

## 2.4G Remote control instruction manual

Physical pictures:

Parameter:

Product model: YKQT01

Working voltage: DC3V

Working current: Less than 20mA at launch

Working frequency: 2.415GHZ-2.463GHZ

Modulation method: GFSK

Standby current: Less than 1  $\mu$  A

Size dimension: 55\*30\*15mm

The quality of the product: 30g

Transmission power: 10dB

Instructions for:

1: Press the ON button, the indicator light is red, the signal is emitted, the machine is opened, loosen to stop the transmission.

2: Press the OFF button, the indicator light is red, the signal is emitted, the machine

is closed, loosen to stop the transmission.

3: When the emission indicator is slightly on, the battery voltage is low, and a new battery needs to be replaced in time.

Application scenarios:

1: Wireless mouse.

2: Remote control toy.

3: Intelligent furniture, etc.

## Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and

can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

--Increase the separation between the device and receiver.

--Connect the device into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
