A green printed circuit board (PCB) is shown, oriented horizontally. It features several circular mounting holes: two on the left edge, two in the top center, and one on the right edge. The board is populated with various electronic components, including two large black integrated circuits (chips) in the center, several smaller surface-mount components, and numerous solder joints. A dense array of solder points is visible along the bottom edge, likely for a connector. The PCB is set against a light-colored, textured background.

A photograph of a green printed circuit board (PCB) with two black multi-pin connectors. The board features several circular through-holes and traces. Labels 'X2' and 'X1' are visible near the connectors.
