MADIC ITALIA S.p.A. declares that the radio module Verizon used is HL7618RD from Sierra Wireless FCC ID: N7NHL7618RD.

This radio module provides in the grant the following restrictions:

“The antenna(s) used for this transmitter must be used to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.”

MADIC ITALIA provides this information on the user manual of product and into the radio module integration guidance and clearly indicates that is a necessary prescription for the FCC compliance. This documents are provided to the integrator or the installer of product.
