

Annex B.iii. Photograph: Test Setup Photo

 A photograph showing the front view of the conducted emissions test setup. It consists of a black rectangular device with four circular ports on the front panel, mounted on a wooden base. A laptop is connected to the device via a cable. The setup is located in a room with a grey floor and white walls.	 A photograph showing the side view of the conducted emissions test setup. The black rectangular device is mounted on a wooden base, with a laptop connected to it. The setup is located in a room with a grey floor and white walls.
Conducted Emissions Test Setup Front View	Conducted Emissions Test Setup Side View
 A photograph showing the radiated spurious emissions test setup for frequencies below 1GHz. A black rectangular device is mounted on a wooden base, with a laptop connected to it. The setup is located in a room with a grey floor and white walls. A red crosshair is overlaid on the image, indicating the measurement area.	 A photograph showing the radiated spurious emissions test setup for frequencies above 1GHz. A black rectangular device is mounted on a wooden base, with a laptop connected to it. The setup is located in a room with a grey floor and white walls. A blue parabolic antenna is positioned to the right of the device.
