Columbia, MD 21046

To whom it may concern:

TEREX USA LLC, hereby requests a Permissive Change Class II of the radio equipment certification for the **GENIE TECH PRO LINK** certification number, **FCC ID: 2AISP-1274140**. This product differs from the originally approved product in the following manor:

Manufactured with Radio Module : WGM110A1MV2

Manufacturer: Si Labs

- (a) Associated digital circuitry. – Reference design was followed, output power is fixed and cannot be changed
- (b) Functional capabilities. – No changes.
- (c) Antenna Characteristics. – No antenna changes were made
- (d) Cosmetic differences – Unit is soldered onto host PCBA as intended and placed in plastic enclosure
- (e) Other: Change in RF Exposure conditions from Mobile to Portable. SARS testing results are attached

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

A handwritten signature in blue ink that reads "Anna Baldwin".

Anna Baldwin
Supply Chain Manager
TEREX USA LLC
