Package Contents

Your order has been carefully packaged and inspected. The following accessories should be included in your package. Please inspect the contents of the package to ensure that you have received all items and that nothing has been damaged. If you discover a problem, please contact us immediately for assistance.

- USB 2.0 Cable
- Power Adapter
- Frame Stand
- Registration Card
- Quick Start Guide

Getting Started

- Screw in the frame stand
- Plug in the power adapter

Operating Instructions

Step 1: Connecting to a wireless network

AWDMPF117F scans for available Wi-Fi networks and displays the names of those it finds when it is powered on when it is powered on. Secured networks are indicated with a Lock icon. If AWDMPF117F finds a network that you connected to previously, it connects to it automatically. If not:

1. Touch the Network you want to connect to
2. Use the keyboard to enter the Password
3. Touch Connect
4. Touch > to continue to next step

Operating Instructions

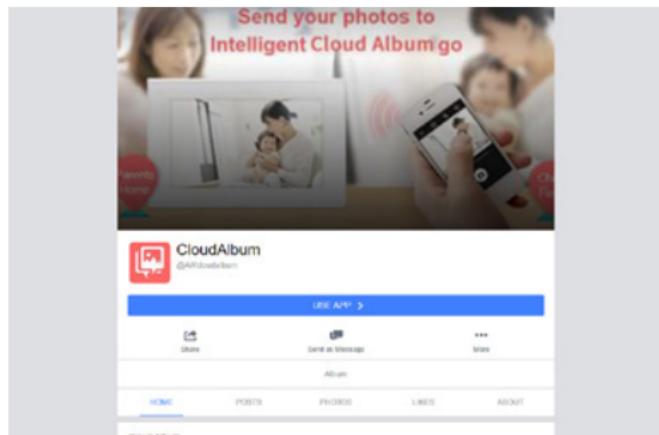

Step 2: Link your frame to your Facebook, Twitter, Aluratek WiFi Frame app or Computer

Facebook

How to link the frame to your Facebook account so that pictures from your Facebook page will show automatically on the frame after you post it.

1. You can either scan the QR Code on the frame using your smart phone or type <https://m.facebook.com/AWcloudalbum/> on a browser or mobile device using any device.

2. Click on “USE APP”.

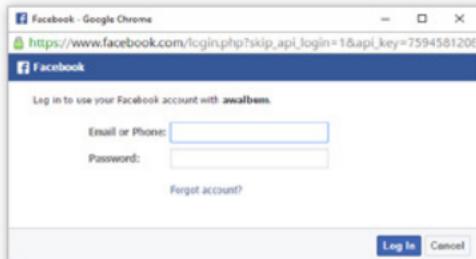

Operating Instructions

Please login to your Facebook account so that the Wifi Frame can be linked. All pictures after the binding process will be pushed directly to the Wifi Frame after it is posted on your Facebook account.

3. Click on “Authorization and logging”.

4. Please login to your Facebook account. If you are already logged in on this computer, you will not need to login again and you will be directed to the next step directly.

Operating Instructions

5. Go to Settings > Device Info from the frame's main menu.

For RM Name, create a nickname for your frame to easily identify which frame is which in case you have more than one wifi frame. After you have filled out both fields, please click "TO Bind".

Binding Equipment

This page is for users to bind their digital photo frame to their Facebook account. Please fill in the UN Code (the unique ID of the photo frame can be found under Device Info menu in Settings) and click [To bind] button.

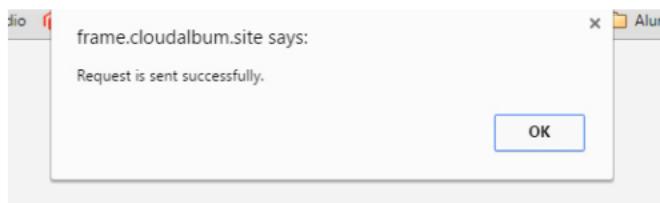

If the UN Code is valid, a confirmation message will be sent to your photo frame.
If the UN Code is not valid, an error message will be shown. Please double check the UN Code entered.

UN Code
The UN code at account settings area

RM Name

6. You will see below message after the request is sent.

Operating Instructions

7. You will then see the below confirmation message. You will also receive a message on the frame showing that your facebook account is linked to the frame.

8. Congratulations! Your Facebook account is now linked to the frame. From now on, every picture that you post to your Facebook will be pushed to the WiFi Frame directly without any extra steps.

Operating Instructions

Twitter

How to link the frame to your Twitter account so that you can post picture directly from your Twitter account to the frame.

1. You can either scan the QR Code on the frame or type:

<https://twitter.com/CloudAlbum/>
in your browser

2. Click on “Follow”.

Operating Instructions

3. Please login to your Twitter account. If you are already logged in on this computer, you will not need to login again and you will be directed to the next step directly.

Join Twitter today.

Full name

Phone or Email

Password

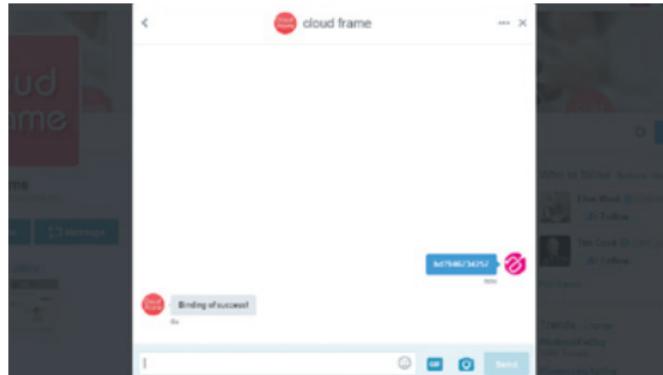

Sign up

4. Click “Message” to send a private message to link the frame.

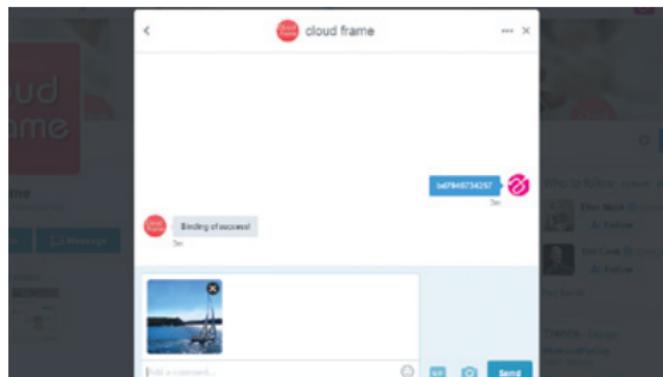

Operating Instructions

5. Type 'bd+device serial no' to bind. For example, if the device serial number is 1234567890, please type bd1234567890 in the message. Once the binding is successful, you will see a reply from the Cloud Frame for the confirmation.

6. Congratulations! Your Twitter account is now linked to the frame. To post a picture to your frame, you can just send a private message to the frame like below.

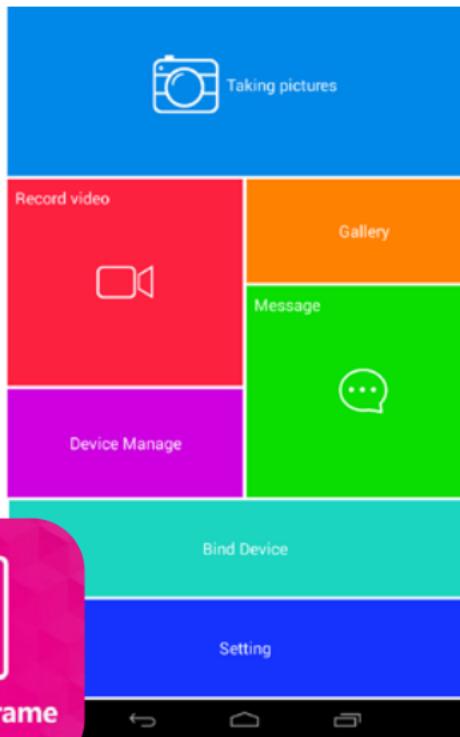

Operating Instructions

Aluratek WiFi Frame app

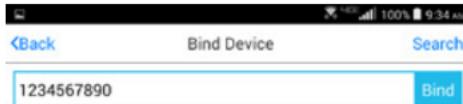

How to link the frame to Aluratek WiFi Frame app so that you can send picture/video directly from your tablet or smart phone.

1. You can either scan the QR Code on the frame or search for “Aluratek WiFi Frame” in either Google Play or iTunes store.
2. Once it is downloaded, please start the app by tapping “Aluratek WiFi Frame”.
3. Tap on “Bind Device”.

Operating Instructions

4. Please input the UN serial number. You can find the 10 digit UN serial number under Settings > Device Info in the main menu of the frame.

5. Tap on Bind. Once the process is complete, you can verify it under when you tap on "Device Manager" A popup message will also be shown on the frame.

Operating Instructions

6. Congratulations!

Aluratek WiFi Frame app is now linked to the frame.

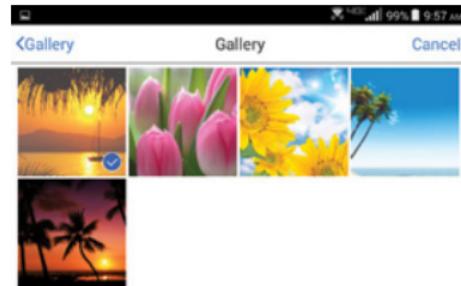

Operating Instructions

To post picture from the Aluratek WiFi Frame app to the frame, please follow below steps.

A. Tap on “Gallery”.

B. Select the picture or video that you want to send to the frame.

Operating Instructions

C. Tap on “Confirm” on the bottom of the screen to confirm the picture selection.

D. Select the Photo quality of either SD or HD.

E. You can also add text to the picture by tapping on the photo and type in the text.

F. Tap on “Send” to send the picture/pictures to the frame. You will see a status bar on the main menu to see the progress. You may also check by tapping “Message”.

Operating Instructions

Transfer Pictures Directly From Your Computer To The Frame

To transfer pictures from your computer to AWDMPF117F directly, the frame and the computer will need to be in the same network. Follow the steps below to transfer the pictures.

1. Go to Settings > PC Management on the frame. The ftp address of the frame will be shown on the screen.

WLAN Name: "dlink-129D"

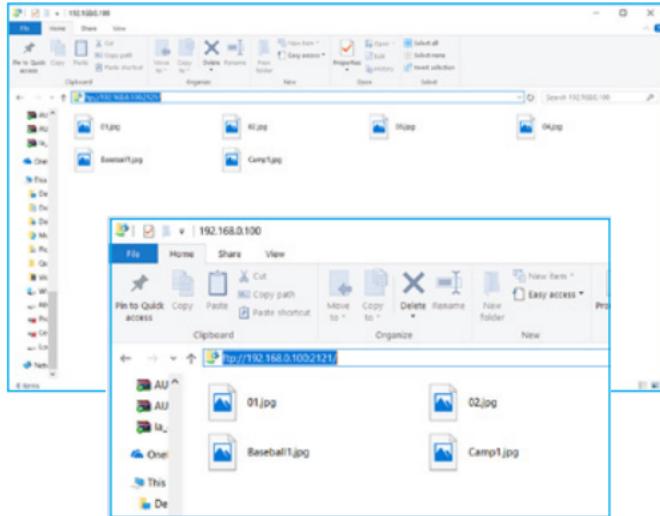

Enter the following address into your FTP Client:

ftp://192.168.0.100:2121

Operating Instructions

2. Go to your computer and open “File Explorer”. In the File Explorer, type in the exact address in the address bar. In this example, it is **ftp://192.168.0.100:2121**
3. The internal memory of the frame will show up like a folder on your computer. Please just drag and drop pictures that you like to transfer to this folder.
4. Once transferred, please go to Album > Internal memory of the frame to see the pictures.

Note: If the computer and the frame is not on the same network, you can send / transfer the pictures to the frame via Facebook / Twitter or Aluratek WiFi Frame app.

Main Menu Function

Main Menu

Radio and TV Interference Statement

WARNING!!! This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by whatever measures may be required to correct the interference.

Warranty

Aluratek warrants this product against defect in material or workmanship for **1 Year** from the date of purchase.

This warranty becomes invalid if the factory-supplied serial number or "warranty void" sticker has been removed or altered on the product.

This warranty does not cover:

- A) Cosmetic damage or damage due to acts of God
- B) Accident, misuse, abuse, negligence or modification of any part of the product.
- C) Damage due to improper operation or maintenance, connection to improper equipment, or attempted repair by anyone other than Aluratek.
- D) Products sold AS IS or WITH FAULTS.

IN NO EVENT SHALL ALURATEK'S LIABILITY EXCEED THE PRICE PAID FOR THE PRODUCT FROM DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THE PRODUCT, IT'S ACCOMPANYING SOFTWARE, OR IT'S DOCUMENTATION.

Aluratek makes no warranty or representation, expressed, implied, or statutory, with respect to it's products, contents or use of this documentation and all accompanying software, and specifically disclaims it's quality, performance, merchantability, or fitness for any particular purpose. Aluratek reserves the right to revise or update it's product, software or documentation without obligation to notify any individual or entity.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
