SoundPal

SONOBASS
User Manual

Thank you for choosing SonoBass Wireless headphones. Please read this user manual carefully to be able to enjoy using your SonoBass Wireless headphones to their best capacity.

SAFETY RULES

Do not attempt repairs or modifications of the product or accessories as it may cause breaking, electric shock, fire and total damage not covered by warranty.

Do not use solvents or volatile liquids to clean the device or accessories.

Do not use headphones near hazardous locations (near sources of open water or fire).

OPERATIONS

Charging

Battery comes pre-charged, but we recommend that you fully charge it using the provided USB cable before use.

Red LED will turn on while the headphones are charging and turn off once the headphones have been fully charged.

If headphones are not used for a long period of time, make sure to charge the battery fully before using them again. Charge through a computer USB port or a USB wall charger. When battery runs low, charge the headphones via the USB cable for a few hours. Red LED will turn on while the device is charging and turn off when the device has reached full charge. If the battery is lower than 3.3V the headphones will alert the user by a tone every 60 seconds. Headphones will automatically turn the power off when the battery will reach 3.2V and lower.

Powering On/Off

Power button/Multi Function Button (MF Button): located on the right headphone.

Power On: Press MF Button for 2-3 seconds. Blue LED light will be flashing and a voice prompt «Power ON» will sound.

Power Off: Press MF Button for 2-3 seconds. Red LED light will be flashing and a voice prompt «Power OFF» will sound.

Product diagram

1. Volume⊕

    Vol⊕: Press and hold V⊕ button, release it when the volume has reached a comfortable listening level.

7. USB charging port

Pairing Bluetooth

Please make sure that the Bluetooth setting of your digital device
(i.e. phone, tablet, or laptop) is turned on before attempting to
pair your headphones with it. Press MF Button for 5 seconds until
a blue/red Led lights will flash alternatively and a voice prompt
«Pairing» will sound. Generally, your digital device will display a
list of available Bluetooth devices that is able to connect to. Your
headphones will be displayed in the list under «SoundPal SonoBass».

Note: If your device requires a password to connect, enter
password «0000». After the headphones will successfully pair with
your digital device a voice prompt «Paired» will sound. Multi-
point technology allows you to connect with 2 digital devices
simultaneously.

If headphones will not pair to any devices for 5 minutes while in
pairing mode - they will automatically exit the pairing mode into
the standby mode. If headphones will not pair to any devices

for 10 minutes - they will automatically turn the power off. When
turning the headphones on and into the pairing mode they will
automatically connect to the last paired with device.

Line-in

In addition to connecting via Bluetooth, you can connect the
headphones directly to your device using the included AUX cable.
Plug one end into the device and another onto the left headphone.

Hands free calling with built-in microphone

You can listen and talk through the headphones instead
of your mobile phone.

Answer/ End phone calls: Press MF Button once.

Reject calls: Press MF Button twice.

Re-dial last number: Long press MF Button twice.

Note: the last number to re-dial is available only for the

first connected device if two mobile phones are connected.

Manually disconnect/reconnect: Long press MF Button.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
