

Attn: Director of Certification

Cover letter regarding Class II Permissive Change application for FCC ID: 2AK6N-WG233

The applicant is seeking equipment authorization for use of a Wi-Fi Module with the FCC ID referenced above in a host device using two 7dBi antennas. This is a higher antenna gain than the original grant allowed for. Other than the antenna change, no other changes are being made to the module.

Test reports showing compliance of the radiated spurious emissions of the radio module installed in the new host product are being submitted in this filing. An MPE report and the antenna datasheet are also being included in the filing.

Sincerely,

A handwritten signature in blue ink, reading "Martin Taylor", is written over a thin orange horizontal line.
