Android

2. Getting started

2.1 Charging

Please fully charge the battery before power on the gimbal for the first time. Charging with USB-C cable, supports quick charge.

2.2 Adjust the gimbal to gimbal balancing position

The gimbal is folded by default, please unlock all the three axes and adjust the gimbal to gimbal balancing position, and then lock the three axes.

Gimbal folded position

Gimbal balancing position

3. Mounting the Smartphone

Make sure you have completed all the steps which mentioned in “chapter 2. Getting started” and the gimbal is adjusted to **gimbal balancing position**. It is recommended to remove the smartphone case before mounting the smartphone.

Take horizontal mounting as an example:

- (1) Power off the gimbal or enter sleep mode first, then rotate the smartphone holder to make it vertical to prepare for landscape shooting.
- (2) Extend the smartphone holder, and put your smartphone in, keep the smartphone holder in center.

Note: before switching the mounting direction, the gimbal required to be off or in sleep mode.

EN

4. Gimbal Balancing

Please balance the gimbal before powering it on. Before balance the gimbal, please power off it or enter sleep mode.

Tutorial Videos

- (1) Unlock the three axis locks ❶, observe the tilt direction of the mobile phone.
- (2) If the phone is tilted to one end, it means that the center of gravity is toward this end, and the fixing knob needs to be loosened ❷, and then move the cross arm in the opposite direction ❸, until the cross arm maintains a horizontal balance.
- (3) tighten the fixing knob ❷.

5. Operation

5.1 Power ON/ OFF

Before power on the gimbal, make sure you have balanced gimbal, and unlocked all the three axes. If you haven't unlocked all the 3 axes, gimbal will enter sleep mode to protect itself. Please single tap power button to wake up gimbal after unlocked all the 3 axes.

Long press the power button and release it when you hear the beep sound to power on/ off.

5.2 Follow mode introduction

PF: Pan follow, only the pan axis follows the movement of user's hand.

PTF: Pan and tilt follow, where both the pan and tilt axes follow the movement of user's hand, but roll axis does not.

FPV: Pan, tilt and roll follow, where all 3 axes follow the movement of user's hand.

Lock: All 3 axes do not follow the movement of user's hand, gimbal keeps the direction of the camera fixed.

FFW: Flash follow, where all 3 axes follow the movement of user's hand in high follow speed.

5.3 Button operation

Power button

Long press: Power on/off
Single tap: Wake up
Double tap: Enter sleep mode

Trigger button

Single tap: face tracking
Double tap: Recenter
Triple tap: Enter/Exit selfie mode (Pan axis turn 180°)
Press and hold: PTF (Release to exit)
 You can custom the function via APP

Shutter button

Press half way: Focus
Single tap (Fully): Start/Stop recording
Long press (Fully): Take photo
 Need to connect with smartphone.

L button

Single tap: Turn left continuously
Single tap again: Switch rotating speed (Switch cyclically among Slow/Med/Fast orderly, the preset speed is Med)

Active in auto rotation mode

Mode button

Single tap: Switch among PF/PTF (Default)/FPV mode (Switch in turn)
Tap five times: Horizon calibration (Single tap to wake up after calibration completed)

○	Light is off

6. Specifications

Product name	Feiyu SCORP-Mini P 3-Axis Handheld Gimbal for Smartphone
Product model	FeiyuMP01
Max. Tilt Range	+143° ~-147° (±3°)
Max. Roll Range	+90.4° ~-199.7° (±3°)
Max. Pan Range	360°
Weight	About 683g (not including tripod)
Payload Capability	About 520g (Well-balanced)
Battery life	About 11 Hours (Well-balanced)
Charging time	About 1.5 Hours (18W quick charge)
Battery	2200mAh
Operating Voltage	6.8V-8.4V
Compatible smartphones	iPhone and Android phones (the width of the phone 55~ 88mm)

FCC regulatory conformance:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

RF Exposure

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
