03. How To Use

3.1 Instruction

3.1.1 Turn on the microphone: Press the power button for 3 seconds to turn on or turn off the microphone; The blue light will show up when the device is on.

3.1.2 Bluetooth Connector: Open the bluetooth on your phone and scan the bluetooth devices, select "Q9" to connect. There will be a notice voice after their successful connection.

3.1.3 Adjust the settings on their operating platform to fit most for your singing demand.

3.1.4 Start Singing: During your singing, all the operations like Play/Pause, Last Song/Next Song can be done on your mobile phone or on the microphone.

Remark:

Once the device was connected with your phone, they will connect automatically next time without setting again.
If any phone call come during the use, you can press "Play/ Pause" button to switch into the phone call and talk by the microphone.
If you only want to listen to the music by the microphone, you can set at the minimum of the voice volume

3.2 Android Phone Recording

3.2.1 Connect with the audio recording cable, automatically. If it is failed to detect the system, you can choose manually. When the manual selection is not matched with the actual phone system, the microphone. will still detect the right system and connect automatically.
3.2.2 Q9 microphone can also detect Symbian system; Please use the recording cable when recording the songs under iOS system; Authentic iOS system does not support bluetooth data transmission.
Remark: To save the song you recorded, please operate according to your phone settings. When connecting the recording cable, the bluetooth connection will stop automatically.

3.3 Apple Mobile Phone Bluetooth Recording

3.3.1 Link the bluetooth, open any Karaoke APP or Music Player APP, click and start singing.

3.3.2 Slide upward on your phone main menu, click the "Q9", appear selection menu "iPhone speaker", "Q9" and "iPhone", select "iPhone speaker" (mobile phones play music at this time, Q9 as voice input device, without the accompaniment music),start recording songs.

3.3.3 Save and play the tape, can enjoy high quality recording songs.

3.4 Play Songs By U Disk

3.4.1 Plug the U disk to USB port, the microphone will detect all the .mp3 files and play automatically. You can press operating buttons to pause or switch the songs. (It is not available to record when using the U disk)

3.4.2 When playing songs by U disk, you can control the voice volume by adjusting the accompany button.

3.4.3 The voice volume button is to adjust the recording volume; The accompany volume button is to adjust the music volume.

3.5 System Mode Adjustment

3.5.1 Q9 microphone has auto detection for Android and iOS phone systems. Once the mobile phone connected with the microphone, its system would be detected

FCC Warning:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
o Reorient or relocate the receiving antenna.

- o Increase the separation between the equipment and receiver.
- o Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- o Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: the Mini USB port is used for charge only, the USB Port is used for discharge only, without exchanging data with PC function.
