About M5

It is defined as the bedroom soundscape wireless speaker featured with the fabric surface.

Nature sounds built-in , which were recorded from nature , including rain&thunder, waves, stream ,water, etc.These sounds are thought close to pure white noise , which are proved functional to relief min stress and improve sleep .

To avoid disturbance to sleep, It features "Sleep mode", under this mode, the sound volume will reduce to zero gradually within 30 minutes. Some research suggests the people will get into slow-wave sleep around 30 minutes later.

Three size bedroom sound effects preset by Sound- Field Tech, You just need to know what size of your room, and press the back button to choose the appropriate setting.

Bedtime remind at 10:00 PM by Real-time-chip

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
