

ci5000 Series Printers RF Circuit/Performance

The ci5000 Series Printers contains identical electronics for all four models, ci5200, ci5300, ci5500, and ci5650. The RF circuit / performance are identical.

The differences between the models are in chassis and cooling. The ci5650 contains a positive air cooling system while ci5200, ci5300 and ci5500 contain air filter. The ci5200 has a Powder Coat Steel chassis while the ci5300, ci5500 and ci5650 have Stainless Steel chassis

All models have the same Bill of Materials (BOM) on electronics.

A handwritten signature in black ink, appearing to read "Michael Embree".
