In case long-distance use, please use in the absence of barrier to avoid jitters caused sound quality loss.

Please properly classify waste packaging and batteries and old electronic products,

If it stays idle for a long time, please store it in shady and dry environment.

Product maintenance

The product body is spliced by two kinds of woods. Before processing, the wood materials are to go through special steam drying and airing to remove excess water, so as to achieve basic stability. As those woods are solid ones, they will, to some degree, subject to the impact of environmental change. The Speaker are thus recommended to be kept in the condition in which room temperature maintained at 20 degrees 30

degrees, relative humidity maintained at between 40% - 50%, to ensure a good state of the speakers. Too dry, too wet or temperature largely changed environment is to impact wood stability, lead to cracking and deformation.
