

Bluetooth device,CSR4.0 USB

Thank you for purchasing one of the most feature-rich Bluetooth™ to USB adapters available.

This Bluetooth™ USB adapter is first-rate wireless connectivity accessories designed, to help reduce the frustration of dealing with cable glut in your home or office. The adapter allows computers with USB connections to become Bluetooth™ enabled computers. They comply to Bluetooth 4.0 and USB 2.0 specifications, and provide users with a 3Mbps data rate. They also enable wireless Personal Area Network (PAN) connectivity to Bluetooth™ enabled devices such as PDA's, printers, cellular phones, computers, etc.

We hope you enjoy using your Bluetooth™ to USB adapter

This device works well with Microsoft Windows XP, Windows Vista, Windows 7 to Windows 10 series system.

Before you get started, you need to:

- 1) Plug your Bluetooth USB dongle to your host device;
- 2) Install the driver for the dongle(the OS will automatically detect it and install the proper driver);
- 3) Search other Bluetooth devices around you and connect to that,

Note: sometime other device may need password to connect to, so if you don't have that password, you're not able to do that.

- 4) To connect other Bluetooth device if you're currently connect to one Bluetooth device. Just follow the instruction below:
 - a. Disconnect the previous one
 - b. Click search devices to find other Bluetooth device
 - c. Select other device and click connect.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
