

	Smart Lock U200 User Manual Serrure connectée U200 Aqara Conectado Inteligente U200 Manual del usuario 智能门锁U200 使用指南	Product Introduction U200 is an IP-rated smart lock which supports multiple unlocking methods, such as fingerprint, password, NFC card and Apple Home Key, etc. Through intelligent customization of the fingerprint module and deep calculation algorithm, it provides a smooth experience of unlocking the door through fingerprint. The door lock can be configured through the Aqara Home app. Along with other Aqara smart devices, it can realize various smart combinations for your connected home, and provide you with a convenient and safe experience. * An Aqara Hub is required. Home Connect requires specific models of the Aqara Hub. Please visit www.aqara.com/enpage/homeconnect for more details.	What's in the Box 		
Instructions before Installation Before using this product, you need to download the Aqara Home app and register an account. If you only use Apple's "Home" app to connect this product, no smart connections are required, but you will not be able to experience the many unique functions in Aqara Home app, such as fingerprint recognition, or unlock the door and other functions.  Sign up for Aqara Home account, then add Smart Lock U200 and follow the app installation tutorial to complete the installation.  Or scan the following QR code to watch the installation video.	A 4-in-1 standard Philips head screwdriver is required for installation. Three tools necessary only for the new doors or adjusting existing door holes: Drill / Hole Saw / Wood Mastic Chisel / Pinset / Tape Measure / Level	Device Installation 1. Measure the distance from the door frame to the circle center of the opening. 2. Adjust the back set length of the deadbolt to 2 1/4 in (63mm) or 2 1/2 in (63mm) according to the measurement. 3. Fix the deadbolt to the door. Pay attention to the up and down direction of the deadbolt when installing. 4. Install the strike plate to the door frame. 	5. Push the outer panel connect to cable through the deadbolt from the door and strengthen the outer panel with the inner plug plate and appropriate screws. 6. Take off the battery cover and insert cover with the removal tool. 	7. Connect the connector cable of the outer panel to the socket of the inner panel. 8. Fix the inner panel to the mounting plate indoors and cover the hole. 	
After the battery is installed, the door lock will play a voice prompt to indicate that the installation is completed. 	Preparation before use 1. A smartphone or tablet that supports Bluetooth or a cellular network (with iOS or Android system) is required. 2. Please make sure that there is a 2.4GHz Wi-Fi connection and your internet connection is stable. 3. Please make sure the battery cover and pinset is full before use. Note: It is recommended to use original batteries or alkaline batteries, as others may lock and this cause damage to the product when used for a long time. (Warning: Please consider the safety when it is too old, worn, or bulging and door opening will not when the battery runs out. In this case, you can change the lock with Type-C Emergency power supply or unlock with the key.) 4. Long press the "Reset" button for 3 seconds, and release the button after you hear the voice prompt. Then the reset is complete. Note: The door lock cannot be reset normally, as the user information will be cleared after reset. Please set the door lock by following the tutorial (see above) in advance.	Device Binding & Initialization Download the Aqara Home app. Search for "Aqara Home" in the App Store or Google Play. Also, you can scan the following QR code to download the Aqara Home app.  Open the app, tap "+" in the upper right corner of the homepage to enter the page of "Add the device". Choose "Smart Door Lock U200" and then install the door lock device according to the instructions. Due to upgrade and updates of the Aqara Home app, the actual operation may differ from the above description. Please operate it according to the instructions of the Aqara Home app.	Add the user Enter the page of the door lock device and add the door lock users according to the instruction from the app. Note: The first user will be the administrator, cannot be deleted. Add the device to HomeKit (for iOS users) After the door lock is powered on for the first time, click "+" at the upper right corner of the Apple Home app in the iOS "Home" App accessory" to open Aqara Home app. Tap "Add HomeKit" in the "Control Settings" column of the setting page of the door lock. Scan or manually input the HomeKit code as provided. If the code can be found when you open the battery cover of the device door lock. Then add users according to the instructions. HomeKit only supports the lock unlock, smart automation setting and Apple Home Key.	Add to Apple Home Key (for iOS users) After it is connected to HomeKit, one virtual door card will be automatically generated in the Apple "Wallet" app. You can use an iPhone or Apple Watch, which supports the Apple Home Key function to unlock by holding it close to the door lock. Product instructions 1. To ensure this home-connected accessory, the latest version of iOS or iPadOS is recommended. Considering this home-connected accessory is internally and away from home requires a household, HomePod mini, or Apple TV set up as a home hub. It is recommended that you update to the latest software and operating system. 2. To use home key, iPhone XS or later with iOS 15 or later and Apple Watch Series 4 or later with watchOS 6 or later are required.	3. Use of the Works with Apple badge means that an accessory has been designed to work specifically with the technology identified in the badge and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Connect Google or Alexa app To unlock via Google Home, please first click and third the Aqara Hub. For Alexa, please scan the code and scan how to bind. 
Daily use Verification successful: The keypad flashes in white. Under the red status light, it is accompanied by the sound effect indicating success. Verification failed: The keypad flashes in red. Under the red status light, it is accompanied by the sound effect indicating failure. Unlocking with fingerprint: Place the finger on the fingerprint area. It will automatically unlock after successful verification. Unlock by Password: Input the added password and press the "Enter" button. It will automatically unlock after successful verification. Unlock by Google and Alexa: After Google Home or Amazon Alexa is bound, you may use the voice or the third-party app to unlock. Unlock failure:	Rotate the entry knob to 90° clockwise or counter-clockwise to the horizontal direction for locking. Voice Language You may select the language of the door lock voice in the Aqara Home app (English, French, Spanish, and Chinese). Product Specifications Smart Lock U200 Models: U200 Wireless Protocol: ZigBee 3.0, Bluetooth 5.0, NFC Powering Method: 4 AA Batteries (R1), USB-C Emergency Port (S) Dimensions: 2.9 in x 6.1 in x 1.2 in (74.2 x 154.2 x 30.2 mm) Operating Temperature: -35°C ~ 45°C (-31°F ~ 113°F) Operating Humidity: 0 ~ 95% RH, no condensation	CE-RED-2016T-00400 Federal Communications Commission (FCC) compliance statements 1. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference to a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to you or to others, you may need to take certain measures, which can be determined by turning the power off/on, to correct the interference by one of the following measures: -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment to a different power outlet or to a different circuit to which the receiver is connected. -Consult the dealer or a competent radio/TV technician for help. RF Exposure statement: The maximum SAR for this FCC-certified equipment is not applicable for an uncontrolled environment. No maximum should be calculated or reported in connection with this equipment and/or your body. This device may not be calculated or reported in connection with other electronic accessories.
