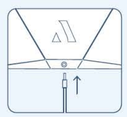
Quick Start Guide

Aura is the easiest way to view and share your photos, instantly, anywhere.
In a few easy steps you'll connect your frame to WiFi and start adding photos!

STEP ONE
Get the free Aura app.
Search "Aura Frames" in the Apple App Store or Google Play.

STEP TWO
Plug in the frame.
Find a location in your home near a power outlet.



STEP THREE
Connect your frame to WiFi.
Make sure your mobile device is connected to your home WiFi network and Bluetooth is turned on.

STEP FOUR
Add some photos.
Your photos are automatically synced with the Aura app. Select photos from your camera roll or albums.

STEP FIVE
Invite family members.
Aura is more fun with family! They'll need to download the Aura app and accept your invite to start sharing.

TA-DA!
Your frame is all set up!
Snap a photo of your frame and tag #AuraFrames to share it with us.
@AuraFrames

Aura Customer Care

We've built an online Help Center just for you!
Please visit **https://auraframes.com/help** for FAQs, and to learn more about new features added to your frame and the Aura App.

"Made for iPod," "Made for iPhone," Made for iPad" mean that an electronic accessory has been designed to connect specifically to iPod, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Please note that the use of this accessory with iPod, iPhone, or iPad may affect wireless performance. iPad®, iPhone®, and iPod® are trademarks of Apple Inc., registered in the U.S. and other countries.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.
