To Whom It May Concern,

Following is an explanation of the model variants for the 660 lantern:

Model Numbers:

"M660" (Marine), "A660" (Aviation), "OL4A" (Obstruction)

The devices in the product family certification are identical electrically and share the same RF circuitry.

Product Options (indicated on product label):

- LED Color ("BLU" = Blue, "YLW" = Yellow, "GRN" = Green/Cyan, "RED" = Red/Red-Orange, "WHT" = White)
- Switch ("SW" = With Switch, no text indicates no switch)
- Charge Port (MCHRGPT = Military Style Charge Port, CHRGPT = Standard Charge Port. No text indicates no charge port)
- Battery (DUAL = Dual Battery. No text indicates single battery)

Note: Abbreviations may be subject to change.

Please feel free to contact me if you have any questions.
