## Remote Control Socket Instruction Manual

\* Please read the Instructions carefully before using the product.

### Specification:

Rated voltage: AC 100-240V 50Hz /60Hz  
Rated current: 15A  
Transmission frequen: 2.4GHz  
Power for Remote: 2xAAA battery

### Installation:

Install 2xAAA battery in the compartment, make sure the installation of battery is correct.

### Detailed Self- Learning Operation:

All remote controlled socket units had been pre-paire no need to pair again.

If you want to pair the remote control and plug socket again , do as below please:

- ◎ Plug the remote controlled socket to a power point and turn the power on.
- ◎ Press and hold the Learning button on the socket for about 5 seconds until the LED is flashing.
- ◎ Release the learning button and long press the "ON" or "OFF" button of the remote.
- ◎ Paired successful when the LED indicator on the socket stops flashing.

### Change the battery:

Regularly change the battery in the remote control for best use however if you find the socket is not responding or the LED indicator of remote control becomes dim, then you have to change the battery at the first time.

## FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
