

Anonsuo AS-1188 (A-touch) specification

1. When connected to the power supply, the speaker goes into standby mode and the top indicator lights up. When the speaker is turned on the blue indicator light flashes (this is the default state when started with bluetooth).

2. When the speaker is on, if you want to choose another audio source you can directly insert the external audio cable into the AUX-IN jack (accessories Included).

When the speaker is connected with another audio device, it will automatically switch to external input mode.

Paired device

- 1.The user must pair the device before they listen to music.
- 2.Make sure that Bluetooth is enabled on your device (such as a phone).
- 3.The speaker starts in Bluetooth mode by default. If you want to play from another audio device, please connect the device to the speaker with the audio cable .The speaker will automatically recognize and connect with the audio device

Play an external audio source

- 1.When you plug the 3.5mm AUX audio cable into the AUX jack to connect the external audio source ,the speaker will automatically enter into AUX mode and the indicator light will turn green.
- 2.When you connect an external audio player to the speaker you can play your favorite music (External audio source can be MP3 / mobile / computer, etc.)

Product specification

Product model: AS-1188

Product size: 170×84.5×237mm

Transmission distance:≤10M (depending on environmental factors and the connecting Bluetooth device)

Power input: : 100-240V ~ 50/60Hz

Output power:5W×2

Power consumption:18W

Working Temperature:0 ~ 45°C

Working Humidity:20% ~ 80%

Packing list

- 1 x Bluetooth speaker
- 1 x AC power cable
- 1 x 3.5mm Audio cable
- 1 x Product manual
- 1 x Certificate of Approval

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
