主板通过弹片与转轴接通，转轴两头弹片需确保接通的稳定性  
副板与屏贴两条导电布，转轴FPC两头贴导电布接主副板地  
上听筒需接地，听筒磁钢油层太厚，（影响盒盖数据）

The motherboard is connected to the shaft through spring clips,  
and the stability of the connection needs to be ensured by the  
spring clips at both ends of the shaft

Two conductive cloths are attached to the sub board and screen,  
and conductive cloths are attached to both ends of the FPC shaft  
to connect the main and sub boards to the ground

The earpiece needs to be grounded, and the magnetic steel oil  
layer of the earpiece is too thick, which affects the data of the box  
cover
