

A3 Single/Double Channel Touch Screen Free Stick-on Transmitter Operating Manual

Company reserves the right to change product design and specifications without prior notice then, photos are for reference only.

A/2 H12020

F Product Features

H Flat Panel High hardness surface, excellent transparently

K Touch screen fashion trend

J Jogging move and continuous move control individually

S 868MHz radio frequency has high sensitivity

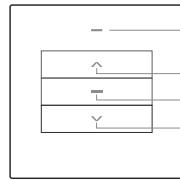

C Powerful magnet in back, stick to the wall conveniently

A3 Touch Screen Free Stick-on Transmitter use 868 MHZ radio frequency, Remote-controlled distance is above 100m(visual-range), two reinforced concrete wall at least 30 m. 868 MHz radio frequency with a strong anti-jamming capability, high receiving sensitivity, stable center frequency and convenient debugging, etc function in wireless communications.

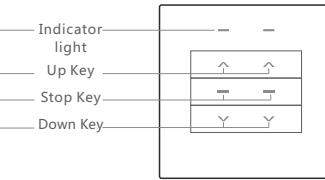

Working power supply : 3V button cell (CR2430)
Working frequency : 868MHz
Transmit power: 10mW
Working Temperature : -20°C ~ 70°C
Working Humidity: (Max90%)

Note: electronic products need damp proof, can not use in high humidity with a long time.

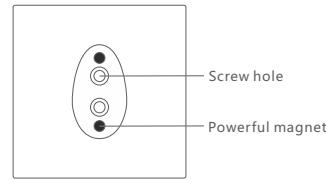

K Key functions

A3 Single channel Touch Screen Free Stick-on Transmitter

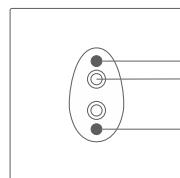

A3 Double channel Touch Screen Free Stick-on Transmitter

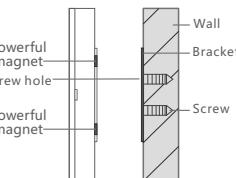

On the back of the transmitter

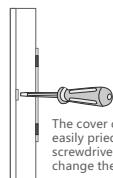

I Install Sketch Map & Change the battery

On the back of the transmitter

Three installation methods :
1. Fix the bracket to the right position with a screw, it can be adsorbed by built-in powerful magnet.(as the picture)
2. Open the surface cover, fix the bottom cover to the right position with screw, then close the surface cover.
3. Stick Double-sided foam tape on the bottom cover, then stick to the right position.

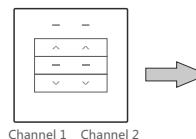

Note: battery consumption, working life is half a year.

Change the battery

P Programming operation method (FOR EXAMPLE: E24-EL-SA-1 VENETIAN MOTOR)

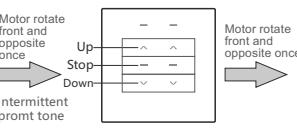

Match Code: The transmitter must match code with receiver, and then the receiver can be remote control by transmitter.
* Repeat operating match code procedure once can delete the code (Delete code on transmitter).

1.Choose the channel you want to set

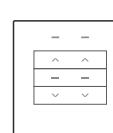

2.Press the [SET Key] on the motor

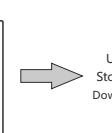

3.When the motor stop with in 10s ,press [Up+Stop+Down] Key at the same time.

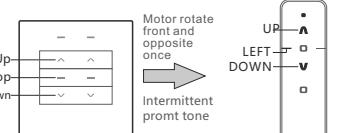

Channel copy: Increased another transmitter for the setting done transmitter, and the receiver can be control by multiple transmitter.

1.Choose the channel you want to set

2.Press [Up+Stop+Down] Key at the same time about 10s

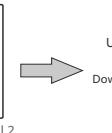

3.When the motor stop within 10s, match code on another transmitter.

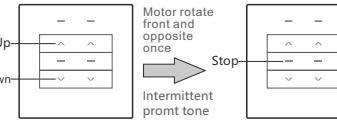

Change the direction: Change the direction for the code setted receiver, for example, before direction changed, if you press the Up Key on the Transmitter the curtain will go downwards, while after direction changed, curtain will go upwards when you press the Up Key !

1.Choose the channel you want to set

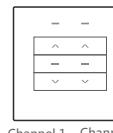

2.Press [Up+Down] Key at the same time about 10s

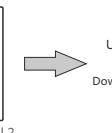

3.When the motor stop within 10s, Press [Stop]Key about 5s

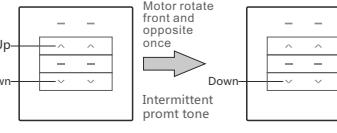

Up/Down limit setting: Up/Down limit means curtain run Up/run Down can reach high/low position. This function is only applicable to electronic limit function of the receiver(motor)

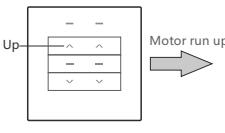

1.Pressing the [Channel Key] choose need to set the limit channel.

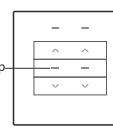

2. Press[Up+Down Key] about 10s ;

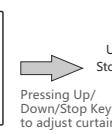

3. When the motor stop with in 10s ,press [Down] Key about 5s.

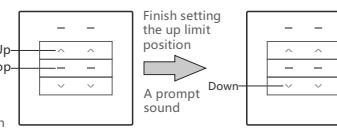

4.Pressing [Up] Key within 20s, Setting up limit position, Warning tone close.

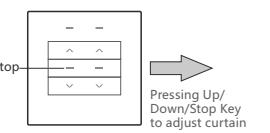

5. Pressing the [Up/Down] Key to let blind move,stop it in a suitable position by pressing [Stop] Key, which is called uplimit position

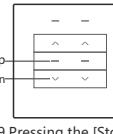

6.Pressing the [Stop+Up] Key to confirm up limit value at the same time.

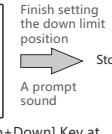

7.Pressing [Down] Key within 20s. Setting down limit.

8. Pressing the [Up/Down] Key to let blind move,stop it in a suitable position by pressing [Stop] Key , which is called down limit position.

9.Pressing the [Stop+Down] Key at the same time to confirm down limit position.

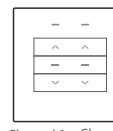

10.Pressing [Stop] Key about 5s with in 20s, Saving limit position.

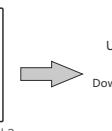

*Note: If you want to reset the limit position Again operate Up/Down limit set up step.

**Note: Different motor have different prompting mode,please refer detail with specification.

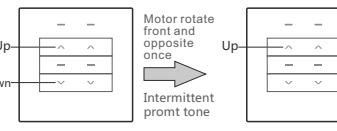

Inching/Continuous move mode change: Switch key function for the code setted receiver (motor),after the switch ,receiver (motor) rotate little if you press the Up or Down key on the transmitter (N09~N16 without this function)

1.Choose the channel you want to set

2.Press the [Up+Down] Key about 10s at the same time.

3.Press the [Up] Key around 5s within 10s after the motor stop.

Warning Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
