MVDB0032	MVDB1032	MVDB2032	MVHH0032	MVRB0032																																															
MVDB0033	MVDB1033	MVDB2033	MVHH0033	MVRB0033																																															

F. Model Number Variations In Detail

All model number listed in Appendix E uses the same smart sensor module MVSS0000. The core components used in MVSS0000 is the same across all Product Series. As an example, MVDB00___ has a designated slot to fit the smart sensor module. For the Hula Hoop and Resistance Band product series, an additional adapter is provided to secure the smart sensor module in place.

The first four letters of the 3 product series model number (MVDB0____, MVHH0____, MVRB0____) will always remain the same, where the ending 4 digits of a product series will increase in value depending on product number reference, hardware revisions, additional features or accessory bundle, and product weight differences. Essentially, the minor variations are created to address different regional market needs.
