Hang up: L or R short press 2 times

Voice Assistant (Siri/Google/Alexa):
L or R Long press 3 seconds

Voice assistant close: L or R long press 3 seconds

INSERTION GUIDE

Optimal hearing protections comes from a proper seal with the earplug in the ear canal.

1. Select size

The first thing to consider is the size of your ears - you're going to need earplugs that are air-tight in your ear canal.

small

medium

large

multi-sized

SINGLE TIER

COMFORTIERED

2. Careful insertion

Reach over the side of the head and lift gently on the top of the ear to open up the ear canal.

3. Earproof for Secure Fit

Earplugs make a sudden drop in ambient environment noise when inserted properly. With the earplugs in place, try cupping your hands over plugged ears. If the sound levels drops significantly by covering your ears, then the earplugs are likely not securely in place. Repeat step 2 again for a proper seal. Sovereign, when fitted correctly, has the tip securely in the ear canal.

FCC STATEMENT Plugfones, FCC ID : 2AJDL-PS

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one or more of the following measures:- Reorient the receiving antenna.- Increase the separation between the equipment and receiver.- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.
