

# User manual

## Model:SPEAKER-4b-0

Connection overview:

Connect the switch to the amplifier

Connect somatosensory vibrator to the amplifier

Connect speaker to the amplifier

Connect driver to the amplifier

Open the bluetooth function on your smart phone, then search the corresponding signal.  
Then you can enjoy the music that you like

## Product information

Rated power output: 2 X 10W (8 $\Omega$  1kHz)

Low frequency channel: 1 X 20W (4 $\Omega$  , 15Hz-300Hz)

Signal to noise ratio >70dB

Frequency response: 60Hz-20kHz  $\pm$  3dB

Total harmonic distortion <1.0 % (AUX IN, 8 $\Omega$ , 100Hz)

The input sensitivity 400mV (AUX IN)

## The speaker

The rated resistance group 8 $\Omega$

Low frequency body feeling vibrator

The rated resistance group 4 $\Omega$

## Other information

The power adapter input AC power supply 100V - 240V 50/60Hz

The power adapter DC output power 16V 5A

#### FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
