

Please carefully read the installation manual before installation work, and please do the installation following to manual. Please keep the manual for future reference.

## ► Before installation - Checking the part

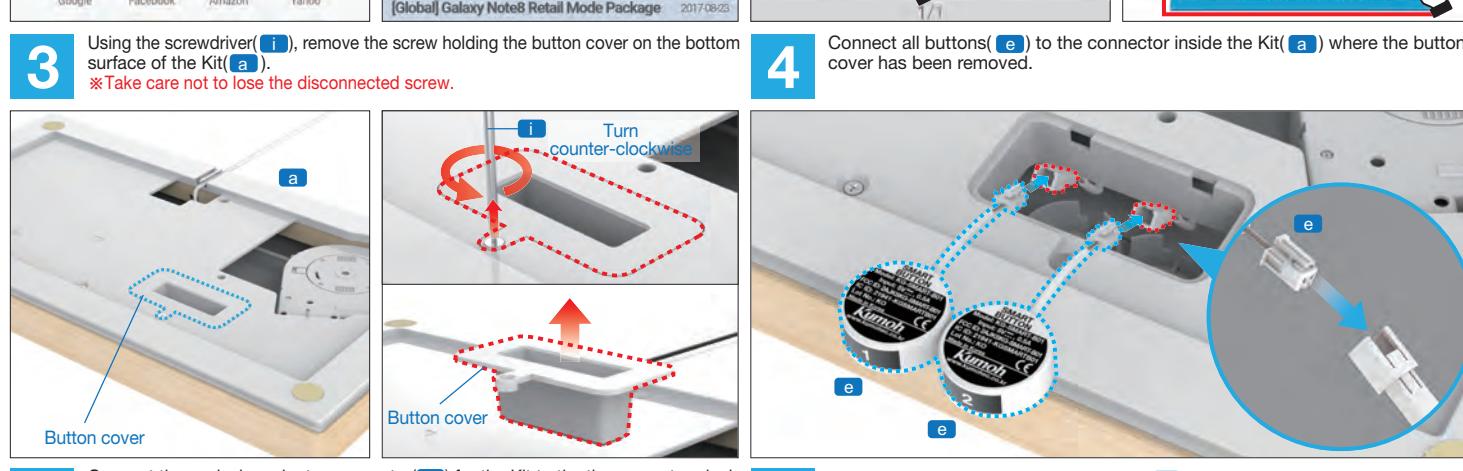

## ① CAUTION -When attaching the double-sided adhesive tape.

1. After removing the protective film from the double-sided adhesive tape, preserve the tape so that it doesn't get dirty.  
If touching the tape with a hand or foreign materials get on it, its adhesive strength can be significantly deteriorated.
2. The adhesive tape will have full adhesive strength after the 24 hours from its placement. Please do not use the products right after its placement.

**1. How to install and connect S Pen & Camera Launch Kit to the smartphone**

※ If the Samsung Retail Mode is not installed on Note8, download and install the Note8 Retail mode package through 'PVI' or 'retailsamsung.com'. Without Samsung Retail Mode, normal Kit setting is unavailable.

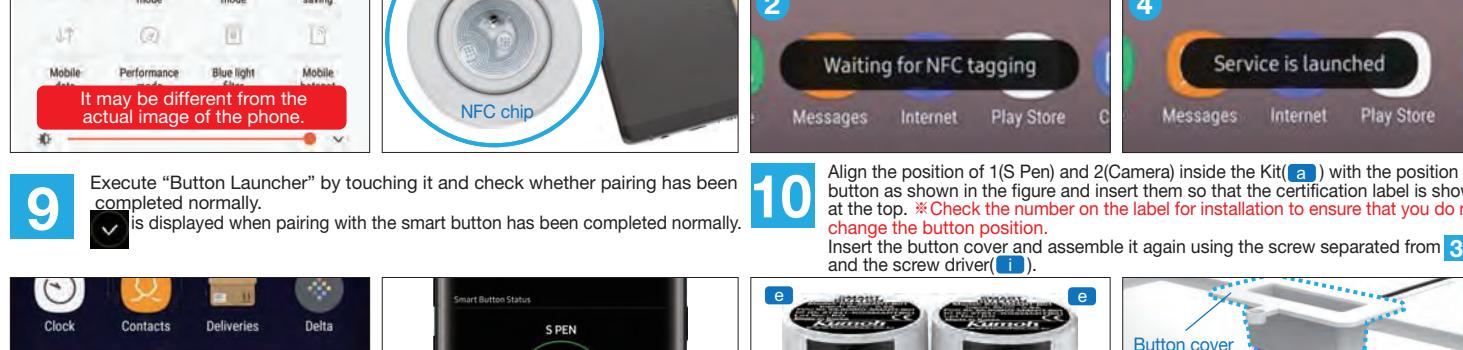

- 1 Click Internet on the smartphone that you are going to connect to the kit (a) and access 'retailsamsung.com'. (To access with Internet, the WiFi is connected.)  
Search for S pen on the website.

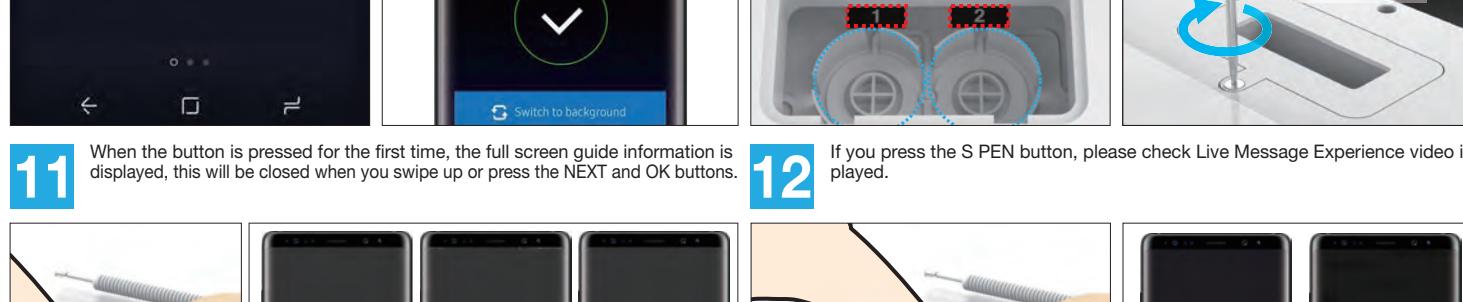

- 3 Using the screwdriver (i), remove the screw holding the button cover on the bottom surface of the Kit (a).  
※ Take care not to lose the disconnected screw.

- 5 Connect the exclusive adaptor connector (h) for the Kit to the power terminal on the bottom surface of the Kit (a) and organize the cable along the cable guide as shown in the figure. Connect the exclusive adaptor (h) for the Kit to an electric outlet.  
※ Please use the supplied power adaptor in this package. Otherwise, the device may be damaged.

- 7 Enable the Bluetooth and NFC (basic mode) function on the smartphone. Place the smartphone on top of NFC chip of No. 1 (S Pen) button for tagging as shown in the figure below.  
※ Both of the two buttons will be connected by a single NFC tagging.

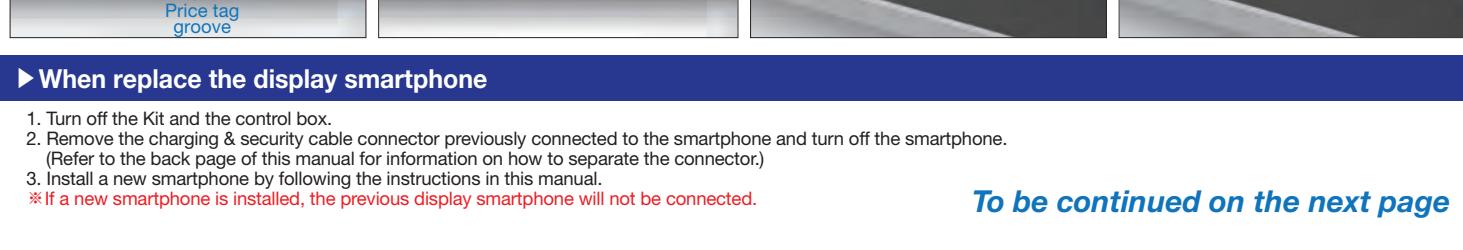

- 9 Execute "Button Launcher" by touching it and check whether pairing has been completed normally.  
is displayed when pairing with the smart button has been completed normally.

- 11 When the button is pressed for the first time, the full screen guide information is displayed, this will be closed when you swipe up or press the NEXT and OK buttons.

- 13 Check whether the Optical 2x Zoom introduction video is played back when the Camera button is pressed an odd number of times and if Live Focus introduction video is played back when the Camera button is pressed an even number of times.

## ► When replace the display smartphone

1. Turn off the Kit and the control box.
2. Remove the charging & security cable for information previously connected to the smartphone and turn off the smartphone.

3. Install a new smartphone by following the instructions in this manual.  
※ If a new smartphone is installed, the previous display smartphone will not be connected.

To be continued on the next page ➤

## ► Trouble Shooting

Symptom 1. "Service is failed to launch" message	Execute "Button Launcher" on the smartphone.	When the "Disconnected" image is displayed, it is the Bluetooth pairing problem.	Try pairing with the smart button through NFC tagging	If pairing is not made normally, check if the power connection to the smart button is normal.
Symptom 2. "Pairing Failure" message				
Symptom 3. There is no response even if a button is pressed.				
Symptom 4. "Media file does not exist" message	This error message is displayed when a video file for operating contents does not exist in the device.		Confirm that video files are normally distributed to the relevant device through RMS.	

## 2. How to Assemble and Install the Device

**!** The manual is described and prepared with Kumoh's Recoiler Charging & Security connector installation method. For Invue security installation, please refer to Invue's connector installation manual separately supplied.

1	Pull the connector to a length that will allow you to connect the charging & security cable connector( <b>c</b> ).	2	Release the back screw of charging & security cable connector( <b>c</b> ) with supplied screw driver( <b>i</b> ), and connect the connector( <b>c</b> ) with smartphone.
3	Remove the protective film from the double-sided adhesive tape of connector. Rotate the back of the universal sensor cable connector( <b>c</b> ) to make it horizontal with the smartphone.	4	Adjust the surface where the connector( <b>c</b> ) is attached to make it horizontal as shown in the figure, and then press it so the whole surface is attached evenly.
5	After attaching the connector( <b>c</b> ), press and hold the whole attached surface evenly and firmly for more than 30 seconds to attach it. Reassemble the screw which is released during assemble process <b>2</b> with supplied screw driver( <b>i</b> ).	6	When connector( <b>c</b> ) installation is complete, remove the winding prevention sheet by spreading it in the opposite directions and mount the device on the mounting groove.
7	① Before installing the security wire for S-Pen, assemble the S-Pen by extruding the S-Pen head as shown in the figure. ② Place the head of the S-Pen into the groove on the bottom plate of the security lid( <b>f2</b> ). ※ Insert it in such a way that the surface with no SAMSUNG logo becomes the top side, as shown in the figure. ③ Place the security wire molding( <b>d</b> ) into the bottom plate of the security lid( <b>f2</b> ).	8	① Assemble the bottom plate of the security lid( <b>f2</b> ) with the top plate of the security lid( <b>f3</b> ). ② Align the security holder( <b>f1</b> ) with the locking clip insertion hole of the combined security lid, and assemble the security holder( <b>f1</b> ). ③ Insert the security holder( <b>f1</b> ) into the end of the security lid, and insert the locking clip( <b>f4</b> ) into the locking clip insertion hole.
9	Mount S-Pen assembled with the security wire on S-Pen mounting hole on the Kit. ※ Mount it in the way that the SAMSUNG logo of S-Pen is shown in front.	10	Connect the charging & security cable connector( <b>b</b> ) to USB port on the control box, and turn ON the control box. ※ In case of SES/SIS Preview Kit, connect all 2 charging & security cable connectors. ※ After turning ON the control box, check if LED of the control box is ON.

### ► How to separate the charging & security cable and S-Pen security wire

※ Before separating the charging & security cable, make sure to turn OFF the control box.

1	Turn OFF the control box, separate the security cable( <b>b</b> ) and loosen the screw assembled to the charging & security cable connector( <b>c</b> ). ※ In case of SES/SIS Preview Kit, separate all 2 charging & security cable connectors. ※ If you separate the cable( <b>b</b> ) without turning off the control box, an alarm will sound.	2	Detach the bonded part at the back of connector( <b>c</b> ) using a remover( <b>m5</b> ), and separate the connector. ※ Since the remover head is sharp, make sure to wear gloves and use it carefully.
3	Separate the locking clip( <b>f4</b> ) by using a gimlet. ※ The gimlet or the pointed tool is not included in this package.	4	Take the product apart in the reverse order of its assembly. ※ Be careful not to lose any separated part.

1	Turn OFF the switch.	2	Turn counter-clockwise
3	Take care not to lose the disconnected screw.	4	Completed assembled Security wire
5	Gimlet or pointed tool	6	Turn ON the switch.
7	LED	8	Control box
9	S-Pen	10	Power S/W

### ► Safety warning

The following instructions must be followed.

Do not expose the product to fire or other heat sources.

Do not disassemble, repair, or damage the product.

This creates the risk of injury.

Please do not service or pull the wire if repair is necessary.

This creates the risk of damage to the product or injury to the user.

Protect the wire if disconnected or breaks away, do not touch with bare hands, but always wear gloves.

The disconnected part of the wire is sharp, thus may cause injury.

Do not use the wire for purposes other than as a security alarm device, and do not allow access to children.

Do not touch the wire around your neck or body may result in death or serious injury.

This creates the risk of electric shock.

The event of a damage or failure product, do excessive repair service or intentional misuse.

Within the warranty period in which the device is a consumable product, no repair service is provided even within the warranty period.

The device may not cause harmful interference, and (2) this device must accept any interference received, including

The specifications and design of the product may be modified without prior notice to improve product performance.

This Device Complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including

Interference that may cause undesired operation.

## **FCC Warning Statement**

FCC Part 15.19

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Part 15.21

Any changes or modifications (including the antennas) to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.

## **IC Warning Statement**

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) L'appareil ne doit pas produire de brouillage, et (2) L'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

## **FCC and IC Radiation Exposure Statement**

This equipment complies with FCC and IC RF Radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

## **RF du FCC et IC d'exposition aux radiations**

Cet équipement est conforme à l'exposition de FCC et IC rayonnements RF limites établies pour un environnement non contrôlé. L'antenne pour ce transmetteur ne doit pas être même endroit avec d'autres émetteur sauf conformément à FCC et IC procédures de produits Multi-émetteur.

Cet équipement doit être installé et utilisé avec une distance minimale de 20 cm entre le radiateur et votre corps.
