Quick Installation Guide

300Mbps Wireless PCI Express Adapter

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Catalogue

Product Introduction

This wreless adapter is highly integrated and cost-effective Wireless Adapter that provides PCI Express interface, and full compliance with IEEE802.11a/b/g/n standards. Wireless transmission rates can reach up to 300Mbps. Using the Wireless Desktop PCI-E Adapter not only can you connect your desktop computer to a high-speed Wi-Fi network and experience faster files transmission and high-speed Internet browsing from further distances across your home than that in previous-generation Wireless n technology, but also you can enjoy high performance wireless viewing HD multimedia and real-time online war game. This Desktop PCI-E Adapter is the best choice for the desktop computer users who want to enjoy a better wireless performance and high-speed Wi-Fi network.

- Complies with IEEE 802.11n/b/g standards
- Supports PCI-E 1.1 X1 bus
- Wireless transmission rates up to 300Mbps
- Supports Cisco CCX
- Supports multiple BSSID

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

－ Reorient or relocate the receiving antenna.

－ Increase the separation between the equipment and receiver.

－ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

－ Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not　be co－located for operating in conjunction with any other antenna or transmitter.

Product Introduction

Step one： Install the Wireless Adapter on the
the host of the desktop computer

Step two：Install the Wireless Adapter driver.

Step three：Connect to the wireless network
