

# Smart Golf User Guide

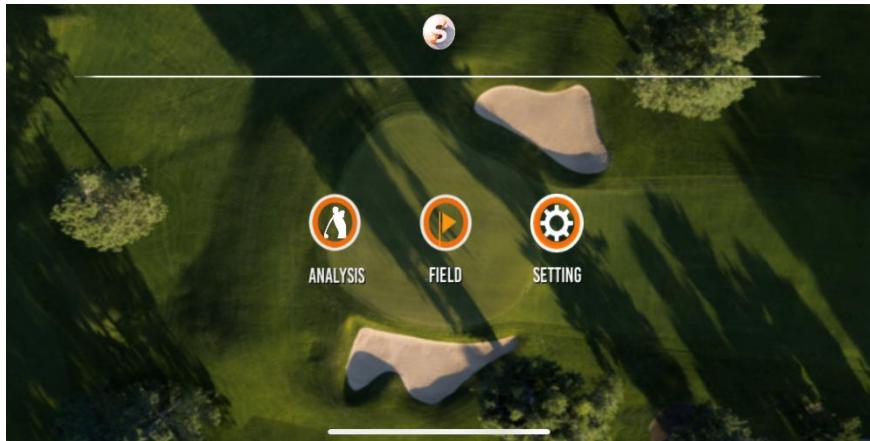

Click the attachment in the mail to download it.

When the app is normally installed on the device, it opens the app.

The SMARTGOLF logo appears and the app is launched.

Click the SETTING button on the main screen.

Left : OFF

Right : ON

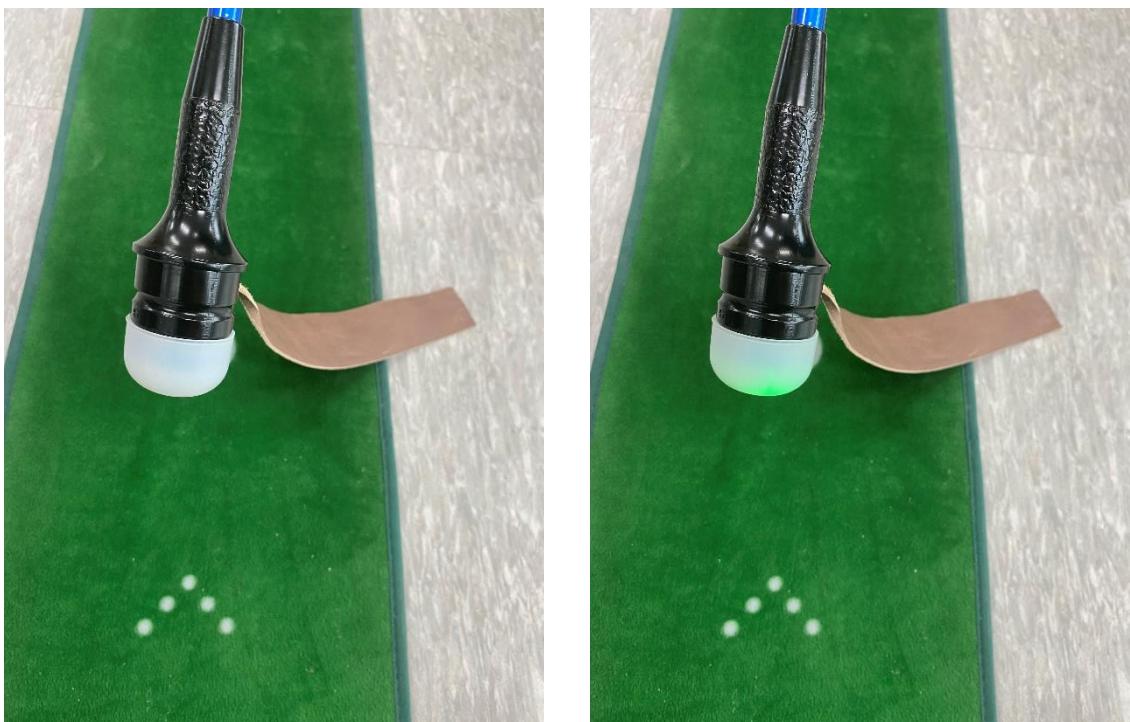

Turn on the power through the power switch on the back of the club.

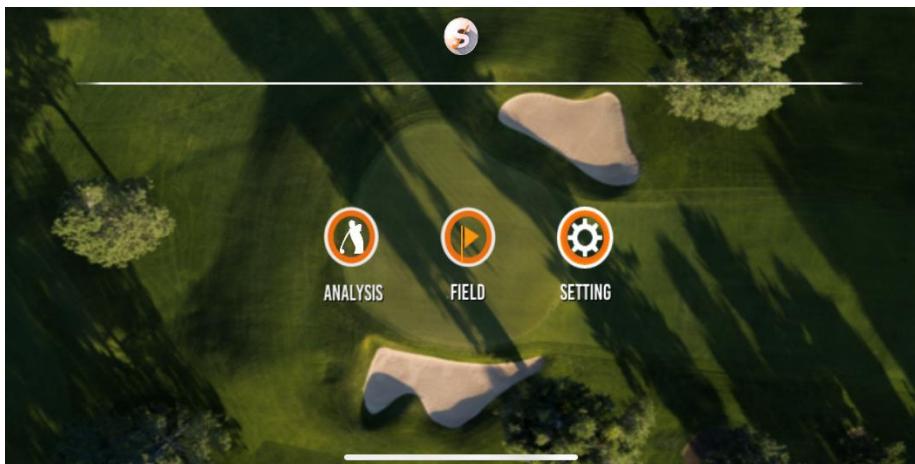

Click the Scan button to scan the active clubs around you.

Bluetooth Scan shows clubs that are powered on.  
You can click the club you want to connect to, and if the club is normally connected, the setting window turns off.  
If it is the first club, it will appear in New Club  
If you've connected to an existing club, it will appear in SubsCrib Club.  
If the club is connected to another device, the club does not appear. If the club is unable to connect, close the settings window and scan again.

When the LED on the head of the club flashes slowly, the connection is complete.

**Click the ANALYSIS button.**

**Enter the ANALYSIS**

If the club moves on the screen while the count sound is heard from the device after pressing the address button, the connection is successful.

When the swing is finished, after the sound of the end of recording is heard, when the SWING INFO window appears, it means that the application connection with the club is complete and the swing is completed normally.

## **FCC compliance information**

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications not expressly approved by the manufacturer may void the user's authority to operate the equipment under FCC rules.
