

USER'S MANUAL

TEK229 TWS Wireless Ear Buds

Welcome to TEK229 Wireless Earphones! In order to let you understand TEK229 more quickly , please read the following instructions carefully.

The package box contains a charging case, a pair of wireless earphones and a charging cable

Operation

You can refer to this instruction to perform the following operations on the wireless earphone.

1. Turn on and Turn off

Turn on

Method 1: When the charging case has residual power, open the charging case earphone and it will turn on automatically;

Method 2: Long press the operation area for 2 seconds when the phone is turned off, and the earphone will turn on

When starting up, the white light will be on for 1 second and then off, and the voice prompt will be "Power on"

Turn off

Method 1: Put the earphone into the charging chamber and it will automatically shut down.

Method 2: When the terminal device is not connected, the earphone will automatically shut down after 3 minutes or long pressing the touch area for 6 seconds.

Indicator light: red light goes on for 2 seconds and then goes off

Voice reminder: before power off, voice prompt "Power off"

2. Pairing

Pairing includes the pairing between the left and right earphones, and the connection between the earphones and the terminal device.

Pairing between left and right earphones

The two earphones can be paired automatically after power on.

Indicator light before pairing: red light and white light flash alternately.

Indicator light after pairing: white light flashes, and voice will prompt with "Du" sound.

Connection to terminal equipment

- Bluetooth on the end device turned on
- After the earphone is turned on, search for the Bluetooth signal on the terminal device , select the corresponding earphone signal name, and then select Connect to pair with the terminal device.

Earphone indicator light: After pairing is complete, the indicator light goes out

After the earphone successfully completes a connection with the terminal device, the earphone will automatically find the terminal device that was successfully connected last time when it is used again, and try to connect with it.

3. Play music or audiobooks

Play / Pause

Double tap on any earbud to play or pause music

Indicator light: no prompt

Switch up and down

Indicator light: The white light of the earphone is always on, and it will go out when fully charged

Earphone low battery reminder : the white light flashes twice every 30 seconds

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

The device must not be co-located or operating in conjunction with any other antenna or transmitter.
