

Smart Remote

Step 2 Power on the Smart Remote

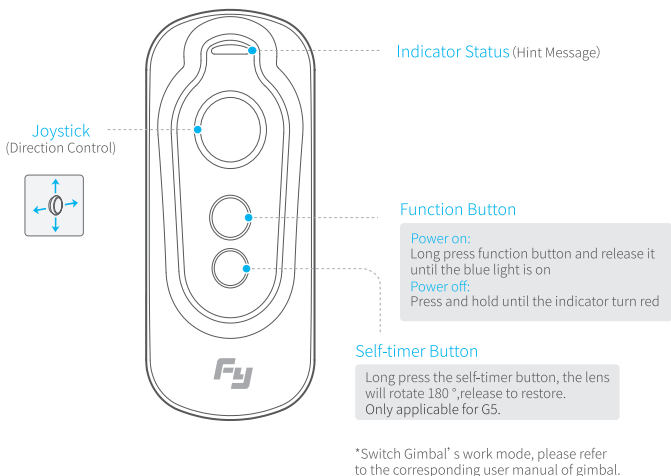

Push the joystick up and hold, then press and hold the function button. The indicator on smart remote light blue and then turn to green, means smart remote is paired with the gimbal.

*If the smart remote has paired with gimbal, press and hold the function button, the smart remote will connect with the paired gimbal automatically.

Smart Remote

Smart Remote can control the gimbal to switch work mode and the direction of lens.

Step 3 Connection status

Charging

Indicator
Charging — Red light
Finish — Green light
*The indicator will flashing red light if low battery.

If connected, the blue light and green light will flash alternately
If you need to connect to another gimbal, please repeat the above steps

Connect Smart Remote with gimbal for the first time

Step 1 Power on the gimbal you want to connect (take G5 as an example)

Press and hold the function button, if the indicator lights red and then turn to green, this means gimbal is working normally.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
