

RE: The Lincoln Electric Company
FCC ID: 2AJY8-LEWB0000111
IC: 22017-LEWB0000111
ATCB021860

Page 3 of the Operational Description references retrofits in which “the module can be purchased as a kit and placed where the K3001-2 kit would go.” Please clarify if this means that the entire EUT, including the enclosure in which it is being authorized in this application, will be sold to be installed, or not. Please note that modular approval is not being sought in this application – the certification will include the enclosure identified in this filing – any marketing without this enclosure would not be covered by this authorization. Please explain.

Response to Comment: The entire EUT will be sold for installation.
