Wearing a graphic

For the best audio experience, please try each different size cap, when worn properly, you will feel tight, comfortable, and stable inside the ear. If using outdoor, please put your phone on the left side, medium cap will have a better bass effect.

Attention: When wearing the ear cap,please press the ear cap to the tightest position,otherwise the headset may not be able to perfectly put into the charging case and take out again.The process of removing the headset should be as steady as possible.(Or if the charging case battery is exhausted,the earphone will not power on automatically) .
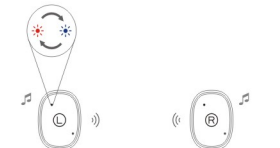

Mode of operation

1.In the headset

Put the headset into charging case,it is charging now when the red light is on. After the battery is fully charged, the blue light of the headset lights up for 5 seconds then goes out, the headset is fully charged for about 70 minutes when the headset is completely low battery.(If the charging case is also low battery, please charge the charging case firstly)
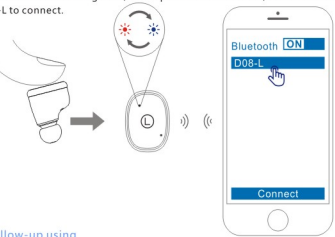

2.Take out the headset

After Taking our the L and R headsets from the charging case, the headset will power on automatically, wait for about 10 seconds, L and R will complete the connection automatically. After paired between L and R, L headset indicator light become red and blue flashing alternately, R headset indicator light will go out.

Red light and blue light flashing   Indicator light goes out

Attention: After you taking out the headset,if it did not power on automatically,maybe during the process,repeated connect with charging case will not result power on automatically,.So it can be manually turned on or re-put into the charging case and take out again.The process of removing the headset should be as steady as possible.(Or if the charging case battery is exhausted,the earphone will not power on automatically) .

3:Open your phone Bluetooth, search and click Bluetooth name D08-L,complete the paring and start using

If just hear voice from single ear, please clear the paring information on your phone, then shut down the headset. In the power off state, long time press both headset at the same time, about 5 seconds, then release until see red light and blue light flashing alternative, wait another 5-10 seconds, L headset light will flash but R headset will go out, then open Phone Bluetooth, search and click D08-L to connect.

Bluetooth **ON**

D08-L

Connect

4.Follow-up using

After the pairing with the mobile phone is completed for the first time, next time to use just need to take out the headset from charging case, the headset will connect your phone automatically(Need to ensure open phone bluetooth function)
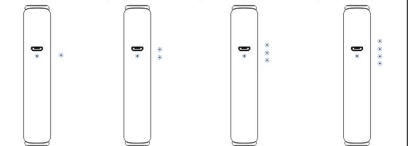

Monaural mode of use

1.If L headset have been paired with phone before, you only need to take out the L headset from charging case, just waiting 10s, it will connect with the phone automatically
2.If L headset never pair with the phone, need to take out L from charging case or long time press to open until see red light and blue light flashing alternative, then open phone bluetooth, search and click D08-L to pair directly.
3.If the first time to use R headset separately, need to take out R headset from charging case or long time press to open until see red light and blue light flashing alternative, then open phone bluetooth, search and click D08-R to pair directly.
4. If R headset have been paired with phone before, you only need to take out the L headset from charging case, just waiting 10s, it will connect with the phone automatically

The charging part

Headset:If headset battery capacity is low, the red indicator light will flash, during the charging process, the red indicator light will keep on, after fully charged, headset indicator will keep on 5s then go out.
Charging case:If low battery, indicator light will flash twice, about 30 seconds will remind you
If nearly empty battery, indicator light will flash quickly
When charging for case, charging case red indicator light will flash, after fully charged, red light will keep on.
When putting the headset into charging case, charging case blue indicator light will flash several times(1-4),it will remind you charging case battery situation.

Flashing 1 time means that there is 0%-25% battery capacity

Flashing 2 times means that there is 25%-50% battery capacity

Flashing 3 times means that there is 50%-75% battery capacity

Flashing 4 times means that there is 75%-100% battery capacity

Questions	

1.Within three months after the product is sold, in the event of a performance failure, the product itself and the outer packaging must remain intact and free of scratches, and replacement services may be provided, excluding human factors.
2.One year warranty from the date of product sale, lifetime maintenance, but accessories do not enjoy the service
3.Warranty service is valid only under normal use
4.Damage caused by all human factors, self-disassembling, and damage caused by improper use are not covered by the warranty. This warranty card must be provided during the warranty. If the warranty card is not provided, the company has the right to refuse to provide warranty service.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following

two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may

cause undesired operation.
