FCC ID: 2AJOP-GD55UG
Model number: GD-55G

Dear Sir/Madam,

We, Guangdong Shangrila Networking Technology Co., Ltd
hereby declare that we have a product named Digital Portable Radio (FCC ID: 2AJOP-GD55UG),
the model of GD-55G supports FM voice function at the frequency point 453.2125MHz,
453.4625MHz, 453.7125MHz, 453.8625MHz, 458.4625MHz, 458.8625MHz and 458.2125MHz.

DMR protocol utilizes dual time slot TDMA technology to achieve an equivalent
bandwidth of 6.25 kHz.

In order to ensure the signal is more stable, will always occupy two time slots. Two time
slot signal are same, as long as one of the time slot signal is received, can be
correctly demodulated. So C3000 chip occupies two time slots to make the signal more
easily received and demodulated successfully, and with better stability.

Data: Minimum data rate of 4800 bps/6.25 KHz BW

Best regards,

Sincerely Yours,
