PUGZ -Variants Declaration of Equality

PUGZ is Bluetooth Headset.

The list of variants of PUGZ product is provided in the following table:

PUGZ Variant		Description	Specifications
1	PUGZ-L	L represent : Leaking model	Intended to have passive noise reduction
2	PUGZ-S	S represent : Sealed model w	Intended to let background noise in.

The differences between “**PUGZL**” and “**PUGZS**” variants are specified in the following table:

PUGZ Variant	Acoustic element Speakers	Mechanical Parts inside Ear	Other differences
PUGZ-L	10 mm speaker element.	Mechanics that goes into the ear.	No other differences.
PUGZ-S	6 mm speaker element	Mechanics that sits outside the ear.	No other differences

PUGZ-L and **PUGZ-S** variants have exactly the same core assembly (mainboard electronics and layout, radio modules, antenna and RF circuitry, push buttons, Charging pad's USB cable, top plastic housing and core assembly). The **PUGZ-S** assembly just have a different mechanical parts / shape

Basing on this product configurations, all the above variants are expected to have identical EMC behavior, such that relevant EMC testing as per EN 301 489-1/-17, EN55022/EN55024 and FCC Part 15B performed on a full feature variant **PUGZ-L** (operating all the functionalities) can be considered valid in order to cover compliance of **PUGZ-S** variant.
