- The AC/DC adaptor should not be obstructed or should be easily accessed during intended use.
- The use of apparatus in tropical climates.

About Sealed Lead-Acid Battery:

This unit works either on the battery pack (Model no.: Tianchang 6-FM-2.6, 12V, 2600mAh)unplug the AC Power adapter from the DC input jack to work on the battery pack (after fully charged); plugging the AC Power adapter while the battery pack is attached initiates the charging of this battery. The charged LED indicator lights red during charging, when the battery is fully charged the indicator is green. Fully charging a run-out battery pack may take 3 hours, A fully charged battery pack can endure approximately 2 hours of continuous playback. This playing time may vary with the surrounding environment, the volume level of the speaker and the battery condition. It is advised that you wait 10-20 minutes before recharging the battery pack if it has turned flat during operation.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Note 2: 1.Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

2. The minimum separation generally be used is at least 20 cm.
