

Qi Wireless Wake

10W Wireless Charger + Alarm Clock

Welcome Guide

Charging Your Wireless Device

1

Plug your Qi Wireless Wake into a USB charger.
(USB charger not included)

2

Insert the device in your Qi Wireless Wake.
Charging will begin on contact.

Light Indicator

Light activates when phone is inserted and begins charging. Glowing light slowly cycles between high light to low light while charging.

When phone is fully charged, light turns off.

Thank you for purchasing the atomi Qi Wireless Wake.

The atomi Qi Wireless Wake features Qi technology that allows you to charge a compatible device quickly and wirelessly through electromagnetic induction.

All you have to do is place any compatible device on the Qi Wireless Wake to charge it.

NOTE: If a device is not Qi compatible, you will need a Qi receiver to charge the device.

Setting Up Your Clock

Press **clock set** button for 3 seconds to adjust alarm and clock time with scroll wheel, press **clock set** again to set time. Clock time blinks while adjusting.

Rotating scroll wheel adjusts alarm and time

Steps

- a) Press and hold **clock set** for 3 seconds to set up time.
 - b) 1st press for alarm hour setup, 2nd press for alarm minute setup, 3rd press for hour setup and 4th press for minute setup. Scroll wheel to adjust. Press **clock set** to confirm and move on to next step.
- Returns back to normal mode if no action is made after 15 seconds.

Snooze:

While the alarm is sounding, press the snooze button to temporarily silence the alarm for 5 minutes. Alarm will repeat for 1 minute after 5 minutes of standby.

When the alarm is not ringing, press **snooze** to adjust screen brightness (strong, middle & weak).

Note:

- Alarm icon indicates alarm setup is on.
 - At the set time, the alarm will sound for 1 minute (60 seconds).
 - Press **clock set** once to turn **OFF** alarm.
- Alarm will turn off automatically after 1 minute if no button is pressed.

FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide

reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
