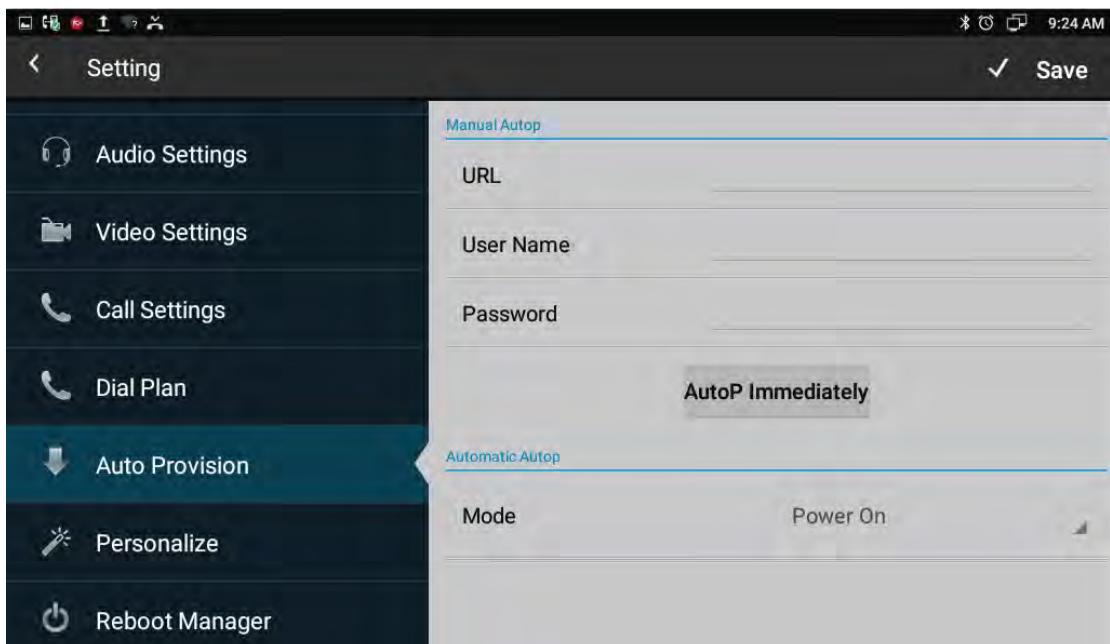

Area Code: Area codes are also known as NPAs (Numbering Plan Areas). They usually indicate different geographical areas within one country. If entered numbers match the predefined area code rule, the IP phone will automatically prefix outgoing number with area code.

Note: There is only one area code rule supported.

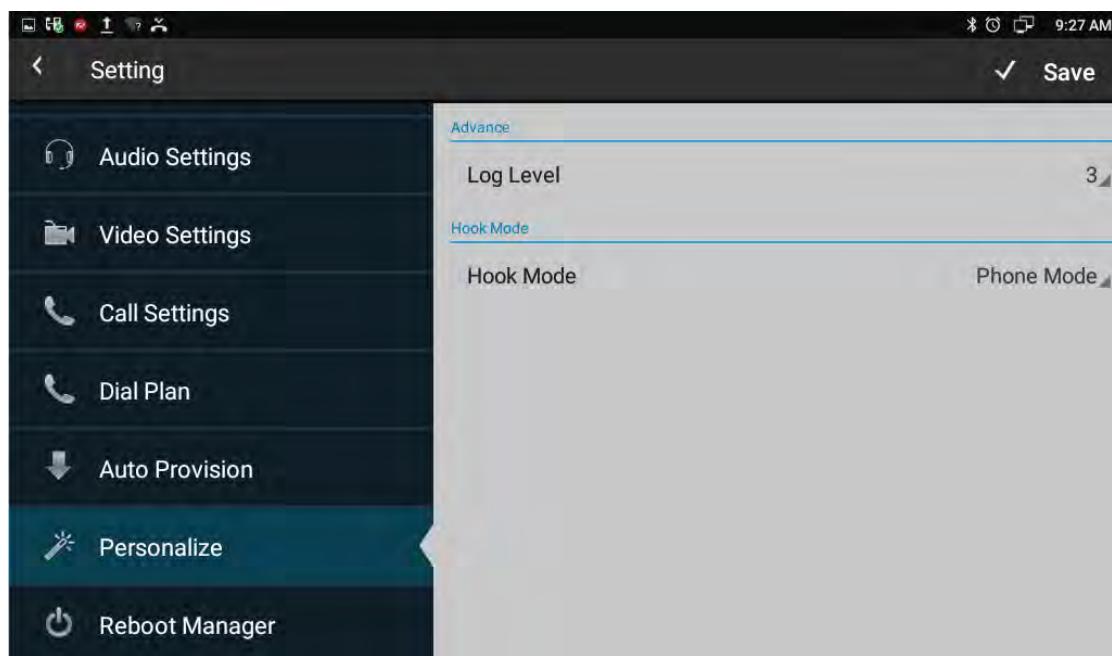

4.9 Auto Provision

Phone can be configured to resynchronize its internal configuration state to match a remote profile periodically and on power up by contacting a normal provisioning server (NPS) or an access control server (ACS).

4.10 Personalize

4.10.1 Log Level

The Log level is divided into seven levels: EMERG, ALERT, CRIT, ERR, WARNING, NOTICE, INFO, DEBUG, log class is from low to high. The default setting is EMERG, which is the lowest grade log.

4.10.2 Hook Mode

Hook Mode is divided into Phone Mode, Disable, App Mode, Auto Mode. The default mode is Phone Mode.

4.11 Reboot Manager

4.11.1 Reboot time

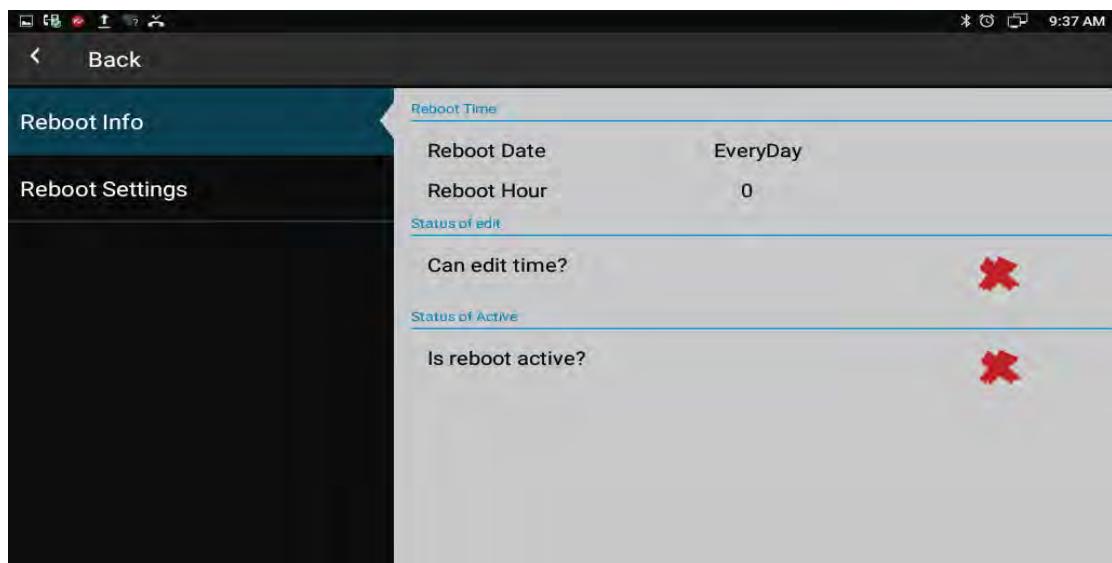

User can setup the reboot date and hour you want .

4.11.2 Status of time

If the status is enable ,users can edit the reboot time you want.

4.11.3 Status of active

Enable/disable the reboot function

4.11.4 Reboot settings

Set the reboot time. Disable this feature by default.

4.12 Date & Time

5.16 Bluetooth

Bluetooth is a proprietary, open wireless technology standard for exchanging data over short distances from fixed and mobile devices, creating personal area networks with high levels of security. On VP-R48G, users could use Bluetooth to transfer files, share contact information with other Bluetooth portable devices by installing Bluetooth Application, or use Bluetooth headset for making calls.

To connect to a Bluetooth device, turn on VP-R48G's Bluetooth radio first. The first time when using a new Bluetooth device with the VP-R48G, "pair" the device with VP-R48G so that both devices know how to connect securely to each other. After that, users could simply connect to a paired device. Turn off Bluetooth if it's not used.

Bluetooth related settings are under VP-R48G's Settings application → Wireless & networks.

5.16.1 Turning Bluetooth On /Off

- Press on screen  -> click icon .
- Click on Wireless & Networks.
- Click or untick the option for Bluetooth.

5.16.2 Changing Bluetooth Device Name

The VP-R48G uses “VP-R48G” as Bluetooth device name by default. The device name will be visible to other devices when connecting them. Follow the steps below to change the name:

- Press on screen  -> click icon .
- Click on Wireless & Networks.
- Click on Bluetooth.
- Click on Bluetooth settings icon , pop up a drag-down box select Rename this device to enter a new name. Once done, click RENAME label to save.

5.16.3 Paring VP-R48G With A Bluetooth Device

Before connecting VP-R48G with other Bluetooth device, users must pair them first. They will stay paired afterwards unless they are unpaired.

- Press on screen  -> click icon .
- Click on Wireless & Networks.
- Click on Bluetooth.
- Open the Bluethooth. The VP-R48G scans and displays the IDs of all available Bluetooth devices in range. If the device user would like to pair with does not show up in the list, ensure that the other device is turned on and set to be discoverable.

- If the VP-R48G stops scanning before the other device is ready, turn off the R48G Bluetooth, then turn on again.
- The discovered device will show in the available devices list with device ID. Make sure the Bluetooth device is active in pairing mode. Then tap on the device ID on the VP-R48G to pair them. Confirm the passkey in the prompted message (if any). Or if PIN is required, please refer to the device's documentation or other procedures to obtain the PIN.

5.16.4 Un-pairing A Bluetooth Device

After successfully paired, the VP-R48G will show in Paired devices bar with paired device name.

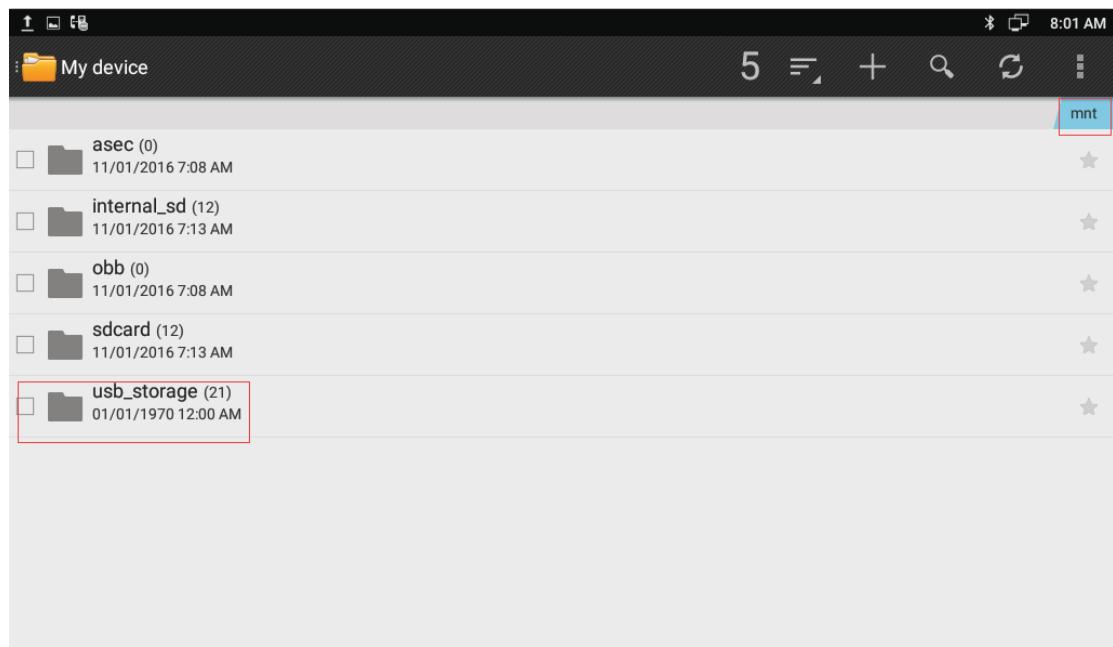

Once it's connected, users can tap icon  ,then click FORGET to unpair the connected device.

5.17 USB

The video phone supports USB connection for keyboard and USB storage devices. To use USB keyboard, simply plug it into the USB port on the right side of the video phone and it will be ready to use.

To connect and access USB storage device:

Change the name of upgrade package into upgrade.zip, then copy it into USB, insert USB, enter the upgrade interface, user will find the path of upgrade package, because video phone has searched it automatically, click “Local Update” to start upgrading.

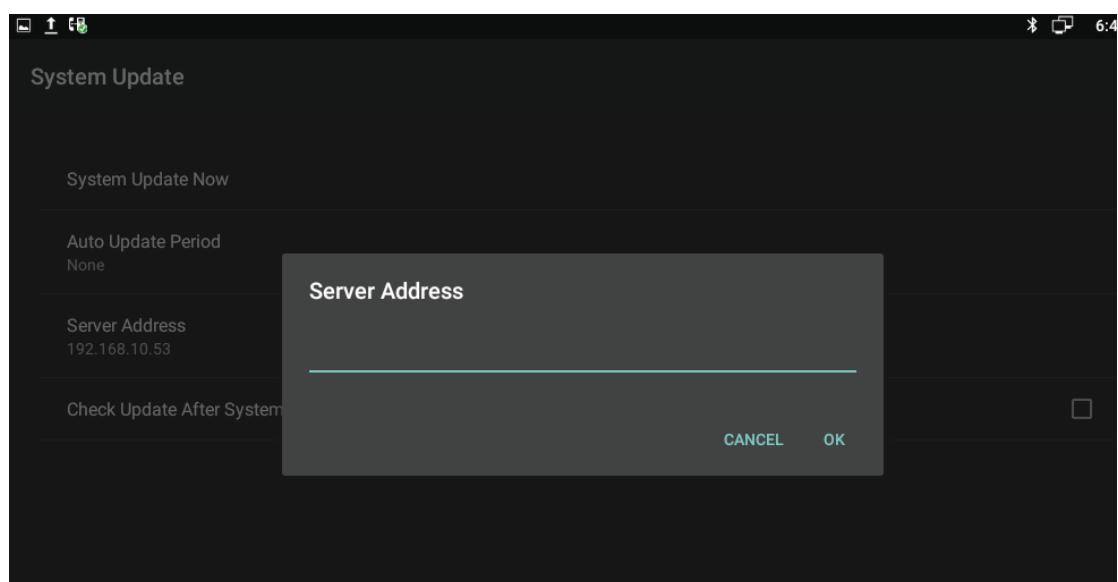

2) Via built-in SD Card to upgrade

First, change the name of upgrade package into upgrade.zip, then copy it into USB,

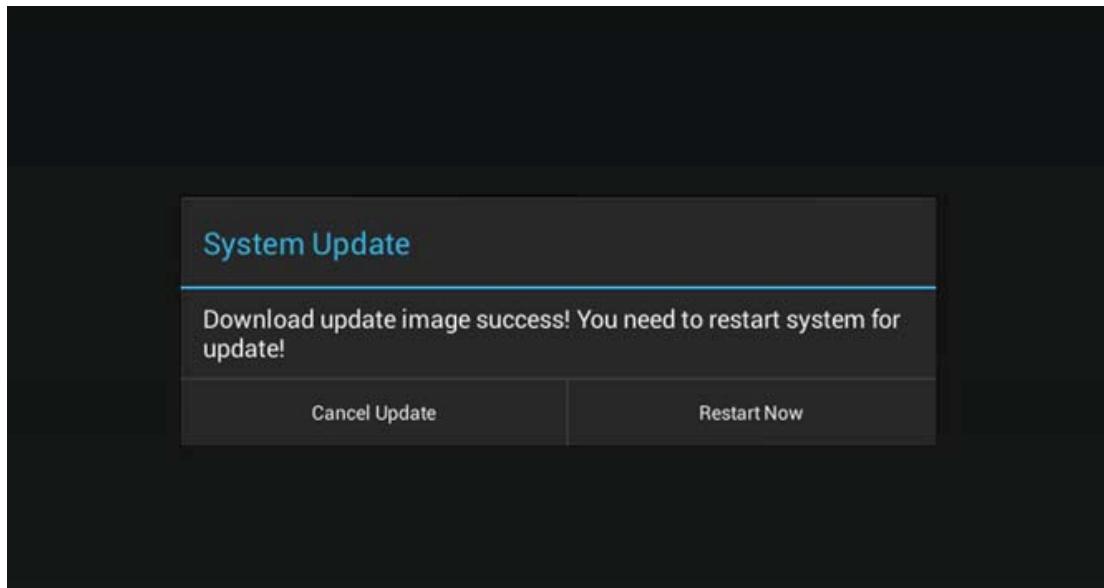

and then use USB to copy the upgrade package into Internal Memory, enter the upgrade interface, you will find the path of upgrade package:/mut/sdcard/upgrade.zip, because video phone has searched it automatically, press “Local Update” to start upgrading.

6.1.3 Remote Update

- 1) Enter the interface in figure 5-1, click “Server Address”, and input the server address that contains upgrade package. As shown below:

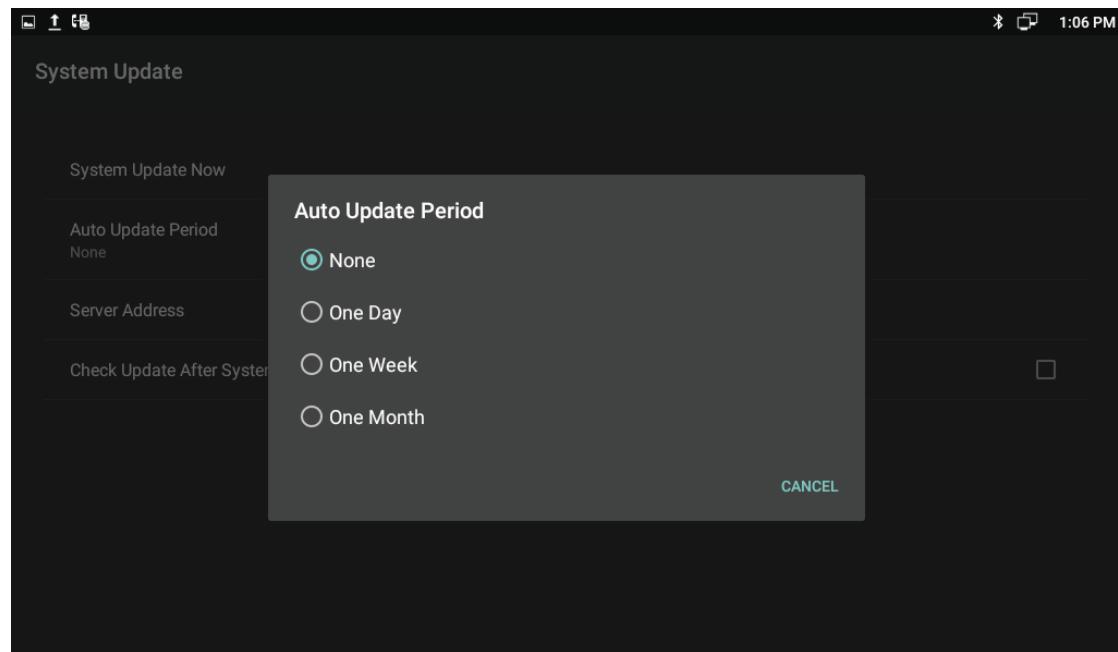

- 2) Click “Remote Upgrade”, video phone will check the new version automatically. If exist a new version, it will prompt. Press “OK” to download upgrade document.
- 3) After finish downloading, it prompts “Download update image success! You need to restart system for update! ”, press reboot now, and then system will upgrade automatically. As shown below:

6.2 Auto Update Period

Auto Update Period includes four modes: None, One Day, One Week, and One Month. The terminal will detect the new version automatically in time, if there is, the status bar will show “There is a new version, please update!”. Click and download the image for upgrade.

As shown below:

6.3 Upgrade on the web

- 1) Click Upgrade->Basic.
- 2) Click the label to select the version to upgrade.
- 3) Click to save.

Upgrade-Basic

Firmware Version	48.0.1.45
Hardware Version	1.0
Upgrade	<input type="button" value="Browse..."/>
	<input type="button" value="Submit"/> <input type="button" value="Cancel"/>
Reset To Factory Setting	<input type="button" value="Submit"/>
Reset Config To Factory Setting	<input type="button" value="Submit"/>
Reboot	<input type="button" value="Submit"/>

6.4 Check Update After System Power On

Click “Check Update After System Power On” . Shown as below.

System Update

System Update Now	
Auto Update Period	None
Server Address	
Check Update After System Power On	<input type="checkbox"/>

Every time user power on, the system will check the new version automatically. If there is a new one, the status bar will notice: "System has new version, please update now!", click and download the image for upgrade.

7 System Maintenance

7.1 System State Inspection

Mode 1: In the main screen, click -> Status info->Version info

Mode 2: In the main screen, click -> -> About device

It will display phone status, software version and hardware version in this item.

7.2 IP Query

Mode 1: In the main screen, press, click -> Status info-> Network Status

Mode 2: In the main screen, click -> ->More-> Ethernet

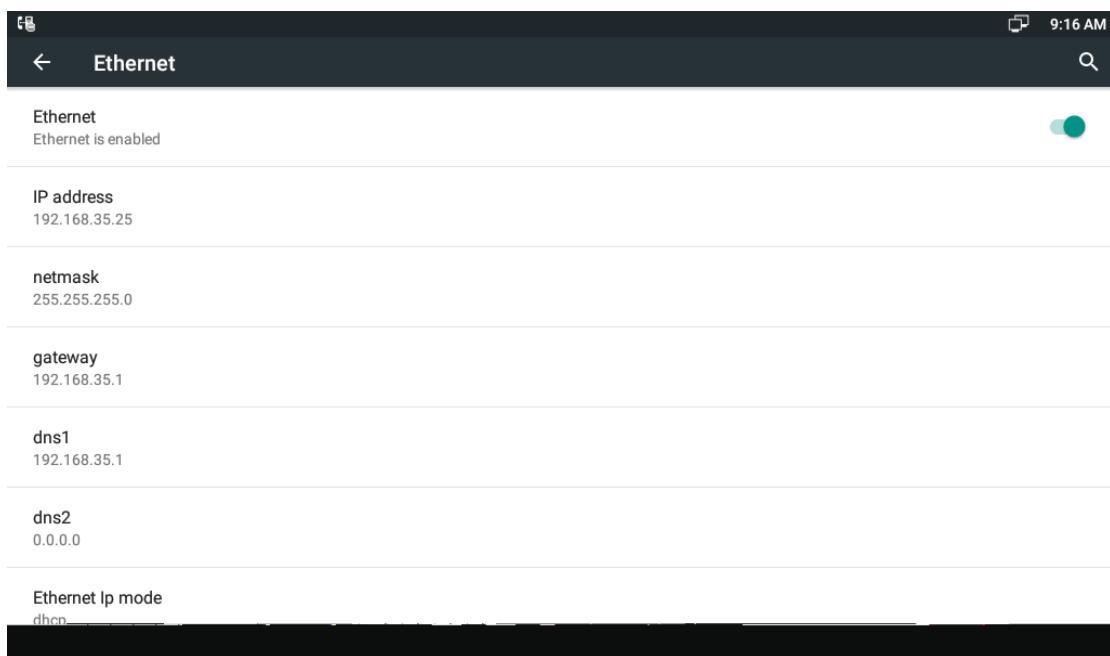

Mode 3: Press Speaker button or pick up to enter the dialing interface, click on upper right corner -> enter the setting interface, check Status Info;

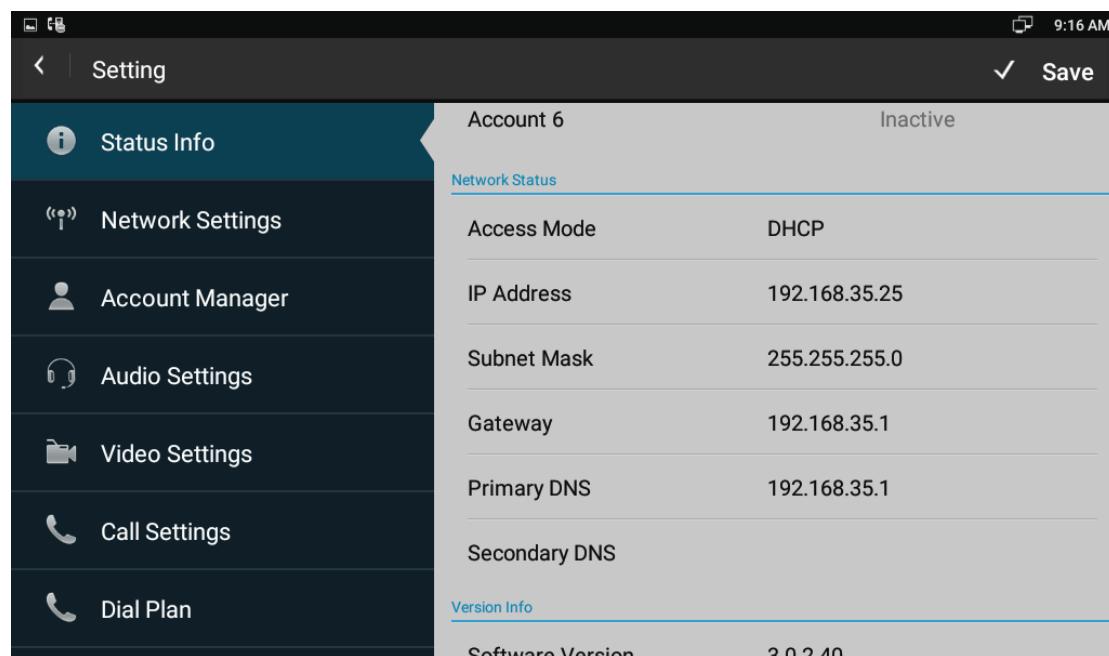

Mode 4: Slide down the top-left , click the account, enter the setting interface, check Status Info;

Mode 1 and Mode 2 can check IP address, subnet mask, gateway, DNS server etc. in Ethernet.

Mode 3 and Mode 4 can check the corresponding network information in setting interface.

7.3 SIP Account Registration Query

You can choose one of the following methods to enter the SIP account registration query. If the account is successfully registered, the icon will be light up in notification area of phone.

Mode 1: Press Speaker button or pick up to enter the dialing interface, click  on upper right corner, check Account Manager.

Mode 2: Slide down the top-left  , click the account, enter the setup interface, check Account Manager.

7.4 Backup & Reset

Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Backup & reset

Mode 2: In the main screen, click  ->  -> Backup & reset

This will erase all data from your device's **internal storage**, including:

- Your Google account
- System and app data and settings
- Downloaded apps

To clear music, pictures, and other user data, the **SD card** needs to be erased.

Erase SD card
Erase all the data on the SD card, such as music or photos

RESET DEVICE

Select “Erase SD card”, click “RESET DEVICE”, then the phone will restore to factory settings.

7.5 Failure Process

Failure 1: Power LED is off

- Please check whether the adapter fits this product requirement;
- Please check whether the outlet is working properly.

Failure 2: No voice when pick up the handset

- Please check whether the connection of handset is working properly;
- Please adjust the volume + key on keyboard when off-hook the phone, Observe the display of “volume” prompt. Please pay attention that the volume key in on-hook and off-hook situation is to adjust the ring volume and media volume (call volume) separately. These two adjustments are unrelated. Adjust the volume won’t change call volume when on-hook the phone.

Failure 3: Phone can’t dial properly

- Please check whether there is  at the top-right of screen. If not, please check whether the cable in LAN port is loose;
- Please check the IP address of phone via configuration (go to 4.2, “network configuration”);
- If it’s now in LAN, please check whether the IP address of phone is conflict with other devices in the same LAN.
- If the network connection is properly, please check whether the icon  of successful registration is in the notification area. If there is no explanation of configuration failure, please contact network administrator to recover it.

Failure 4: No ringing when incoming a call

- Please make sure the handset is completely hung on the base
- Please adjust the volume + key on keyboard when on-hook the phone, Observe the display of “volume” prompt. Please pay attention that the volume key in on-hook and off-hook situation is to adjust the ring volume and media volume (call volume) separately. These two adjustments are unrelated. Adjust the volume won’t change ring volume when off-hook the phone.

8 Web Interface

8.1 Web login

1. Open the browser on the computer.
2. Input the IP address in the address bar.
3. Enter the user name and password (user name: admin, password: admin), then click .

8.2 Status->Basic

Click Status->Basic to check the phone information.

Sections	Description
Key As Send	Key As Send allows you to disable send key or assign pound key as send key.
SIP Config	Setup the SIP protocol package interval. T2 is maximum. The interval should be larger the T1, but less then T2.
UACSTA	Using CSTA for SIP phone user agents. It can control some features of calling. UACSTA is used to send ECMA-323(CSTA XML) information during SIP calling. The default status is disabled.

Door Phone	When there is an incoming call from doorphone, setup the delay auto answer time, R48G will auto answer the call after the timeout. Note: if you enable Auto Answer function, this feature will be not available.
Others	<ul style="list-style-type: none"> ● Return Code When Refuse: Allows user to assign specific code as return code to SIP server when an incoming call is rejected. ● Auto Answer Delay: To configure delay time before an incoming call is automatically answered.

Filter forgetting factor base	<input style="border: 1px solid #ccc; padding: 2px 10px;" type="button" value="250"/> (0~255)
-------------------------------	---

Sections	Description
Echo Canceller	<p>Echo Canceller: To remove acoustic echo from a voice communication in order to improve the voice quality .</p> <ul style="list-style-type: none"> ● VAD(Voice Activity Detection): Allow IP phone to detect the presence or absence of human speech during a call. When detecting period of “silence”, VAD replaces that

	<p>silence efficiently with special packets that indicate silence is occurring. It can facilitate speech processing, and deactivate some processes during non-speech section of an audio session. It can avoid unnecessary coding or transmission of silence packets in VoIP applications, saving on computation and network bandwidth.</p> <ul style="list-style-type: none"> ● CNG(Comfort Noise Generation): Allow IP phone to generate comfortable background noise for voice communications during periods of silence in a conversation. It is a part of the silence suppression or VAD handling for VoIP technology. CNG, in conjunction with VAD algorithms, quickly responds when periods of silence occur and inserts artificial noise until voice activity resumes. The insertion of artificial noise gives the illusion of a constant transmission stream, so that background sound is consistent throughout the call and the listener does not think the line has released.
Mic Volume	To configure Microphone volume for handset mode.
Automatical Generation Control	<p>R48G will auto adjust amplification circuit gain via signal.</p> <ul style="list-style-type: none"> ● Automatic Gain Control(Sending-side): Disabled by default ● Automatic Gain Control(Receiving-side): Disabled by default ● Automatic Gain Control Target: Range from 1 to 20 dB. 3dB by default.
NetEQ	Filter forgetting factor base: Range from 0~255. 250 by default.
