Solder Board-Component View 7	 A photograph of a rectangular electronic component, likely a module, mounted on a blue printed circuit board (PCB). The component has a silver-colored metal casing. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The component is located between the 10 mm and 20 mm marks on the ruler.
Solder Board-Component View 8	 A photograph of the same electronic component from a different angle, showing the underside. The component has a black plastic housing with a series of horizontal slots. It is mounted on a blue PCB. A black ruler with white markings is placed next to it for scale, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The component is located between the 10 mm and 20 mm marks on the ruler.

Solder Board-Component View 11	 A photograph of a small green printed circuit board (PCB) component, likely a surface-mount device, positioned on a blue textured surface. The component is rectangular with two gold-colored pins extending from its ends. It is placed next to a black L-shaped ruler with white markings. The vertical ruler shows measurements from 0 to 90 mm, and the horizontal ruler shows measurements from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler.
Solder Board-Component View 12	 A photograph of the same small green PCB component from a different angle, showing its top surface. The component is rectangular with various components and markings visible on its surface. It is placed next to a black L-shaped ruler with white markings. The vertical ruler shows measurements from 0 to 90 mm, and the horizontal ruler shows measurements from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical ruler and the 30 mm mark on the horizontal ruler.
