Special announcement

The document contains proprietary information of J.TOUR product and is not be disclosed or used without the prior written permission of L.T.F communication Equipment and Technology Co., LTD and released authorization letter in official website. The product appearance is supervised by the company 30 Rui Tong.

L.T.F communication Equipment and Technology Co., LTD owns the J.TOUR brand. Due to update and improvement of J.TOUR products and technologies, information in this document is subjected to change without notice. Login in J.TOUR's official website: <http://www.jtour.xin> or call the global operations center line: 400-900-8650 for more detailed instructions.

Due to the user habits and compatibility with associated application, this product attached GPS global positioning system . GPS as a validate auxiliary for positioning results, provides the user with a comparatively accurate measurement by the way of one satellite calculation and the other verification

Disclaimer

Due to the different circumstances and application methods, the user that wears the equipment must pay special attention to the following instructions:

1. Since the product is the sophisticated wearable device, the factors such as the user wrong operation, external interference and devise problem may lead to the unsafe consequences. The user needs to master the the basic knowledge of wearing electronics and take the risk on your own.
2. This product is widely used in a variety of environments and activities. User needs to consider the safety of the installation location and operation in movements, and take the safety responsibility. Product manufacturers and operators does not undertake any responsibility for the above operation..
3. The product is not suitable for precise Measurement..
4. The product conforms to the FCC regulation in article 15 that describes the conditions of the Class B digital device. That means there may be mild radio communication radiation when using. User needs to adjust the position to avoid the interference by the other devices, that may lead to signal receiving and operation inproperly. In addition, it is also important to notice whether the product will affect the normal work of other communication devices. The above interference state is not within the guarantee of this product.
5. The product does not refer to mapping standards in any country to set path. The results of map scanning are based on accurate longitude and latitude by satellite positioning. Map is only as a reference and the distance can not be estimated according to the picture ratio.

Battery Warning

Without complying with the following guidelines, the life of the lithium battery in the equipment may be reduced and user may take the risk of fire, chemical burn, electrolyte leakage.

- Do not expose the equipment to a heat source or at a high temperature location
- Do not bore or incinerate the equipment or battery.
- Do not use in extreme environment
- Dispose your device battery according to local applicable regulations and consulting local waste disposal department.

Health Warning

- Before starting or change your exercise program, please be sure to consult your doctor. if you wear a heart preceptor or other electronic devices inside your body, please consult your doctor before the use of heart rate monitor belt.
- The heart rate monitor belt and other JTOUR accessories are used by consumers rather than medical device and may be interfered by external factors, so the heart rate reading is only for reference. The company will not take any responsibility for the consequences of any error reading.

Security Precaution

ALLERGIC REACTIONS OR SKIN IRRITATIONS MAY OCCUR WHEN
PRODUCT IS IN CONTACT WITH SKIN, EVEN THOUGH OUR PRODUCTS COMPLY
WITH INDUSTRY STANDARDS. IN SUCH EVENT, STOP USE IMMEDIATELY AND
CONSULT A DOCTOR.

Limited Warranty

The products will be guaranteed for 2 years from the date of purchase. During this period, the company will repair or replace the parts that have problems in normal use.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
