atomi™

fast-charge

wireless charge stand

USER GUIDE

THANK YOU FOR PURCHASING THE atomi WIRELESS CHARGE STAND.

The atomi Wireless Charge Stand is optimized to work with iPhone® 8, iPhone® 8 Plus and iPhone® X, but it also charges any devices with Qi wireless charging.

Featuring Qi charging technology, you can charge up your Qi supported device quickly and wirelessly. The Wireless Charge Stand provides 10W of power!

NOTE: If a device is not Qi compatible, you will need a Qi receiver to charge the device.

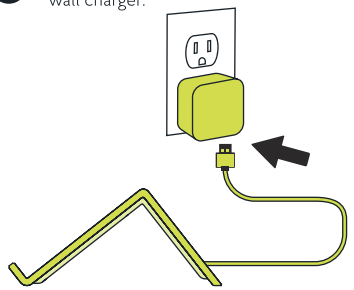
PARTS AND FEATURES

1. Wireless Charge Stand
2. Built-in 5ft. USB cable
3. LED indicator light

SPECIFICATIONS:
Input: 5V 2A, 9V 1.67A

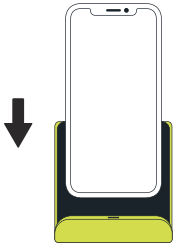
HIGH SPEED CHARGING:
The atomi Wireless Charge Stand will deliver up to 10W of fast wireless charging to the iPhone® once fast wireless charging is enabled with a free software update later this year.

1. Connect the USB cable to a USB wall charger.



Please note a Quick Charge wall charger is needed in order to enable the 10W fast-charge feature.

2. Place the device on the center of your Wireless Charge Stand. Charging will begin on contact.



This device complies with part 15 and 18 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not exlicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

· Reorient or relocate the receiving antenna.
· Increase the separation between the equipment and receiver.
· Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
· Consult the dealer or an experienced radio/TV technician for help.
The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
