MAIN BOARD REAR VIEW

A photograph of the RF chip and PCB antenna assembly. The assembly is mounted on a blue printed circuit board (PCB). A ruler is placed horizontally below the PCB for scale, showing markings from 0 to 70 mm. Two red boxes with arrows point to specific components: one box labeled "RF Chip" points to a small, square, dark component, and another box labeled "PCB Antenna" points to a larger, rectangular area on the PCB. The PCB also features a circular component on the left and some text markings, including "LQ 1936".
