

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**EUT Housing and
Board View 2**

Solder Board-Component View 1	 A photograph showing the top view of a red printed circuit board (PCB) assembly. The board is populated with various electronic components, including integrated circuits, capacitors, and resistors. A green ribbon cable is connected to the bottom edge of the board. A metal ruler is placed horizontally below the board, and a vertical ruler is placed to the left of the board, both showing measurements in centimeters. The background is a blue textured surface.
Solder Board-Component View 2	 A photograph showing the bottom view of the same red printed circuit board (PCB) assembly. This view reveals the reverse side of the components and the solder joints. A metal ruler is placed horizontally below the board, and a vertical ruler is placed to the left of the board, both showing measurements in centimeters. The background is a blue textured surface.

Solder Board-Component View 3	 A photograph showing the solder side of a small electronic component. The component is rectangular with a large, flat, silver-colored solder pad in the center. It is positioned next to a metal ruler for scale. The ruler has markings in centimeters (0 to 15) and millimeters (0 to 15). The background is a blue textured surface.
Solder Board-Component View 4	 A photograph showing the solder side of the same electronic component from a different angle. The component is rectangular with a green solder mask and visible circuit traces. It is positioned next to a metal ruler for scale. The ruler has markings in centimeters (0 to 13) and millimeters (0 to 13). The background is a blue textured surface.

Solder Board-Component View 5	 A photograph of a small green printed circuit board (PCB) component, likely an RFID antenna, placed on a blue textured surface. The component is rectangular with a gold-colored edge and features various electronic components, including a central chip and several surface-mount components. A metal ruler is positioned vertically to the left of the component, showing measurements in centimeters (0 to 11) and millimeters (0.5 to 10). Another metal ruler is positioned horizontally below the component, showing measurements in millimeters (0 to 9). The component is oriented horizontally, with its longer side parallel to the vertical ruler.
Antenna View	RFID Antenna  A photograph of the RFID antenna assembly, showing the green PCB component mounted on a larger, rectangular metal frame. The frame is made of a light-colored material, possibly aluminum, and has several rectangular cutouts. The antenna is connected to the frame by thin wires. A red rectangular box highlights the antenna assembly, and a red line points from the label "RFID Antenna" to the box.
