Slow breathing at red light	Wi-Fi abnormality

**Network Configuration for Smart Speaker**

- Scan the QR code below or on the outer packaging with your phone to download and install the [Smart Life] App.
- Connect the smart speaker to power using the power adapter and wait for the device to boot up.
- After the smart speaker is powered on, follow the prompts from both the speaker and the App to connect the device to Wi-Fi.

**Note:** This speaker is only compatible with 2.4G frequency band Wi-Fi networks.

Smart Life App

**Waking Up the Smart Speaker**

After successful network configuration, you can wake up the voice gateway by saying "hey tuya" followed by your command.

**Examples:**

- "hey tuya, tell the baby a story"
- "hey tuya, what's the weather like today"
- "hey tuya, set an alarm for 7 a.m. tomorrow"
- "hey tuya, turn on the bedroom light"
- "hey tuya, set the air conditioner temperature to 26°C"
- "hey tuya, turn down the TV volume"

**Note:** The smart speaker currently only supports English. If the voice gateway does not respond to your command, please check that the Wi-Fi network is stable and confirm that the microphone is not disabled.

**Feature Introduction**

**Infrared Remote Control**

Equipped with a built-in infrared emission array, the speaker allows voice control of ordinary household appliances (with infrared functionality). It currently supports voice control for TVs, set-top boxes, air conditioners, fans, and other appliances, including functions like turning TVs on/off, adjusting air conditioner temperature, and controlling fan speed.

**Convenient Far-Field Voice Interaction**

Featuring a professional microphone array, the speaker effectively filters ambient noise, enabling more accurate voice recognition over longer distances.

**Friendly Reminder**

If consumers use a power adapter to supply power, they should purchase a certified power adapter that meets standard requirements and is suitable for use with the device.

**FCC Radiation Exposure Statement:**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

**FCC Warning**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**NOTE 2:** Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
