

3.5 inch Wireless Digital Video Baby Monitor

UserManual

1.SAFETY INSTRUCTIONS

1.CAUTION: Keep the device away from the reach of children.

2.Strangulation Hazard: Children can become entangled in the cords, therefore power cords should be kept more than 3 feet away from the crib and baby's reach at all times. Baby monitors and cameras with power cords should never be hung on or near the crib. This product is not a toy and should be kept out of children's reach.

3. Read and Keep to instructions: All the safety and operating instructions should be read before the video baby monitor is operated. This product cannot replace responsible adult supervision. You **MUST** Check your child's activity regularly, as this product will not alert parents to silent activities of child.

4. This product is intended for indoor use only.

5. Test monitor before use and after changing camera location. Check the reception regularly. Obstacles , such as concrete walls, may shorten the wireless signal transfer range.
6. Use only the AC adapters provided. Always unplug AC adapter from wall outlets and power source during periods of non-use.
7. Do not touch the plug contacts with sharp or metal object.
8. Do not allow water damage to the monitor unit, charging port , or charging cable which cause overheat of the charging components.
9. Do not let this unit be exposed to rain, moisture, dripping or splashing and direct heat sources such as a candle, radiator, heat register, stove or other appliance that emits heat.
10. Do not attempt to repair or adjust any of the electrical or mechanical functions of the units, if you do, the guarantee will be made void.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
