

The first step: Open the Bluetooth of the smartphone.

The second step: turn on the power by pressing the power button

The third step: Open the APP on the smartphone and put the tracker nearby the smartphone then connect the tracker with the smartphone APP by clicking on the button of “ connecting”

The forth step: set up the Bluetooth working distance for 5 to 15m, then if the trackers go away to reach the distance of 5m or 10m that the APP set up, then the smartphone will start to ring to remind the smartphone user that the trackers are out of the set distance.

The fifth setp: if the user lost the smartphone, they can find the smartphone by clicking the power button of the tracker to connect the smartphone.

The sixth: The user doesn't need to turn off the power after using this tracker, since the tracker will be working continuously in a situation of low power consumption which we call it a standby status.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
