Federal Communications Commission
Authorization & Evaluation Division,
7435 Oakland Mills Road,
Columbia, MD. 21046
Attention: Equipment Authorization Branch

Subject: 5G Sub-6GHz HAC Attestation
FCC ID:2AJOTTA-1573

To Whom It May Concern,

We attest the handset as designed is expected to exhibit similar audio intensity levels between a voice call placed over a VoLTE connection and over a 5G Sub-6GHz connection. The combination of ABM1 values from a VoLTE connection and ABM2 values from the 5G Sub-6GHz connection, while maintaining a S+N/N margin of 3dB or greater from the rating threshold, is expected to represent the HAC performance when operating in 5G Sub-6GHz bands. The ABM1 result used in T-coil report Chapter 11 is measured by LTE in OTT mode.

Should you have any questions or comments concerning the above, please contact the undersigned.

Yours Sincerely,

HMD global Oy,

Name: Reza Serafat
