

Appendix B. Measurement equipment

Radiated test	AC Conducted test
 A photograph of a radiated test chamber. The walls are covered in white, rectangular acoustic absorption panels arranged in a grid. The floor is a black and white checkered pattern. In the center, there is a black table with a laptop and some other equipment. A tall, thin metal pole stands in the background. The KESK logo is visible on the wall panels.	 A photograph of an AC conducted test setup. It shows a wooden table with a laptop and other equipment. Behind the table is a long strip of electrical outlets on a wall. The background is a plain, light-colored wall.
 A photograph of the same radiated test chamber as the first image, showing the interior with the checkered floor, the black table with the laptop, and the tall metal pole. The KESK logo is on the wall.	 A photograph of the AC conducted test setup, showing the wooden table with the laptop and the electrical outlets on the wall. The perspective is different, showing more of the room and the equipment on the table.
 A photograph of the radiated test chamber, showing a white, rectangular test object on a white pedestal. The pedestal is on a black table. In the background, there are black, triangular acoustic absorption panels. The KESK logo is on the wall.	N/A
