| | | | |
|---|---|---|--|
| <div>1</div> <div></div> <div>Rotate the main lock 90 degrees clockwise to open the suitcase</div> | <div>2</div> <div></div> <div>Insert the battery to the left and press it to the right to lock</div> | <div>3</div> <div></div> <div>Lock the battery lock-up switch. (Flat switch indicates the locked status)</div> | <div>4</div> <div></div> <div>Long press the power button to power on/off</div> |
|---|---|---|--|

- !

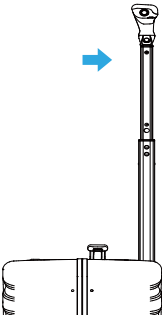

If the battery is installed successfully, the power light will flicker.
- !

When travel by air, please take out the battery separately to go through the safety check.
Please turn off the power before boarding the plane.

Pull up the draw bar completely to fully expose the laser radar

Activate the autonomous following mode

Start with the following button on the handle:
Press either button on the both side of the handle to start following.

2 Mode Switch

In auto mode, place your hand on/ gently hold the handle to switch ROVER to manual mode.

3 Start with Your APP

1

Option1, Search "COWAROBOT" in the APP store.
Find & download "Rover" APP.
Option2, Scan the quick response code, download
the appropriate APP version for your mobile phone.

2

Open the APP, register an account with
your phone number and then log in
in the operation interface.

3

Tab "Pairing Suitcase" to search devices, enter the
PIN code to pair with your suitcase (The default PIN
code is 123456).

4

Bind your suitcase according to the prompts.
Then the suitcase can be controlled by APP
after successfully binding. For more details
on APP operation, please refer to APP instruction.

Product Parameters

| Product Specifications | |
|----------------------------|---------------|
| Size (include wheels) | 380X210X550mm |
| Weight | 5.5kg |
| Volume | 32L |
| Suitcase Material | PC |
| Interior Material | Fabrics |
| Optimum follow load-weight | ≤11kg |

| Battery Parameters | |
|--------------------|-------------------------------|
| Battery Capacity | 14.4V/6400mAh |
| Battery Weight | 500g |
| Power of Battery | 92Wh |
| Standby Time | 1-2days |
| Charging Time | Around 4 hours and 20 minutes |
| Endurance | Within 5 hours or 20km |

Rover has different endurance with different load weight,the maximum value is 5h/20km.

⚠ The battery capacity is 6400mAh and its voltage is 14.4V which is equivalent to 3.7V, 24800mAh in the case of mobile phone charging. (The limited charging voltage of mobile phone is generally 3.7V).

The best following effect is within 11kgs of load weight,overloading may lead to slower walking etc.

CO-SMART Lock

ROVER robotic suitcase is equipped with a rotate-to-open smart lock, which has TSA, electronic and combination locks combined together.

Locked Status: Combination lock, TSA lock and electronic lock are all in a closed status.

Unlocked Status: Any of the combination, TSA and electronic lock is in an open status.

1 Electronic Lock

The electronic lock can be controlled by the switch button in your APP.

2 Special Instruction

The electronic lock can be used normally only when the suitcase is energized and it will lock autonomously in the case of normal shutdown or running out of power. If the electronic lock fails to locking due to abnormal shutdown, please reboot it.

3 Opening Procedure

1

Unlock with the combination lock or electronic lock.

2

Clockwise rotate 90 degrees to open the suitcase.

⚠ In general case, we suggest our customer to use the electronic lock, while ensure the TSA and combination lock are closed.

4 Password Modification Steps

1

Entering the correct password, rotate clockwise the lock to open the suitcase. Then contrarotate the lock and find the password reset paddle on the back.
(Initial password : 000)

2

Change the password

3

Put back the paddle

⚠ Please amend your initial password timely when you receive the suitcase.

 The TSA lock is turned off by default, which can only be opened with the dedicated key when go through custom inspection.

5 CO-SMART lock lighting system

| Color | Flash Frequency | Status |
|---|---|--|
| <div>Blue</div>  | LED will breath once then quickly blink twice | Power on |
| | LED quickly blink twice, then breath once | E-lock unlocked |
| | LED will breath once | Bluetooth successfully paired |
| | LED blinks rapidly at the same frequency | E-lock locked, combination lock unlocked |
| <div>Red</div>  | LED blinks rapidly at the same frequency, then light off after 30 seconds | E-lock breakdown |
| | LED will keep breath and light off after 30 seconds | Bluetooth disconnected |
| | LED blinks in rapid succession till the proximity alarm cancelled | Proximity alarm |
| | LED will breath once | E-lock properly locked |
| | LED lights up, then slowly fades | Power off |

Smart Battery

COWAROBOT smart battery not only supplies power to the suitcase, but also can be removed from the suitcase to charge your electronic products separately.

- When battery level reaches 76%-100%, LED1-LED4 will lights up in turn, flicker twice and then go off.
- When battery level reaches 51%-75%, LED1-LED3 will lights up in turn, flicker twice and then go off.
- When battery level reaches 26%-50%, LED1-LED2 will lights up in turn, flicker twice and then go off.
- When battery level reaches 11%-25%, LED1 lights up, flickers twice and then goes off.
- When battery level reaches 0%-10%, LED1 flickers twice and then goes off.
- Tap the battery indicator button, the LED light will display the battery capacity. When charging, the LED light will blink to indicate the current charging status.

 Please remove battery from the suitcase according to the following steps:

| | | |
|--|--|---|
| 1 Turn off the power of the suitcase first | 2 Turn on the battery lock-up switch (Turnup switch indicates unlocked status) | 3 Press to the left to take out the battery |
|--|--|---|

 The battery should be charged with our dedicated adapter.

To charge a battery by inserting a plug at first then connecting.
