

Installation Guide

①

Use the supplied hex key to screw the lugs onto the back of your new EO2 display.

②

Draw a mark on the wall where you'd like the center of your EO2 to go. We recommend 57" from the floor or about eye level.

③

Center the Wall Mount over the mark, using the built-in bubble level to straighten it, then trace the locations of the two holes in the Wall Mount onto the wall.

④

Using a 3/16" drill bit, drill two holes in the center of the marked locations. Screw the wall anchors into the holes. Secure the Wall Mount using the included screws and washers.

⑤

Plug the DC plug into EO2, then carefully slide EO2 down into the Wall Mount, ensuring that it's securely attached to the wall before letting go. Press the power button on the back of the display.

⑥

Why Won't EO2 Connect to my WiFi Network?

1. Double-check the basics: your network name and password must match. (Including things like capitalization and punctuation).
2. EO2 cannot connect to networks that require secondary browser-based authentication (such as many corporate portals). Please contact your network administrator to whitelist your EO2's MAC network address (you can find this on the back of your unit).
