## Quick-Start Guide

### Zedly Trakkit

#### Meet your Trakkit

The most versatile device in the Zedly lineup, Trakkit provides an innovative solution for your tracking needs that includes GPS tracking, active alerts, motion detection and temperature monitoring. A micro USB port is provided to run off external power (this does not charge the battery).

#### Battery Installation & Removal

When you first unbox your Trakkit, batteries must be installed. To access the battery compartment in your Trakkit, remove the bottom plate by gently pinching the side bars, one side at a time.

Once open, carefully insert AAA batteries one at a time, paying close attention to the positive and negative contact ends. Replace bottom cover in a way such that the grooves cover the batteries.

 USE OF DISPOSABLE LITHIUM AAA BATTERIES IS PREFERRED

#### Engage with your Trakkit:

Throughout the installation process, Trakkit requires the use of its mobile phone app available on the App store and Google Play. Through this app, you will receive tracking alerts and notifications regarding firmware updates, activate your account, register devices and manage your service subscription.

#### Connect to your Trakkit:

After installing batteries in your Trakkit, plug in the provided USB cable in the area shown to connect to the device and configure it to access your Home Wi-Fi network.

Detailed instructions on how to configure your device and troubleshooting help can be found at: <http://trakkit.zedly.com>

#### Configure your Trakkit:

When the Trakkit powers on, look for a solid yellow light emitting from the LED window (shown below).

Next, gently double tap the device until a blue light appears, then double tap again. The blue light will begin flashing, indicating the device is in "access point mode" and is ready to pair with your mobile phone using the Trakkit App. The user should notice a solid blue light and flashing yellow light to indicate the device is in "access point mode". Use the mobile app to finalize the activation of your device.

#### Firmware updates:

When new firmware is released, users will be prompted to connect the device via USB cable to a power source and authorize the update. This update must be performed within range of one of the home networks. Once the update is under way, both the blue and yellow LEDs will blink rapidly until the update has completed.

## Mounting your Trakkit:

Your Trakkit is equipped with flanges on both sides of the device for convenient mounting wherever you need it. When mounting the device, please note the antenna is located on the top logo side of the device.

### Information to the User:

Changes or modifications not expressly approved by the manufacturer could void your authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Correct disposal of batteries in this product  
(Waste Electrical & Electronic Equipment) (Applicable in countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal. (Applicable in countries with separate collection systems) This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment. To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
