

Model: CH-C09E(gray)

EUT Housing and Board View 1	 A photograph showing the back of a black electronic device (EUT) and its internal battery compartment. The device is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, showing measurements from 0 to 100 mm. The device's back cover is on the right, and the battery compartment is on the left. The battery compartment contains six AA batteries. The back cover has a small blue button and a label with 'UP' and a triangle symbol. The battery compartment has a label with 'Agar' and 'AA 1.5 V'.
EUT Housing and Board View 2	 A photograph showing the front of a black electronic device (EUT) and its internal battery compartment. The device is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, showing measurements from 0 to 100 mm. The device's front cover is on the right, and the battery compartment is on the left. The front cover has a small blue button and a label with 'UP' and a triangle symbol. The battery compartment contains six AA batteries. The front cover has a label with 'Agar' and 'AA 1.5 V'.

Solder Board-Component View 1	 A photograph of a small, square, black printed circuit board (PCB) component. The component is densely populated with various electronic components, including a central integrated circuit (IC), several resistors, and capacitors. It is placed on a blue fabric surface next to a black L-shaped ruler. The ruler has white markings in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale ranging from 0 to 100 mm.
Solder Board-Component View 2	 A photograph of the same PCB component from a different angle. This view shows the underside of the component, revealing the solder joints and the components on the reverse side. The component is placed on the same blue fabric surface next to the same black L-shaped ruler, which shows the same millimeter markings as in View 1.

Solder Board-Component View 3	 A photograph of a small, circular, black printed circuit board (PCB) component, likely a solder mask or a small board, placed on a blue background. The component has several small, rectangular components (possibly capacitors or resistors) mounted on it. A black L-shaped ruler is positioned next to the component for scale, with markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 4	 A photograph of the same small, circular, black PCB component, viewed from a different angle (View 4). The component shows different components and solder joints. A black L-shaped ruler is positioned next to the component for scale, with markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
